## Executive Summary

---

The University of Michigan Institute for Healthcare Policy & Innovation (IHPI) is conducting the evaluation of the Healthy Michigan Plan (HMP) as required by the Centers for Medicare & Medicaid Services (CMS) through a contract with the Michigan Department of Health and Human Services (MDHHS). Domain IV of the evaluation includes a series of surveys called *Healthy Michigan Voices (HMV)*.

This report presents findings from the 2018 *Healthy Michigan Voices* Cohort II Survey. Cohort II respondents were individuals who enrolled in HMP for the first time between January 2016 and January 2018. Previous HMV reports, including the Report on the 2016 HMV Enrollee Survey, focused on the experiences of respondents in Cohort I of the survey who enrolled in HMP for the first time between April 2014 and November 2015. Enrollees in Cohort II were younger than those in Cohort I, more likely to be employed and/or a student, and more likely to have insurance for some or all of the 12 months prior to HMP enrollment. Given that later enrollees are demographically different and may have different experiences from earlier enrollees, the current report examines the characteristics and experiences of individuals who first enrolled in HMP multiple years after implementation of the program.

### Methods

Sampling was performed monthly, from January 2018 to December 2018. At the time of sample selection, enrollees had to meet the following inclusion criteria:

- No HMP enrollment prior to January 2016
- At least 12 months total HMP enrollment in fee for service (FFS) or managed care (MC)
- HMP enrollment (FFS or MC) in 10 of past 12 months
- HMP-MC enrollment in 9 of past 12 months
- HMP-MC in the month sampled
- Age between 19 years and 64 years 8 months
- Complete address, phone number, and federal poverty level (FPL) fields in the Data Warehouse
- Michigan address
- Preferred language of English, Arabic, or Spanish

In total, 2,602 enrollees completed the survey. The weighted response rate for the *Healthy Michigan Voices* Cohort II survey was 42.9%.

Descriptive statistics were generated for responses to all questions, with survey weights calculated and applied to adjust for the probability of selection, nonresponse, and other factors. Bivariate and multivariate analyses were also performed. Demographic characteristics, health-related characteristics, claims-based variables of utilization, and HRA completion were drawn from the state Data Warehouse for inclusion in bivariate and multivariate analyses.

## Results

### Demographics

- 18.8% of enrollees had incomes 100-133% FPL, while 54.6% had incomes 0-35% FPL.
- 49.2% of enrollees were women.
- 90.5% of enrollees had at least a high school diploma or equivalent.
- 7.1% of enrollees had lived four or more places in the past 3 years, and 8.0% had been homeless in the last 12 months.
- 16.3% sometimes, often, or always needed help reading instructions, pamphlets, or other written material from a doctor, pharmacy or health plan.
- 43.4% were uninsured for all 12 months prior to HMP enrollment.
- 26.9% of enrollees spent time caring for a person who could not care for themselves due to illness or disability in the past 12 months.

### Employment

- 55.8% of enrollees were employed or self-employed.
- 29.7% of enrollees who were employed reported changing jobs in the last 12 months.
- Enrollees who were not employed most often reported being out of work (35.4%) or unable to work (33.1%); fewer reported being retired (9.3%), or not looking for work at this time (22.3%).

### Perspectives on the impact of HMP on employment-related outcomes

- Among those who were employed, 76.6% reported that getting health insurance through HMP helped them do a better job at work.
- Among those who were employed and changed jobs in the last 12 months, 29.6% reported that having health insurance through HMP helped them get a better job.
- Among those who were out of work, 74.2% reported that having health insurance through HMP has made them better able to look for a job.

### Caregiving and employment

- Among enrollees who were caregivers and employed or out of work, unable to work, or retired for less than one year, 37.3% went from working full-time to part-time or cut back their hours as a result of their caregiving responsibilities.

**Aim 1: To describe changes over time in health and functional status for HMP enrollees, particularly those with chronic conditions or other indicators of poorer health.**

### Current health status

- 75.7% of enrollees reported that their health was excellent, very good, or good; 19.1% reported that their health was fair, and 5.2% reported that their health was poor.

### Chronic health conditions

- 67.5% of enrollees reported having at least one chronic condition.
- 29.8% of enrollees reported they had a chronic condition that was newly diagnosed since enrolling in HMP.

### **Self-reported change in health**

- Since enrolling in HMP, most enrollees reported their physical health had improved (48.0%) or stayed the same (46.2%), their mental health had improved (35.2%) or stayed the same (59.4%), and their oral health had improved (34.7%) or stayed the same (54.8%).

### **Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.**

#### **Knowledge of HMP covered benefits**

- The majority of enrollees knew that HMP covers prescription medications (92.6%), dental care (77.8%), counseling for mental or emotional problems (58.0%), eyeglasses (56.4%), and birth control or family planning (56.4%). Less than half knew that HMP covers substance use treatment (41.9%) and treatment to stop smoking (35.3%).

#### **Experiences with MI Health Account**

- 60.6% of enrollees recalled receiving a MI Health Account statement in the past year.
- Among enrollees who recalled receiving a MI Health Account statement in the past year, 81.1% strongly agreed or agreed that they carefully review each statement to see how much they owe, 82.0% strongly agreed or agreed that the statements help them be more aware of the cost of health care, and 33.0% strongly agreed or agreed that the information in the statement led them to change some of their health care decisions.

#### **Knowledge of HMP cost-sharing requirements and healthy behavior rewards**

- 66.5% of enrollees knew that some kinds of visits, tests, and medicines have no copays.
- 35.6% of enrollees thought they could be disenrolled from HMP for not paying their bill and 49.7% were unsure.
- 43.1% of enrollees were aware that there is a limit or maximum on the amount they might have to pay each year for HMP.
- 29.9% of enrollees said they knew they could get a reduction in the amount they have to pay if they complete a health risk assessment, while 60.0% said they did not know.

#### **Perspectives on cost-sharing**

- The majority of enrollees strongly agreed or agreed that the amount they have to pay for HMP overall seems fair (84.8%) and the amount they pay for HMP is affordable (87.1%).
- The majority of enrollees (86.0%) strongly agreed or agreed that getting discounts on copays and premiums as a reward for working on improving your health is a good idea.
- Less than half of enrollees (41.9%) strongly agreed or agreed that everyone should have to pay something for their health care.

#### **Perspectives on HMP coverage**

- 97.4% of enrollees strongly agreed or agreed that it is very important for them personally to have health insurance.
- Most enrollees strongly agreed or agreed that having HMP has taken a lot of stress off them (88.7%), that without HMP they would not be able to go to the doctor (81.6%) or the dentist (78.2%), and that they worry about not being able to get the health care they need if their HMP coverage ends (82.0%).

**Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.**

**Forgone health care**

- 23.9% of enrollees reported not getting the health care they needed in the 12 months prior to HMP enrollment. Among those who reported not getting the health care they needed prior to HMP enrollment:
  - The most commonly reported types of forgone health care were primary care (55.3%) and specialty care (27.8%).
  - The most commonly reported reason for not getting the health care they needed was not having health insurance (65.0%).
- 8.2% of enrollees reported not getting the health care they needed in the last 12 months while they were enrolled in HMP.

**Forgone dental care**

- 35.9% of enrollees reported not getting the dental care they needed in the 12 months prior to HMP enrollment. Among those, the most commonly reported reasons for not getting the dental care they needed prior to HMP enrollment were not having health insurance (63.3%) and needing a service that was not covered by their insurance (28.1%).
- 18.3% of enrollees reported not getting the dental care they needed in the last 12 months while they were enrolled in HMP. Among those, the most commonly reported reasons for not getting the dental care they needed in the last 12 months were perceiving that the service was not covered or would cost too much (34.1%) and difficulty/inability finding a provider (31.7%).

**Changes in access to care**

- Many enrollees reported greater ability to get prescription medications (61.4%), help staying healthy or preventing health problems (51.4%), primary care (51.2%), specialist care (47.7%), dental care (44.0%), mental health care (41.8%), cancer screening (38.9%), birth control/family planning services (38.7%), and substance use treatment services (31.8%) after enrolling in HMP compared to before they had HMP coverage.
- Enrollees who knew that the type of care was covered by HMP were more likely to report improved access to that type of care.

**Out-of-pocket costs**

- 36.0% of enrollees reported having problems paying medical bills in the 12 months prior to HMP enrollment. Of those, 85.4% felt that their problems paying bills have gotten better since enrolling in HMP.

**Aim 4: To describe HMP enrollees' health behaviors, how they change over time with enrollment and disenrollment in HMP, and barriers and facilitators to improvement in health behaviors.**

**Health risk assessment (HRA)**

- 43.4% of enrollees said they discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP. Of those, 88.3% chose to work

on at least one health behavior and the majority reported that completing the HRA somewhat or definitely helped their primary care provider better understand their health needs (88.0%), taught them something they didn't know about their health (63.3%), and motivated them to be more responsible for their health (91.0%).

### **Health behaviors and health education**

- 34.4% of enrollees reported smoking or using tobacco in the last 30 days, of which 78.6% reported wanting to quit. Of these, 89.0% reported working on quitting or cutting back.

**Aim 5: To understand HMP enrollees' decisions about when, where and how to seek care, including decisions about emergency department utilization.**

### **Regular source of care**

- 74.7% of enrollees reported having a place they would usually go when they need a checkup, feel sick, or want advice about their health in the 12 months prior to HMP enrollment. Of those, 51.7% said that place was a doctor's office, 20.5% an urgent care/walk-in clinic, 16.2% a clinic, and 9.5% reported the emergency room (ER).
- 91.7% of enrollees reported having a place they would usually go when they need a checkup, feel sick, or want advice about their health in the last 12 months while they were enrolled in HMP. Of those, 64.5% said that place was a doctor's office, 19.9% a clinic, 10.3% an urgent care/walk-in clinic, and 4.2% reported the ER.
- 83.8% of enrollees reported having a primary care provider (PCP).

### **Primary care utilization**

- 83.4% of enrollees who had a PCP reported seeing their PCP in the past 12 months while they were enrolled in HMP.
- Among those who reported not seeing their PCP in the past 12 months, the most common reason given was that they were healthy and did not need to see a provider (51.6%).

### **Preventive services utilization**

- Based on Medicaid claims, 75.8% of enrollees had received at least one preventive service besides a primary care visit in a two-year time frame.
- The likelihood of having at least one preventive service was greater for those who:
  - Reported discussing the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP compared to those who did not
  - Reported having a PCP visit in the past 12 months compared to those who did not

### **Dental care utilization**

- 54.0% of enrollees reported getting dental care in the last 12 months while they were enrolled in HMP.

### **Self-reported emergency room use**

- 38.0% of enrollees reported going to the ER for care in the past 12 months. Of those, 21.3% tried to contact their usual provider's office before going to the ER.

### Checking cost-sharing before seeking care

- 24.5% of enrollees reported checking how much they would have to pay for a doctor's visit, medication, or other health service before they received care in the past 12 months.

### Talking with doctor about treatment options and costs

- 19.1% of enrollees reported talking with a health care provider about how much health care services would cost them out-of-pocket.
- 21.3% of enrollees reported asking a provider to recommend a less costly prescription drug in the past 12 months.

### Aim 6: To understand why enrollees lose or drop HMP coverage and what, if any, source of health insurance coverage they subsequently obtain.

#### Expected duration of HMP enrollment

- Enrollees were asked how much longer they expected they would have insurance through HMP and most reported that they did not know (43.0%); 25.6% expected they would have insurance through HMP for more than 2 years, 12.5% said 1-2 years, 12.7% said 6 months to 1 year, and 6.3% said less than 6 months.
- Among those who expected they would continue having insurance through HMP for less than 2 years, the most common reasons why they expected their HMP insurance would end were expecting to get employer-sponsored insurance (37.8%) and expecting an income increase (22.8%).

### Conclusions and Recommendations

While many enrollees were employed at the time of the survey, many face barriers to consistent employment such as health problems, functional limitations, caregiving, poor literacy, low educational attainment, and housing instability. HMP itself appears to facilitate employment/employability.

*As the HMP community engagement requirement is implemented beginning in 2020, monitor and compare employment, health, and financial well-being for those who do and do not meet the requirement. Continue to follow the long-term impact of HMP on enrollees and their families.*

While three in four enrollees reported excellent, very good, or good health, two in three had at least one chronic condition. One in three enrollees said they had a chronic condition that was newly diagnosed since HMP enrollment. Since enrolling in HMP, most enrollees reported their physical health, mental health, and oral health had improved or stayed the same.

Most enrollees knew that HMP covers prescription medications, dental care, counseling for mental or emotional problems, eyeglasses, and birth control or family planning. Most did not know that HMP covers treatment for substance use and smoking cessation. Enrollees who reported needing help reading written materials were less likely to be aware of many covered benefits. Understanding of incentives for HRA completion remains low, as less than one in three knew they could get a reduction in the amount they have to pay if they complete a HRA. Most enrollees considered the amount they have to pay for HMP to be fair and affordable.

*Increase awareness of coverage for smoking cessation and treatment for substance use disorders, cost-sharing and financial incentives for healthy behaviors, with special attention/outreach to those who face challenges with mental health, literacy, or housing stability.*

Nearly half of enrollees were uninsured for all 12 months prior to HMP, and many enrollees experienced forgone medical and dental care prior to HMP, usually due to lack of insurance coverage. Forgone care was much lower and perceived access much better in the last 12 months, especially for those who were uninsured prior to enrollment. In the 12 months before enrolling in HMP, one in three reported problems paying medical bills, and two-thirds of those had been contacted by a collections agency. Filing for bankruptcy was more likely for those with chronic conditions.

Enrollees were more likely to report having a regular source of care (of any kind) in the last 12 months compared to before HMP enrollment, and they were less likely to report the ER as their regular source of care. Still, about one in three reported an ER visit in the last 12 months, of which one in five tried to contact their usual provider first. Besides the seriousness of their symptoms, other reasons for ER visits included proximity, a history of ER care-seeking, and the need for after-hours care so as not to miss work or school. ER use was associated with having a chronic medical or mental health condition and/or substance use disorder.

*Work with Medicaid health plans and the provider community to maintain or improve timely access to primary care appointments.*

Cohort II enrollees appear to have embraced the emphasis in HMP on primary care and health promotion. Most enrollees reported visiting their PCP, although this was less likely for those who had full-time employment and those who had experienced homelessness. Over half of enrollees reported getting dental care in the past year. Over two in five enrollees said they discussed the HRA with their doctor or someone at their doctor's office since they enrolled in HMP. Enrollees who reported that they discussed the HRA were more likely to report engaging in healthy behaviors, and more likely to receive preventive services.

*Continue the emphasis on prevention and health risk modification in HMP, which could have even greater impact over the long-term.*

## Introduction

---

The University of Michigan Institute for Healthcare Policy & Innovation (IHPI) is conducting the evaluation of the Healthy Michigan Plan (HMP) as required by the Centers for Medicare & Medicaid Services (CMS) through a contract with the Michigan Department of Health and Human Services (MDHHS). Domain IV of the evaluation includes a series of surveys called *Healthy Michigan Voices (HMV)*. This report presents findings from the 2018 *Healthy Michigan Voices Cohort II Survey*. Cohort II respondents were individuals who enrolled in HMP for the first time between January 2016 and January 2018. From January 2018 to January 2019, 2,602 individuals completed the 2018 HMV Cohort II Survey.

Previous HMV reports, including the Report on the 2016 HMV Enrollee Survey<sup>1</sup>, focused on the experiences of respondents in Cohort I of the survey who enrolled in HMP for the first time between April 2014 and November 2015. Enrollees in Cohort II were younger than those in Cohort I, more likely to be employed and/or a student, and more likely to have insurance for some or all of the 12 months prior to HMP enrollment. Given that later enrollees are different demographically and may have different experiences than earlier enrollees, the current report examines the characteristics and experiences of individuals who first enrolled in HMP multiple years after implementation of the program.

## Methods

---

### Sampling plan

Sampling for the 2018 HMV Cohort II Survey was performed monthly, from January 2018 to December 2018. At the time of sample selection, enrollees had to meet the following inclusion criteria:

- No HMP enrollment prior to January 2016
- At least 12 months total HMP enrollment in fee for service (FFS) or managed care (MC)
- HMP enrollment (FFS or MC) in 10 of past 12 months
- HMP-MC enrollment in 9 of past 12 months
- HMP-MC in the month sampled
- Age between 19 years and 64 years 8 months
- Complete address, phone number, and federal poverty level (FPL) fields in the Data Warehouse
- Michigan address
- Preferred language of English, Arabic, or Spanish

Eligibility was determined independently for each month's sample, regardless of eligibility in prior months. Enrollees could be selected only once. Data extraction was performed via a secure Virtual Private Network (VPN) connection by a data analyst with specific approval from MDHHS for this purpose, using existing protocols that require two layers of password protection. Each month's sample was drawn to reflect the target sampling plan, proportional to

---

<sup>1</sup> [2016 Healthy Michigan Voices Enrollee Survey Report](#)

the overall population of HMP enrollees. The sampling plan was based on a combination of four grouped prosperity regions in the state (Upper Peninsula/North West/North East; West/East Central/East; South Central/South West/South East; Detroit) and three FPL categories (0-35%; 36-99%; ≥100%), resulting in 12 strata. To ensure adequate statistical power, small strata were oversampled, with a target of at least 2,500 completed surveys. The table below shows the target proportion of each stratum in our monthly sample.

**Table 1. Target sampling rates by prosperity region and federal poverty level**

	Prosperity Region				
	UP/NW/NE	W/EC/E	SC/SW/SE	DET	Total
<b>Federal Poverty Level</b>					
0-35%	7.0%	12.0%	8.0%	12.8%	39.9%
36-99%	6.0%	10.5%	7.0%	11.2%	34.8%
≥100%	4.9%	7.5%	5.0%	8.0%	25.5%
Total	17.9%	30.0%	20.0%	32.0%	100.0%

The 2,602 respondents with complete survey data closely mirror the sampling plan:

**Table 2. Characteristics of the 2,602 HMP Cohort II respondents**

	Prosperity Region				
	UP/NW/NE	W/EC/E	SC/SW/SE	DET	Total
<b>Federal Poverty Level</b>					
0-35%	198	287	186	289	960
	7.6%	11.0%	7.2%	11.1%	36.9%
36-99%	166	285	194	302	947
	6.4%	11.0%	7.5%	11.6%	36.4%
≥100%	154	198	143	200	695
	5.9%	7.6%	5.5%	7.7%	26.7%
Total N complete	518	770	523	791	2,602
Total % complete	19.9%	29.6%	20.1%	30.4%	100.0%

## Survey administration

HMP enrollees selected for the 2018 HMP Cohort II enrollee survey sample were mailed an introductory packet that contained a letter explaining the survey, a brochure about the project, and a postage-paid postcard that could be used to indicate a preferred time/day for interview or refusal to participate. The letter provided a toll-free number and email address for enrollees who wished to indicate a preferred time/day for interview or refusal to participate. For introductory packets returned as undeliverable, the MDHHS Data Warehouse was queried for updated address information. For all sampled enrollees who did not refuse using postcard or email response, *Healthy Michigan Voices* interviewers placed phone calls to sampled enrollees between the hours of 9 am and 9 pm. Surveys were conducted in English, Arabic and Spanish; enrollees who could not speak one of those languages were ineligible for the survey. Responses were recorded using computer-assisted telephone interviewing software.

At the outset of the survey, enrollees were informed that their individual responses would be kept confidential; only aggregate data would be reported. They were also informed that completing the survey was voluntary and that they could skip questions if they wished. Enrollees were asked for permission to record the interview for quality assurance purposes; nearly all (2,549 of 2,602 respondents) agreed to be recorded. Those who completed the survey were mailed a \$25 gift card to compensate them for their time and phone minutes devoted to completing the survey. The amount of time to complete the survey ranged from 14 to 82 minutes (median duration 23 minutes).

## Survey design

The survey included established measures of demographics, health, access to care, and insurance status drawn from national surveys, including the National Health and Nutrition Exam Survey (NHANES),<sup>2</sup> the Health Tracking Household Survey (HTHS),<sup>3</sup> the National Health Interview Survey (NHIS),<sup>4</sup> the Behavioral Risk Factor Surveillance System (BRFSS<sup>5</sup> and MiBRFSS<sup>6</sup>), the Short Form Health Survey (SF-12),<sup>7</sup> the Food Attitudes and Behaviors Survey,<sup>8</sup> the Consumer Assessment of Healthcare Providers and Systems (CAHPS),<sup>9</sup> the Employee Benefit Research Institute Consumer Engagement in Healthcare Survey (CEHCS),<sup>10</sup> the Commonwealth Fund Health Care Quality Survey,<sup>11</sup> and the U.S. Census. Items and scales for which established measures were not available, or which were specific to HMP (e.g., items about Health Risk Assessments, understanding of HMP), were drawn from 2016 and 2017 HMV surveys.<sup>12, 13, 14</sup>

## Survey response characteristics

Overall, 8,350 HMP enrollees were sampled throughout the data collection period and contact was attempted for a telephone interview. We summarize the call results to sampled individuals briefly as follows:

---

<sup>2</sup> [NHANES \(National Health and Nutrition Exam Survey, CDC\)](#)

<sup>3</sup> [HTHS \(Health Tracking Household Survey\)](#)

<sup>4</sup> [NHIS \(National Health Interview Survey, CDC\)](#)

<sup>5</sup> [BRFSS \(Behavioral Risk Factor Surveillance System, CDC\)](#)

<sup>6</sup> [MiBRFSS \(Michigan Behavioral Risk Factor Surveillance System, MDHHS\)](#)

<sup>7</sup> [SF-12 \(Short Form Health Survey, RAND\)](#)

<sup>8</sup> [FAB \(Food Attitudes and Behaviors Survey, NCI\)](#)

<sup>9</sup> [CAHPS \(Consumer Assessment of Healthcare Providers and Systems\)](#)

<sup>10</sup> [Consumer Engagement in Health Care Survey \(EBRI: CEHCS\)](#)

<sup>11</sup> [Commonwealth Fund Health Care Quality Survey](#)

<sup>12</sup> [2016 Healthy Michigan Voices Enrollee Survey Report](#)

<sup>13</sup> [2017 Healthy Michigan Voices New Enrollee Survey Report](#)

<sup>14</sup> [2017 Healthy Michigan Voices Follow-Up Survey Report](#)

**Table 3. Call results to sampled individuals**

Description	n	Call Result
<b>Total sample</b>	8,350	
<b>Contact never established</b>		
1) Phone number not working	640	Nonworking number
2) Working but no contact made (e.g., left voicemail but never spoke with a person)	1,929	Unknown eligibility (UN)
<b>Contact established</b>		
3) Wrong number	483	Ineligible
4) Out of state, Deceased, Non-HMV language, Jail/Treatment facility	806	Ineligible
5) Refusal (by mail/phone)	769	Refusal (R)
6) Noncontact with enrollee (Spoke with person other than enrollee); Other nonresponse (Spoke with enrollee who did not complete the survey for reasons other than clear refusal)	1,090	Noncontact (NC), Other (O)
7) Full completion	2,602	Interview (I)
8) Partial completion	31	Partial Interview (P)

There are many ways to calculate response rates as outlined by the American Association for Public Opinion Research (AAPOR, 2016<sup>15</sup>). Response rate formula 3 defined below is one of the common formulas used, particularly for telephone surveys.

$$RR3 = \frac{I}{(I + P) + (R + NC + O) + e \times UN}$$

where  $e$  is an estimate eligibility rate for the cases for which we cannot ascertain eligibility and the rest are noted as “UN” in Table 1. One way to estimate  $e$  is to use our call results among those we established contacts. Categories 3) and 4) in Table 1 are deemed ineligible, making 5) through 8) eligible among all contacted. Hence,

$$e = \frac{769 + 1090 + 2602 + 31}{8350 - (483 + 806)} = 77.7(\%)$$

This means that the observed eligibility rate was 90.6% among the cases where we were able to ascertain eligibility. By applying  $e$  as estimated above, we obtain the following response rate:

$$RR3 = \frac{2602}{(2602 + 31) + (769 + 1090) + .777 \times 1929} = 43.4(\%)$$

<sup>15</sup> The American Association for Public Opinion Research. 2016. Standard Definitions: Final Dispositions of Case Codes and Outcome Rates for Surveys. 9th edition. AAPOR. Access from [http://www.aapor.org/AAPOR\\_Main/media/publications/Standard-Definitions20169theditionfinal.pdf](http://www.aapor.org/AAPOR_Main/media/publications/Standard-Definitions20169theditionfinal.pdf)

The weighted response rate was calculated to ascertain the response rate that is not subject to the sample design. We used the selection weight ( $w_1$  described shortly) to the RR3 formula and used weights applicable for known eligibility cases ( $w_3$  described shortly) to  $e$ , the estimated eligibility rate. The results are as follows:

$$\begin{aligned} \text{weighted } e &= 76.4(\%) \\ \text{Weighted RR3} &= 42.9(\%) \end{aligned}$$

Thus, the weighted response rate for the 2018 *Healthy Michigan Voices* Cohort II survey was 42.9%.

In order to assess potential nonresponse bias, respondents (result code, "I", in Table 3) are compared to those who refused ("R"), were not contacted ("NC"), did not complete for other reasons ("O") or completed partially ("P") in Table 4 on age, gender, race/ethnicity, first month on HMP, income level and prosperity region from the Data Warehouse claims data. Technically speaking, nonrespondents include all eligible cases that did not participate ("R", "NC", "O" and "P") and a portion ("e") of unknown eligibility cases ("UN"). However, it is not possible to tease out the portion of unknown eligibility cases, so we considered those who did not participate as a proxy for nonrespondents and compare them to respondents. Further, in order to compensate for differential selection probabilities, nonworking telephone rates and ineligibility rates, this comparison used estimates weighted by  $w_4$ .

Overall, respondents and nonrespondents were not different with respect to race/ethnicity and the first month enrolled in HMP. However, nonrespondents were younger, more likely to be male, more likely to have income 0-35% of FPL, and more likely to be from the Detroit Metro area, compared to respondents.

**Table 4. Comparison of characteristics of survey respondents and nonrespondents, unweighted**

Characteristics	Respondents N=2,602 (%)	Nonrespondents N=1,890 (%)	p value
<b>Age</b>			
19-34	39.1	51.0	<0.001
35-50	26.2	24.8	
51-64	34.7	24.2	
<b>Gender</b>			
Female	56.8	42.8	<0.001
Male	43.2	57.2	
<b>Race/Ethnicity</b>			
Hispanic	4.2	3.4	0.152
Non-Hispanic White	62.1	61.2	
Non-Hispanic Black	22.1	21.5	
Non-Hispanic Other	11.6	14.0	

*Continued on next page...*

Continued from previous page...

<b>First month on HMP</b>			
January-June 2016	38.1	36.7	0.448
July-December 2016	28.2	30.1	
January or later 2017	33.6	33.2	
<b>Income (% FPL)</b>			
0-35% FPL	52.8	57.0	0.016
36-99% FPL	27.8	25.1	
100-133% FPL	19.4	18.0	
<b>Prosperity Region</b>

Central Michigan	28.3	25.4	
Southern Michigan	20.7	18.7	
Detroit Metro	41.1	48.0	

## Weighting adjustment

Weights were calculated to adjust for the probability of selection (see Base Selection Weight), nonresponse bias (see Nonresponse Adjustment) and other adjustments (Nonworking Number adjustment, Unknown Eligibility adjustment, Known Eligibility adjustment). See Appendix D for more detail.

## Analyses

We generated descriptive statistics for responses to all questions in the survey, and present the weighted percentages or means with 95% confidence intervals (CIs) in Appendix A. Weights were applied to the data to adjust for the probability of selection, nonresponse bias, and other adjustments (see Appendix D). The proportions included in this report reflect how the results we observed would apply to the eligible population of individuals who first enrolled in HMP January 2016 through January 2018 and who maintained HMP enrollment for at least 10 months in the year after initial enrollment. The number of individuals who responded to each survey question is noted in the tables in Appendix A. When N is less than 2,602, either some respondents missed that question or the question was part of a skip pattern and was therefore only asked of a subset of respondents based on their previous responses; don't know responses were treated as non-response if they accounted for less than 2% of the total responses to that question. Respondents who answered "not applicable" to survey questions were excluded from bivariate and multivariate analyses.

Additional characteristics were drawn from the state Data Warehouse for inclusion in bivariate and multivariate analyses:

- Demographic characteristics were drawn from Medicaid enrollment files at the time of sampling, and included age, gender, income level (% of FPL), and region.
- Health-related characteristics were generated from Medicaid administrative claims, extracted in April 2019, and represent two 12-month periods: Period 1 corresponds to 0-12 months prior to the month of sample selection, while Period 2 corresponds to the 13-24

months prior to sample selection. Analyses involving these variables combine data from both periods unless otherwise noted. Health-related variables derived from claims included evidence of eight chronic conditions (asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, and stroke), defined as  $\geq 1$  Medicaid claim with a diagnosis for that condition in the 24 months prior to survey sampling. Similar variables were created for evidence of a mental health condition and/or substance use disorder, defined as  $\geq 1$  Medicaid claim with a diagnosis of a mental health condition or substance use disorder in the 24 months prior to survey sampling.

- Claims-based utilization variables reflect the presence of claims for emergency department (ED) visits, inpatient stays, primary care visits, receipt of specific preventive services (e.g., cancer screening, vaccinations), tobacco cessation assistance, dental visits, and chronic disease care (e.g., statins for individuals with cardiovascular disease).
- Health Risk Assessment (HRA) completion was drawn from the HRA table in the Data Warehouse, differentiated for those who did vs. did not have a physician attestation.

A comparison of chronic conditions reported during the survey and those identified in Medicaid claims shows that 43% of respondents (unweighted) were identified as having a chronic condition both by self-report and from claims data, while another 20% had either a claim or self-reported a chronic health condition.

	Any claims for chronic condition*	No claims for chronic condition
Any self-reported chronic condition*	1,117 (42.9%)	269 (10.3%)
No self-reported chronic condition	258 (9.9%)	958 (36.8%)

\*Includes asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, and stroke

Similarly, a comparison of mental health conditions and substance use disorders reported during the survey and those identified in Medicaid claims shows that 28% of respondents (unweighted) were identified both by self-report and claims as having a mental health condition or a substance use disorder, while 18% had only a claim, and 6% had only a self-reported condition.

	Any claims for mental health condition or substance use disorder	No claims for mental health condition or substance use disorder
Any self-reported mental health condition or substance use disorder	730 (28.1%)	145 (5.6%)
No self-reported mental health condition or substance use disorder	470 (18.1%)	1,257 (48.3%)

All analyses involving chronic conditions and mental health conditions are a composite of conditions reported in the survey and/or found in Medicaid claims. This may overestimate the proportion of respondents with chronic conditions, however using survey or claims alone would fail to identify some respondents with chronic conditions. Mental health conditions and substance use disorders were also identified by either survey self-report or presence of at least one Medicaid claim with a diagnosis fitting those conditions.

The full complement of survey questions and their bivariate associations are presented in Appendix A. Additional analyses were conducted to test for relationships or differences between selected variables and groups of interest, including analyses using claims data (see Appendix B). For all analyses of bivariate and multivariate relationships, the types of analysis, models, and specific tests are described in the table footnotes.

Appendix C provides definitions for all variables derived from Medicaid administrative data, as well as composite variables based on survey responses.

## Results

---

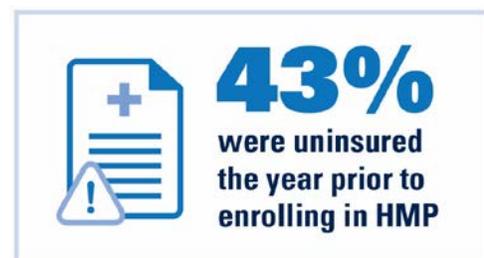

This section includes key findings from descriptive and multivariate analyses. Many results are not reported in text; see Appendix A and B for detailed tables presenting results from all analyses.

### Enrollee characteristics

#### Demographics

Nearly one in five enrollees (18.8%) had incomes 100-133% FPL, while more than half (54.6%) had incomes between 0-35% FPL (Appendix A Table 0.1). About half of enrollees (49.2%) were women (Appendix A Table 0.1). Few enrollees (7.1%) had lived four or more places in the past 3 years (housing instability) and 8.0% had been homeless in the last 12 months (Appendix A Table 0.1). The majority of enrollees (90.5%) had at least a high school diploma or equivalent (Appendix A Table 0.1). About one in six enrollees (16.3%) sometimes, often, or always needed help reading instructions, pamphlets, or other written material from a doctor, pharmacy or health plan (Appendix A Table 0.1).

Close to half of enrollees (43.4%) were uninsured for all 12 months prior to HMP enrollment (Appendix A Table 0.20). Being uninsured for all 12 months prior to HMP enrollment was more common among enrollees age 36-49 or age 50-64 compared to those age 19-35, among men compared to women, and among those with an income 0-35% FPL compared to those with higher incomes (Appendix A Table 0.20). Among those who reported having health insurance at any time in the 12 months prior to HMP enrollment, the most commonly reported types of

insurance\* were Medicaid/MiChild/ or other state program (40.4%), insurance provided through a job or union (38.3%), and insurance purchased by themselves or someone else (14.7%) (Appendix A Table 0.20.1). Among those who reported insurance purchased by themselves or someone else, 44.7% purchased the insurance on the HealthCare.gov website (Appendix A Table 0.20.1.2.1). Among those who purchased the insurance on the HealthCare.gov website, 66.1% reported receiving a subsidy (Appendix A Table 0.20.1.2.2).

One in four enrollees (26.9%) spent time caring for a person who could not care for themselves due to illness or disability in the past 12 months (Appendix A Table 0.9).

One in five enrollees (20.0%) were students (Appendix A Table 0.6). Enrollees who were employed were more likely than those who were not (22.8% vs. 16.4%) and those with excellent, very good, or good health status were more likely than those who had fair or poor health status (23.9% vs. 7.9%) to be students (Appendix B Table 0.3.1).

Being a student was less common among enrollees age 36-49 or age 50-64 compared to those age 19-35, among those with an income 100-133% FPL compared to those with an income 0-35% FPL, among those who experienced homelessness in the last 12 months compared to those who did not, and among those with a substance use disorder or both a mental health condition and a substance use disorder compared to those without these conditions (Appendix B Table 0.3.6).

## Employment

Over half of enrollees (55.8%) were employed or self-employed (Appendix A Table 0.7). Those with a chronic condition (as defined above in the Methods section) were less likely than those without to be employed (49.1% vs. 65.8%) (Appendix A Table 0.7). Those with a mental health condition or both a mental health condition and a substance use disorder (as defined above in the Methods section) were less likely than those without these conditions to be employed (52.2% and 44.8%, respectively, vs. 61.2%) (Appendix A Table 0.7). Those age 50-64 were less likely than younger age groups to be employed, and more likely, if they were working, to be working part-time (Appendix A Tables 0.7-0.7.1).

Those who experienced homelessness in the last 12 months were less likely than those who did not to be employed (44.5% vs. 56.7%) (Appendix B Table 0.4.1). Employment was more common among enrollees who were caregivers compared to those who were not (60.6% vs. 54.0%) and among those with excellent, very good, or good health status compared to those with fair or poor health status (62.5% vs. 34.9%) (Appendix B Table 0.4.1).

---

\*Respondents were able to provide multiple responses to the survey question.

About one in three employed enrollees (29.7%) reported changing jobs in the last 12 months (Appendix A Table 0.7.2). Those age 19-35 were more likely than those age 36-49 or age 50-64 to report changing jobs in the last 12 months (35.9% vs. 21.3% and 19.2%, respectively) (Appendix A Table 0.7.2).

Enrollees who were not employed most often reported being out of work (35.4%) or unable to work (33.1%); fewer reported being retired (9.3%), or not looking for work at this time (22.3%) (Appendix A Table 0.7.3). Women were less likely than men to report being out of work (26.5% vs. 43.7%) and more likely to report not looking for work at this time (32.1% vs. 13.0%) (Appendix A Table 0.7.3). Those age 36-49 or age 50-64 were more likely than those age 19-35 to report being unable to work (Appendix A Table 0.7.3). Those with a chronic condition were more likely than those without to report being unable to work (45.1% vs. 6.1%) or retired (11.3% vs. 4.6%) and less likely to report being out of work (30.0% vs. 47.5%) or not looking for work (13.6% vs. 41.8%) (Appendix A Table 0.7.3). Enrollees with a mental health condition and those with both a mental health condition and a substance use disorder were more likely than those without these conditions to report being unable to work (Appendix A Table 0.7.3).

About half of enrollees out of work had been out of work for less than a year (48.2%), while most of those who reported being unable to work had been unable to work for one year or more (81.8%) (Appendix A Tables 0.7.3.1, 0.7.3.2). Most who reported being unable to work said that was due to poor health (65.2%) or disability (30.5%) (Appendix A Table 0.7.3.2.1).

Among enrollees who were employed and had not changed jobs in the last 12 months, 85.6% indicated that HMP gave them insurance when they could not get insurance through their job (Appendix A Table 0.10).

Among enrollees in school, employed with a job change in the last 12 months, or not looking for work at this time, 87.0% reported that having HMP helped them stay insured between jobs or between school and a job (Appendix A Table 0.12).

### **Perspectives on the impact of HMP on employment-related outcomes**

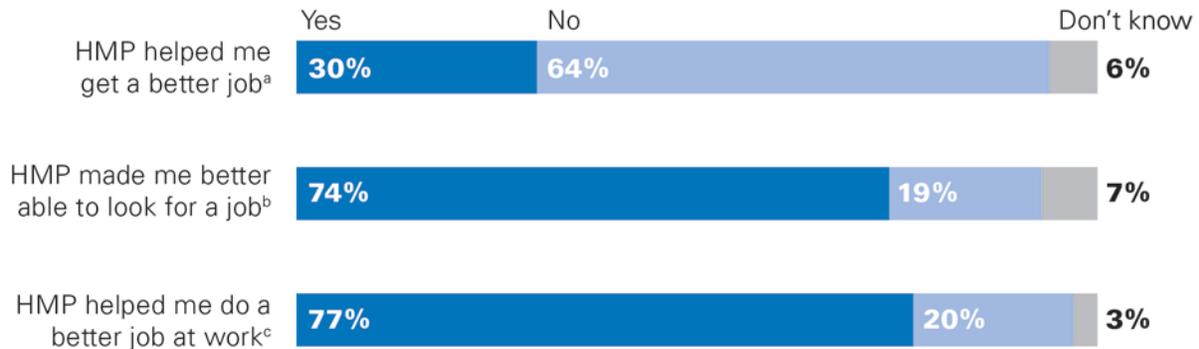

Enrollees reported that HMP had a positive impact on their employment and job seeking ability:

- Among those who were employed, 76.6% reported that getting health insurance through HMP helped them do a better job at work (Appendix A Table 0.14). Enrollees who were non-Hispanic Black were less likely than other groups to report this (Appendix A Table 0.14). Enrollees who were caregivers were more likely than those who were not caregivers to report this (Appendix B Table 0.5.1). Enrollees who reported their physical health or mental health had gotten better since enrolling in HMP, and those who had a claim for an eye visit, were more likely to report that getting health insurance through HMP helped them do a better job at work (Appendix B Table 0.5.3).
- Among those who were employed and changed jobs in the last 12 months, 29.6% reported that having health insurance through HMP helped them get a better job (Appendix A Table 0.16). Enrollees who reported their physical health had gotten better since enrolling

in HMP were more likely than those without health improvement to report this (Appendix B Table 0.6.3).

- Among those who were out of work, 74.2% reported that having health insurance through HMP has made them better able to look for a job (Appendix A Table 0.18). Enrollees who reported their physical health had gotten better since enrolling in HMP were more likely than those without health improvement to report this (Appendix B Table 0.7.3).

Enrollees reported that HMP had a **positive impact on their employment and job seeking ability.**

Notes: <sup>a</sup>Among those who were employed/self-employed who changed jobs in the last 12 months; <sup>b</sup>Among those who were out of work; <sup>c</sup>Among those who were employed/self-employed

## Caregiving and employment

Enrollees who were caregivers and employed or out of work, unable to work, or retired for less than one year reported the following as a result of caring for a person who could not care for themselves due to illness or disability:

- 37.3% went from working full-time to part-time or cut back their hours (Appendix A Table 0.9.1).
- 18.0% received a warning about their performance or attendance at work (Appendix A Table 0.9.2).
- 8.3% lost their job benefits (Appendix A Table 0.9.3).
- 22.4% took a leave of absence from work; caregivers who were men were more likely than women to report taking a leave of absence from work (29.6% vs. 16.6%) (Appendix A Table 0.9.4).
- 12.7% gave up working entirely; caregivers with an income 0-35% FPL were more likely than those with an income 100-133% FPL to give up working (Appendix A Table 0.9.5).

**Aim 1: To describe changes over time in health and functional status for HMP enrollees, particularly those with chronic conditions or other indicators of poorer health.**

## **Current health status**

Three in four enrollees (75.7%) reported that their health was excellent, very good, or good; 19.1% reported that their health was fair, and 5.2% reported that their health was poor (Appendix A Table 1.1). Self-reported fair or poor health was more common among those age 36-49 (aOR=2.36) or age 50-64 (aOR=2.60) compared to those age 19-35, among enrollees who were non-Hispanic Black compared to those who were non-Hispanic White (aOR=1.72), and among those with a mental health condition (aOR=2.05) or both a mental health condition and a substance use disorder (aOR=4.20) compared to those without these conditions (Appendix B Table 1.1.2).

## **Number of days physical health not good**

On average, enrollees reported 6.2 days in the past 30 days that their physical health was not good (Appendix A Table 1.2). Enrollees who reported forgone health care in the last 12 months reported more days in the past 30 days that their physical health was not good, compared to those who did not report forgone health care (11.3 vs. 5.7) (Appendix B Table 1.2.1). Enrollees who were unable to work reported the greatest mean number of days in the past 30 days that their physical health was not good, compared to those who were employed, out of work, retired, or not looking for work (Appendix B Table 1.2.2).

## **Number of days mental health not good**

On average, enrollees reported 5.9 days in the past 30 days that their mental health was not good (Appendix A Table 1.4). Enrollees with an income 0-35% FPL reported more days in the past 30 days that their mental health was not good compared to those with an income 100-133% FPL (7.1 vs. 4.2), as did enrollees who experienced homelessness in the last 12 months compared to those who did not (10.0 vs. 5.5) (Appendix A Table 1.4, Appendix B Table 1.4.1). Enrollees who reported forgone health care in the last 12 months reported more days in the past 30 days that their mental health was not good, compared to those who did not report forgone health care (10.4 vs. 5.5) (Appendix B Table 1.4.1). Enrollees who were unable to work reported the greatest mean number of days in the past 30 days that their mental health was not good, compared to those who were employed, out of work, retired, or not looking for work (Appendix B Table 1.4.2).

## **Number of days poor physical or mental health limited usual activities**

On average, enrollees reported 5.0 days in the past 30 days that poor physical or mental health kept them from doing their usual activities (Appendix A Table 1.6). Those with an income 0-35% FPL reported more such days than those with incomes 36-99% FPL or 100-133% FPL (6.2 vs. 3.7 and 3.0, respectively) (Appendix A Table 1.6).

## **Number of days missed work due to illness or injury**

Employed enrollees reported a mean number of 6.6 days they missed work due to illness or injury in the past 12 months (Appendix A Table 1.7). Mean number of days in the past 12

months of missed work due to illness or injury was greater for those with a chronic condition compared to those without (8.4 vs. 4.7) and for enrollees with a mental health condition or both a mental health condition and a substance abuse disorder compared to those without these conditions (9.3 and 11.8, respectively vs. 4.3) (Appendix A Table 1.7).

### Chronic health conditions

More than two in three enrollees (67.5%) reported having at least one chronic condition (Appendix A Table 1.12.2). The most commonly reported chronic conditions\* were mood disorder (32.0%), hypertension (25.5%), and arthritis or a related condition (20.1%); fewer enrollees reported having asthma (16.0%), diabetes (8.8%), or a heart condition or heart disease (8.5%) (Appendix A Table 1.12.1).

Nearly one in three enrollees (29.8%) reported they had a chronic condition that was newly diagnosed since enrolling in HMP (Appendix A Table 1.12.3). More than half of those who reported that their physical health got worse since HMP enrollment (55.0%), reported a new diagnosis since enrollment (Appendix B Table 1.8.1). Reporting a new diagnosis since enrollment was more common among enrollees age 50-64 compared to those age 19-35 (aOR=1.83), among those who reported seeing their primary care provider (PCP) in the past 12 months compared to those who did not (aOR=2.29), and among those who reported an emergency room (ER) visit in the past 12 months compared to those who did not (aOR=1.47) (Appendix B Table 1.8.3). Reporting a new diagnosis since enrollment was less common among enrollees who were insured some or all 12 months prior to HMP enrollment compared to those who were uninsured all 12 months (aOR=0.54) and among women compared to men (aOR=0.72) (Appendix B Table 1.8.3).

### Self-reported change in health

Since enrolling in HMP, most enrollees reported their physical health had improved (48.0%) or stayed the same (46.2%), their mental health had improved (35.2%) or stayed the same (59.4%), and their oral health had improved (34.7%) or stayed the same (54.8%) (Appendix A Tables 1.3, 1.5, 1.8).

\*Respondents were able to provide multiple responses to the survey question.

Enrollees were more likely to report their physical health status got better since enrolling in HMP if they were uninsured all 12 months prior to HMP, reported a PCP visit in the last 12 months, reported improved ability to get any type of care, or reported forgoing health care in the 12 months prior to HMP but not in the last 12 months while they were on HMP (Appendix B Table 1.3.3). Enrollees from the S Central/SW/SE (aOR=1.49) region were more likely than those in the UP/NW/NE region to report their physical health status got better since HMP enrollment (Appendix B Table 1.3.3).

Enrollees were more likely to report their mental health status got better since enrolling in HMP if they reported forgoing health care in the 12 months prior to HMP but not in the last 12 months while they were on HMP (aOR=1.80) or if they reported improved ability to get any type of care (aOR=2.11) (Appendix B Table 1.5.3). Enrollees with a mental health condition were twice as likely to report that their mental health status got better since enrolling in HMP compared to those without a mental health condition or substance use disorder (aOR=2.03) (Appendix B Table 1.5.3).

Enrollees were more likely to report their oral health status got better since enrolling in HMP if they reported forgoing dental care in the 12 months prior to HMP but not in the last 12 months while they were on HMP (aOR=3.66), reported improved ability to get any type of care (aOR=3.29), had a preventive dental visit (aOR=2.35), and if they had any other dental visit (aOR=3.15) (Appendix B Table 1.6.3).

## **Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.**

### **Knowledge of HMP covered benefits**

The majority of enrollees knew that HMP covers prescription medications (92.6%), dental care (77.8%), counseling for mental or emotional problems (58.0%), eyeglasses (56.4%), and birth control or family planning (56.4%) (Appendix A Tables 2.1-2.3, 2.5, 2.6). Less than half knew that HMP covers substance use treatment (41.9%) and treatment to stop smoking (35.3%) (Appendix A Tables 2.4, 2.7). Women were more likely than men to know that HMP covers eyeglasses, prescription medications, and birth control or family planning (Appendix A Tables 2.1, 2.2, 2.5).

Enrollees who sometimes, often, or always need help reading written materials were less likely to know that HMP covers prescription medications (89.5% vs. 93.2%; aOR=0.58), treatment to stop smoking (27.2% vs. 36.8%; aOR=0.60), birth control/family planning (46.4% vs. 58.3%; aOR=0.72), and substance use treatment (33.3% vs. 43.6%; aOR=0.60), compared to enrollees who never or rarely need help reading written materials (Appendix B Tables 2.2.1-2.7.2).

There are gaps in enrollees' **knowledge of some HMP covered benefits.**

	Covered	Don't know	Not covered
treatment to stop smoking	35%	57%	7%
substance use treatment	42%	54%	4%
birth control or family planning	56%	40%	3%
counseling for mental or emotional problems	58%	39%	3%
eyeglasses	56%	35%	9%
routine dental care	78%	16%	6%
prescription medications	93%	6%	2%

Note: Percentages may not add to 100 due to rounding

### Experiences with MI Health Account

More than half of enrollees (60.6%) recalled receiving a MI Health Account statement in the past year (Appendix A Table 2.12). Compared to those age 19-35, reporting receipt of a MI Health Account statement was more common among enrollees age 36-49 (68.7% vs. 49.9%, aOR=2.25) or 50-64 (75.0% vs. 49.9%, aOR=2.94). Enrollees with an income 100-133% FPL were more likely to recall receiving a MI Health Account statement than those with an income 0-35% FPL (68.3% vs. 58.0%, aOR=1.57), as were those with a bachelor's or post-graduate degree (69.0% vs. 56.2%, aOR=1.65), or an associate's degree or some college (63.3% vs. 56.2%, aOR=1.43), compared to those whose highest level of education was high school or less (Appendix A Table 2.12, Appendix B Tables 2.11.1, 2.11.2).

Among enrollees who recalled receiving a MI Health Account statement in the past year, 81.1% strongly agreed or agreed that they carefully review each statement to see how much they owe (Appendix A Table 2.12.1). Careful review of each MI Health Account statement was more common among enrollees with excellent, very good, or good health status compared to those with fair or poor health status (82.9% vs. 75.8%, aOR=1.82), among enrollees age 50-64 compared to those age 19-35 (86.7% vs. 77.8%, aOR=2.20), and among women compared to men (24.4% vs. 18.3%, aOR=1.55) (Appendix A Table 2.12.1, Appendix B Tables 2.12.1, 2.12.2).

The majority of enrollees (82.0%) who recalled receiving a MI Health Account statement in the past year strongly agreed or agreed that the statements help them be more aware of the cost of health care (Appendix A Table 2.12.2). Agreeing or strongly agreeing that MI Health Account statements helped them be aware of health care costs was less common among people who had been insured for some or all of the 12 months before HMP enrollment compared to those who

had been uninsured for the 12 months before HMP (79.2% vs. 85.7%, aOR=0.66) and among those with a bachelor's or post-graduate degree compared to those whose highest level of education was high school or less (76.4% vs. 86.0%, aOR=0.63) (Appendix B Tables 2.13.1, 2.13.3).

One in three enrollees (33.0%) who recalled receiving a MI Health Account statement in the past year strongly agreed or agreed that the information in the statement led them to change some of their health care decisions (Appendix A Table 2.12.3). Agreeing or strongly agreeing that MI Health Account statements led them to change health care decisions was more common among enrollees who sometimes, often, or always need help reading written materials compared to those who never or rarely need help reading written materials (46.8% vs. 30.5%, aOR=1.78) and among enrollees who were non-Hispanic Black compared to those who were non-Hispanic White (41.9% vs. 30.6%, aOR=1.68), and less common among enrollees with a bachelor's or post-graduate degree compared to those whose highest level of education was high school or less (15.0% vs. 39.5%, aOR=0.33) (Appendix A Table 2.12.3, Appendix B Tables 2.14.1, 2.14.3).

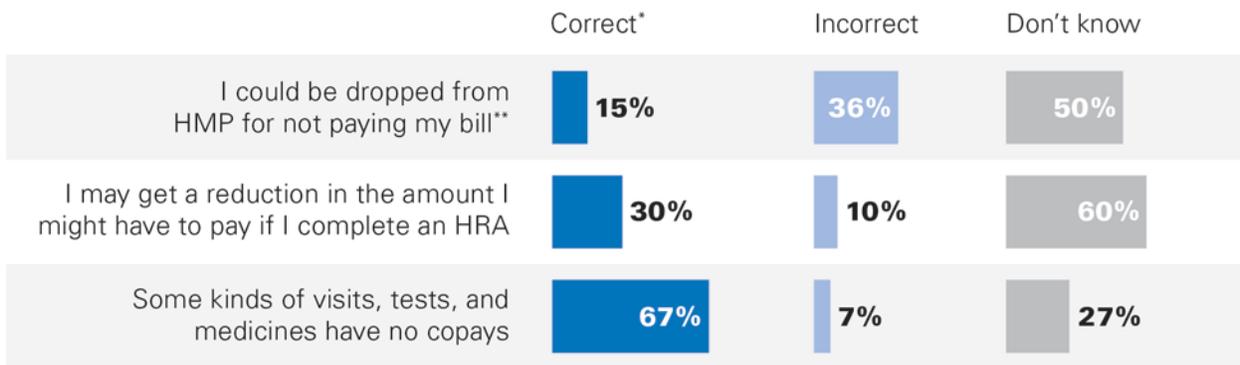

### **Knowledge of HMP cost-sharing requirements and healthy behavior rewards**

Less than half of enrollees (43.1%) were aware that there is a limit or maximum on the amount they might have to pay each year for HMP (Appendix A Table 2.15).

Less than one in three enrollees (29.9%) said they knew they could get a reduction in the amount they have to pay if they complete a health risk assessment, while 60.0% said they did not know (Appendix A Table 2.9). Awareness of getting a payment reduction for completing the HRA was greater among those who recalled receiving a MI Health Account statement in the past year compared to those who did not (34.7% vs. 22.6%, aOR=1.66) and among those who discussed the HRA with a provider since they enrolled in HMP compared to those who did not (35.5% vs. 25.6%, aOR=1.60) (Appendix B Tables 2.9.1, 2.9.2). Awareness of getting a payment reduction for completing the HRA was greater among men compared to women (33.3% vs. 26.3%), among those from the UP/NW/NE region compared to other regions, among those with an income 100-133% FPL compared to those with an income 0-35% FPL (37.7% vs. 27.8%, aOR=1.56), and among those with a bachelor's or post-graduate degree compared to those whose highest level of education was high school or less (39.0% vs. 28.6%, aOR=1.50) (Appendix A Table 2.9, Appendix B Tables 2.9.1, 2.9.2).

Two in three enrollees (66.5%) were aware that some kinds of visits, tests, and medicines have no copays (Appendix A Table 2.10). Awareness that some visits, tests, and medicines have no copays was higher among enrollees who recalled receiving a MI Health Account statement in the past year compared to those who did not (75.9% vs. 52.3%, aOR=2.34), among enrollees with a mental health condition compared to those without a mental health condition or substance use disorder (73.6% vs. 61.6%, aOR=1.44), and among those with a bachelor's or post-graduate degree (76.7% vs. 61.5%, aOR=1.89) or an associate's degree or some college (69.6% vs. 61.5%, aOR=1.42) compared to those whose highest level of education was high school or less (Appendix A Table 2.10, Appendix B Tables 2.10.1, 2.10.2).

Enrollees were unaware of some **HMP cost-sharing policies**.

Notes: \*Percent of enrollees who reported the correct answer; \*\*Statement is untrue, so those who responded "yes" were considered incorrect; Percentages may not add to 100 due to rounding

More than one in three enrollees (35.6%) erroneously thought they could be disenrolled from HMP for not paying their bill and half (49.7%) were unsure (Appendix A Table 2.8). Those with an income 100-133% FPL were more likely than those with an income 0-35% FPL to believe they could be disenrolled for this reason (Appendix A Table 2.8).

There was no association between overall knowledge of HMP covered benefits and costs and forgone health care in the last 12 months (Appendix B Table 2.17).

### Perspectives on cost-sharing

The majority of enrollees strongly agreed or agreed that the amount they have to pay for HMP overall seems fair (84.8%) and the amount they pay for HMP is affordable (87.1%) (Appendix A Tables 2.13, 2.14).

Agreement that the amount they have to pay for HMP seems fair was more common among enrollees whose health status was excellent, very good, or good compared to those whose health status was fair or poor (85.8% vs. 81.6%, aOR=1.81) and among those who carefully review their MI Health Account statements compared to those who do not (92.7% vs. 79.1%, aOR=3.34); and less common among enrollees with an income 100-133% FPL compared to those with an income 0-35% FPL (78.9% vs. 86.9%, aOR=0.39) (Appendix A Table 2.13, Appendix B Tables 2.15.1, 2.15.3).

Agreement that the amount they have to pay for HMP is affordable was more common among enrollees who carefully review their MI Health Account statements compared to those who do not (94.3% vs. 80.6%, aOR=4.24), and among enrollees with a bachelor's or post-graduate degree (91.7% vs. 84.7%, aOR=2.32) or an associate's degree or some college (88.5% vs. 84.7%, aOR=2.39) compared to those whose highest level of education was high school or less; and less common among enrollees with an income 100-133% FPL compared to those with an income 0-35% FPL (82.6% vs. 88.0%, aOR=0.44) (Appendix A Table 2.14, Appendix B Tables 2.16.1, 2.16.3).

The majority of enrollees (86.0%) strongly agreed or agreed that getting discounts on copays and premiums as a reward for working on improving your health is a good idea (Appendix A Table 2.28). Less than half of enrollees (41.9%) strongly agreed or agreed that everyone should have to pay something for their health care (Appendix A Table 2.29).

### **Perspectives on HMP coverage**

The majority of enrollees (97.4%) strongly agreed or agreed that it is very important for them personally to have health insurance (Appendix A Table 2.27). Most enrollees strongly agreed or agreed that having HMP has taken a lot of stress off them (88.7%), that without HMP they would not be able to go to the doctor (81.6%) or the dentist (78.2%), and that they worry about not being able to get the health care they need if their HMP coverage ends (82.0%) (Appendix A Tables 2.16-2.19).

### **Questions or problems using HMP**

One in six enrollees (17.0%) reported that they had questions or problems using their HMP coverage since they enrolled (Appendix A Table 2.20). Among those who had questions or problems, the most commonly reported challenges\* included: difficulty/inability finding a provider (43.3%), needing a service that was too expensive or not covered (35.0%), and difficulty finding out information about HMP (15.0%) (Appendix A Table 2.21.1).

### **Perspectives on the Medicaid program**

About half of enrollees (51.2%) strongly agreed or agreed that doctors treat people on Medicaid the same as people with private insurance, while 27.8% disagreed or strongly disagreed (Appendix A Table 2.22). Most enrollees (88.1%) strongly agreed or agreed that Medicaid helps people get a “leg-up” when they really need it (Appendix A Table 2.23). Less than half of enrollees (46.1%) strongly agreed or agreed that many people on Medicaid do not want other people to know (Appendix A Table 2.24). About half of enrollees (52.9%) strongly agreed or agreed that a lot of people in this country do not respect those on Medicaid (Appendix A Table 2.25).

Most enrollees (68.1%) disagreed or strongly disagreed that there should be a limit on how long someone can be covered by Medicaid (Appendix A Table 2.26).

### **Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.**

#### **Forgone health care**

About one in four enrollees (23.9%) reported not getting the health care they needed in the 12 months prior to HMP enrollment (Appendix A Table 3.1). Among enrollees who reported not getting the health care they needed prior to HMP enrollment:

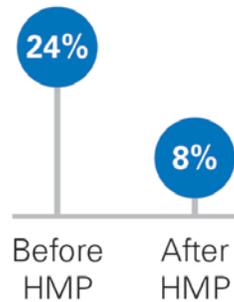

---

\*Respondents were able to provide multiple responses to the survey question.

- The most commonly reported types of forgone health care\* were primary care (55.3%) and specialty care (27.8%); prescription medications was mentioned by 20.8% and mental health care by 6.3% (Appendix A Table 3.1.1).
- The most commonly reported reason for not getting the health care they needed\* was not having health insurance (65.0%); 21.3% reported needing a service that was not covered by their insurance and 7.0% reported difficulty getting an appointment (Appendix A Table 3.1.2).

Few enrollees (8.2%) reported not getting the health care they needed in the last 12 months while they were enrolled in HMP (Appendix A Table 3.2). Reporting forgone health care in the last 12 months was more common among enrollees with a mental health condition (aOR=1.83) or a substance use disorder (aOR=3.78) compared to those without a mental health condition or substance use disorder, and among those who reported forgoing health care in the 12 months prior to HMP enrollment compared to those who did not (aOR=1.94) (Appendix B Table 3.1.3). Enrollees with excellent, very good, or good health status were less likely than those with fair or poor health status to report forgoing health care in the last 12 months (aOR=0.35) (Appendix B Table 3.1.3).

Fewer enrollees reported **forgoing health care** after enrolling in HMP.

Among enrollees who reported not getting the health care they needed in the last 12 months while they were enrolled in HMP:

- The most commonly reported types of forgone health care\* were primary care (35.7%) and specialty care (31.2%); prescription medications were mentioned by 18.4% and mental health care by 10.2% (Appendix A Table 3.2.1).
- The most commonly reported reason for not getting the health care they needed\* was perceiving that the service was not covered or would cost too much (25.7%); 25.1% reported difficulty/inability finding a provider, 12.9% reported difficulty getting an appointment, and 30.8% reported other reasons (Appendix A Table 3.2.2).

One in five enrollees (19.7%) reported forgoing health care in the 12 months prior to HMP but not in the last 12 months while they were on HMP (Appendix A Table 3.2.3). This improvement

\*Respondents were able to provide multiple responses to the survey question.

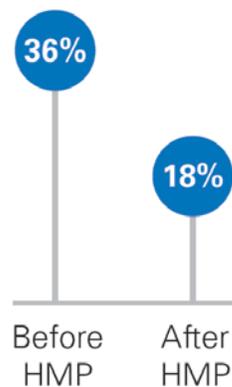

in forgone health care was more likely among enrollees age 50-64 compared to those age 19-35, among those with a chronic condition compared to those without, and among those with a mental health condition or both a mental health condition and a substance use disorder compared to those without these conditions (Appendix A Table 3.2.3).

### Forgone dental care

More than one in three enrollees (35.9%) reported not getting the dental care they needed in the 12 months prior to HMP enrollment (Appendix A Table 3.3). Enrollees with a chronic condition compared to those without, and those a mental health condition or both a mental health condition and a substance use disorder compared to those without these conditions, were more likely to report forgoing dental care prior to HMP enrollment (Appendix A Table 3.3). Among enrollees who reported not getting the dental care they needed prior to HMP enrollment, the most commonly reported reasons for not getting the dental care they needed\* were not having health insurance (63.3%) and needing a service that was not covered by their insurance (28.1%); 5.8% reported difficulty/inability finding a provider (Appendix A Table 3.3.1).

About one in five enrollees (18.3%) reported not getting the dental care they needed in the last 12 months while enrolled in HMP (Appendix A Table 3.4). Forgoing dental care in the last 12 months was less common among enrollees who knew that HMP covers routine dental care compared to those who did not (aOR=0.39), and more common among those who reported forgoing dental care in the 12 months prior to HMP enrollment compared to those who did not (aOR=2.98) (Appendix B Table 3.2.3). Forgoing dental care in the last 12 months also was more common among enrollees with a bachelor's or post-graduate degree (aOR=2.08) or an associate's degree or some college (aOR= 1.65) compared to those whose highest level of education was high school or less, and among enrollees who were non-Hispanic Black (aOR=0.43) or non-Hispanic Other ethnicity (aOR=0.43) compared to those who were non-Hispanic White (Appendix B Table 3.2.3).

Fewer enrollees reported **forgoing dental care** after enrolling in HMP.

\*Respondents were able to provide multiple responses to the survey question.

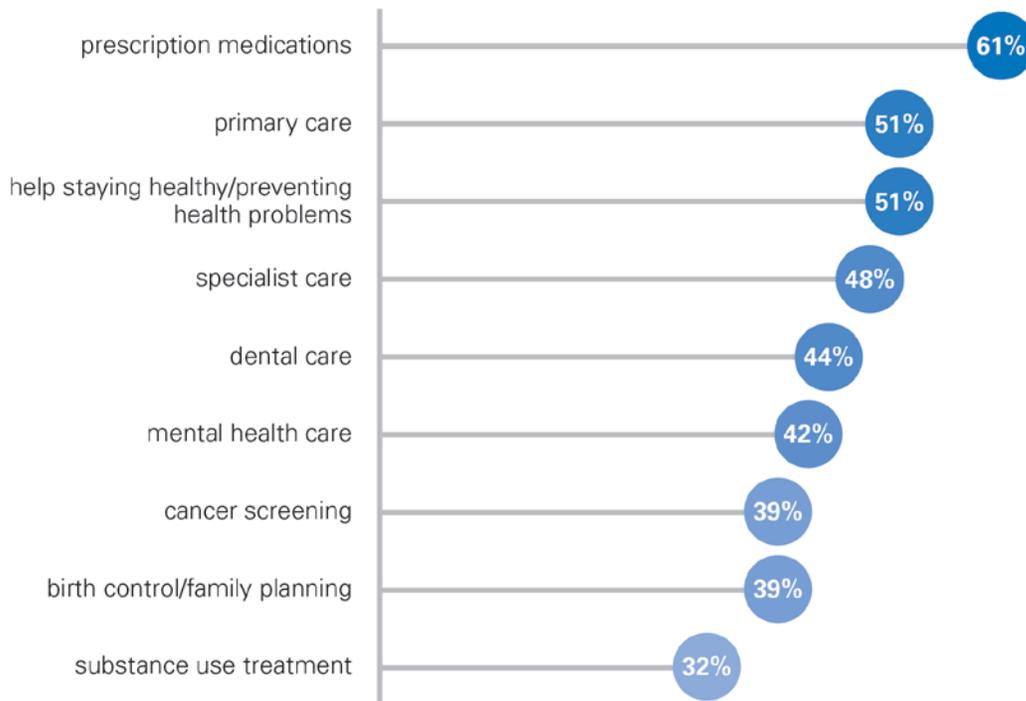

Among enrollees who reported not getting the dental care they needed in the last 12 months while enrolled in HMP, the most commonly reported reasons for not getting the dental care they needed\* were perceiving that the service was not covered or would cost too much (34.1%) and difficulty/inability finding a provider (31.7%); 11.2% said they didn't realize HMP provides coverage for dental care (Appendix A Table 3.4.1).

One in four enrollees (24.1%) reported forgoing dental care in the 12 months prior to HMP but not in the last 12 months while they were on HMP (Appendix A Table 3.4.2). This improvement in forgone dental care was more likely among enrollees age 36-49 compared to those age 19-35 and among those with a mental health condition compared to those without a mental health condition or substance use disorder (Appendix A Table 3.4.2).

### Changes in access to care

Many enrollees reported greater ability to get prescription medications (61.4%), help staying healthy or preventing health problems (51.4%), primary care (51.2%), specialist care (47.7%), dental care (44.0%), mental health care (41.8%), cancer screening (38.9%), birth control/family planning services (38.7%), and substance use treatment services (31.8%) after enrolling in HMP compared to before they had HMP coverage (Appendix A Tables 3.5, 3.7, 3.9, 3.11, 3.13, 3.15, 3.17, 3.19, 3.21). About three in four enrollees (74.6%) reported improved ability to get one or more types of care (Appendix A Table 3.3).

More enrollees reported better access to health care since HMP enrollment.

\*Respondents were able to provide multiple responses to the survey question.

For all types of care, enrollees who were uninsured all 12 months prior to HMP enrollment were more likely than those who were insured for some or all 12 months prior to HMP enrollment, and enrollees who reported forgoing health care in the 12 months prior to HMP enrollment were more likely than those who did not to report improved access to care (Appendix B Tables 3.3.2-3.11.2).

Enrollees who knew that the type of care was covered by HMP were also more likely to report improved access to that type of care (Appendix B Tables 3.5.2, 3.6.2, 3.7.2, 3.8.2, 3.11.2).

Those who knew that some kinds of visits, tests, and medicines have no copays were more likely to report improved access to cancer screening (aOR=1.53), birth control/family planning services (aOR=1.53), and help staying healthy or preventing health problems (aOR=1.39) (Appendix B Tables 3.9.2, 3.10.2, 3.11.2).

Enrollees whose highest level of education was high school or less compared to those with a bachelor's or post-graduate degree were more likely to report improved access to primary care, dental care, substance use treatment, and help staying healthy or preventing health problems (Appendix B Tables, 3.3.2, 3.5.2, 3.7.2, 3.10.2).

Enrollees who were non-Hispanic Black compared to those who were non-Hispanic White (aOR=1.88) and those with a mental health condition (aOR=1.87) or both a mental health condition and a substance use disorder (aOR=2.22) compared to those without these conditions were more likely to report improved access to mental health care (Appendix B Table 3.6.2).

Enrollees with a mental health condition (aOR=1.86) or both a mental health condition and a substance use disorder (aOR=3.19) were more likely than those without these conditions to report improved access to substance use treatment services (Appendix B Table 3.7.2).

### **Out-of-pocket costs**

In the 12 months prior to HMP enrollment, 42.0% of enrollees spent less than \$50 out-of-pocket for their own medical and dental care; 25.3% spent more than \$500 out-of-pocket and 8.7% spent more than \$2,000 (Appendix A Table 3.24). Enrollees age 50-64 were less likely than those age 19-35 to report spending less than \$50 out-of-pocket for their own medical or dental care in the 12 months prior to HMP enrollment (Appendix A Table 3.24). Few enrollees (4.4%) reported they did not know how much they spent out-of-pocket for their own medical and dental care in the 12 months prior to HMP enrollment (Appendix A Table 3.24).

In the last 12 months while enrolled in HMP, 53.7% of enrollees spent less than \$50 out-of-pocket for their own medical and dental care; 6.6% spent more than \$500 out-of-pocket and 1.2% spent more than \$2,000 (Appendix A Table 3.25). One in five enrollees (21.5%) reported they did not know how much they spent out of pocket for their own medical and dental care in the last 12 months (Appendix A Table 3.25).

In the 12 months prior to HMP enrollment, 36.0% of enrollees reported having problems paying medical bills (Appendix A Table 3.26). Problems paying medical bills in the 12 months prior to enrollment was more common among enrollees with an income 0-35% FPL compared to those with an income 36-99% FPL, among enrollees age 36-49 or age 50-64 compared to those age 19-35, among enrollees with a chronic condition compared to those without, and among enrollees with a mental health condition or both a mental health condition and a substance use disorder compared to those without these conditions (Appendix A Table 3.26).

Among those who reported having problems paying medical bills, 65.0% reported being contacted by a collections agency and 25.9% thought about filing for bankruptcy (Appendix A Tables 3.26.1, 3.26.2). Enrollees with an income 0-35% FPL compared to those with an income 36-99% FPL were more likely to consider filing for bankruptcy (Appendix A Table 3.26.2). Among those who thought about it, 24.6% filed for bankruptcy (Appendix A Table 3.26.2.1). Enrollees with a chronic condition were more likely than those without to report filing for bankruptcy (28.6% vs. 13.2%) (Appendix A Table 3.26.2.1).

Among those who reported having problems paying medical bills in the 12 months prior to HMP enrollment, 85.4% felt that their problems paying bills have gotten better since enrolling in HMP (Appendix A Table 3.26.3). Enrollees with excellent, very good, or good health status were more likely than those with fair or poor health status (aOR=2.49) and those whose highest level of education was an associate's degree or some college were more likely than those whose highest level of education was high school or less (aOR=2.13) to report that their problems paying medical bills have gotten better since enrolling in HMP (Appendix B Table 3.12.2).

**Aim 4: To describe HMP enrollees' health behaviors, how they change over time with enrollment and disenrollment in HMP, and barriers and facilitators to improvement in health behaviors.**

## **Health risk assessment**

### *Self-reported HRA discussion*

Nearly half of enrollees (43.4%) said they discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP (Appendix A Table 4.10). Enrollees who knew that they may get a reduction in healthcare costs by completing a HRA (aOR=1.62), who reported carefully reviewing their MI Health Account statement (aOR=1.83), who reported seeing their PCP in the past 12 month (aOR=3.28), and those age 50-64 compared to those age 19-35 (aOR=1.68) were more likely to report that they discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP (Appendix B Table 4.11.2).

Among enrollees who reported discussing the HRA with their doctor or someone at their primary care provider's office, 88.3% chose to work on at least one health behavior (Appendix A Table 4.10.1). The most common behaviors\* that enrollees chose to work on were related to

---

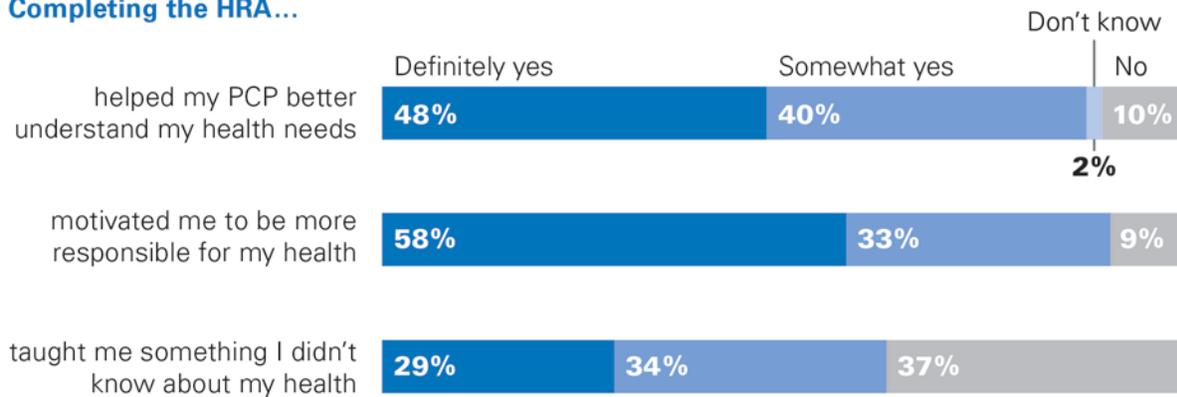

\*Respondents were able to provide multiple responses to the survey question.

nutrition/diet (36.9%), exercise/activity (28.7%), reducing/quitting tobacco use (15.7%), and losing weight (13.7%) (Appendix A Table 4.10.1). Enrollees were asked why they chose the healthy behavior they did and were able to provide multiple reasons. For their chosen health behaviors, nearly half (48.8%) said they chose the behavior because it was something that they wanted to do anyway (Appendix A Table 4.10.1.1). Other reasons they reported were because it would help them improve their condition (25.6%) or because the doctor suggested it (16.0%) (Appendix A Table 4.10.1.1).

Among enrollees who reported discussing the HRA with their doctor or someone at their primary care provider’s office, the majority reported that completing the HRA somewhat or definitely helped their primary care provider better understand their health needs (88.0%), taught them something they didn’t know about their health (63.3%), and motivated them to be more responsible for their health (91.0%) (Appendix A Tables 4.10.2-4.10.4).

Many enrollees who reported discussing the HRA with their doctor or someone at their primary care provider’s office found it **helpful**.

**Completing the HRA...**

**HRA completion**

Nearly half of enrollees (45.0%) had some record of HRA completion in the Data Warehouse, which included 31.0% with a completed HRA with physician attestation documented (Appendix B Tables 4.12.1, 4.13.1).

Having some record of HRA completion in the Data Warehouse was more common among enrollees age 50-64 compared to those age 19-35, among those who reported a PCP visit in the past 12 months or who had a claim for a primary care visit compared to those who did not, and among those who knew they could get a reduction in healthcare costs by completing an HRA compared to those who did not (Appendix B Table 4.12.3).

Enrollees age 50-64 were more likely than those age 19-35 to have had a completed HRA with physician attestation (Appendix B Table 4.13.3).

Enrollees who were non-Hispanic Black were less likely than those who were non-Hispanic White to have some record of HRA completion in the Data Warehouse and to have a completed HRA with physician attestation (Appendix B Tables 4.12.3, 4.13.3).

### **Health behaviors and health education**

#### *Exercise*

Less than half of enrollees (41.4%) reported talking with a health professional about exercise in the last 12 months (Appendix A Table 4.4). Enrollees with a chronic condition, those age 50-64, and women were more likely to report talking with a health professional about exercise (Appendix A Table 4.4).

About one in four enrollees (23.4%) reported exercising for at least 20 minutes every day in the last 7 days, and another 38.5% reported exercising for at least 20 minutes for 3-6 of the last 7 days (Appendix A Table 4.1). Women were less likely than men (20.6% vs. 26.1%) and those age 19-35 were less likely than older enrollees to report exercising every day (Appendix A Table 4.1). Those with an income 0-35% FPL were more likely than those with higher incomes to report no days of exercise in the last 7 days (Appendix A Table 4.1).

#### *Diet/nutrition*

Less than half of enrollees (41.9%) reported talking with a health professional about diet/nutrition in the last 12 months (Appendix A Table 4.5). Enrollees with a chronic condition, those age 50-64, and women were more likely to report talking with a health professional about diet/nutrition (Appendix A Table 4.5).

Over half of enrollees (56.4%) reported drinking sugary drinks 2 or fewer days in the last 7 days (Appendix A Table 4.2). Enrollees who talked with a health professional about diet/nutrition in the last 12 months were more likely than those who did not to report 0 days of sugary drink consumption in the last 7 days (aOR=1.30) (Appendix B Table 4.2.2). Enrollees age 36-49 (aOR=1.88) or age 50-64 (aOR=2.99) compared to those age 19-35, women compared to men (aOR=1.28), and those with bachelor's or post-graduate degree (aOR=2.03) or an associate's degree or some college (aOR=1.33) compared to those whose highest level of education was high school or less were more likely to report 0 days of sugary drink consumption in the last 7 days (Appendix B Table 4.2.2).

One in three enrollees (33.7%) reported eating 3 or more servings of fruits and vegetables every day in the last 7 days (Appendix A Table 4.3). Enrollees who discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP (aOR=1.39) and those who talked with a health professional about diet/nutrition in the last 12 months (aOR=1.31) were more likely to report eating 3 or more servings of fruits and vegetables at least 3 days of the last 7 days compared to those that did not (Appendix B Table 4.3.2). Enrollees who were non-Hispanic White compared to those who were non-Hispanic Black (aOR=0.61) or non-Hispanic Other ethnicity (aOR=0.69), women compared to men (aOR=1.44), those with bachelor's or post-graduate degree (aOR=1.70) or an associate's degree or some college (aOR=1.37) compared to those whose highest level of education was high school or less

were more likely to report eating 3 or more servings of fruits and vegetables at least 3 days of the last 7 days (Appendix B Table 4.3.2).

### *Alcohol use*

Few enrollees (3.9%) reported binge drinking 3 or more days in the last 7 days (Appendix A Table 4.6). Enrollees who discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP compared to those who did not (aOR=1.37) and women compared to men (aOR=1.36) were more likely to report no binge drinking in the last 7 days (Appendix B Table 4.4.2). Among those who reported any binge drinking in the last 7 days, 24.9% reported talking with a health professional about safe alcohol use in the last 12 months (Appendix A Table 4.7).

### *Tobacco use*

About one in three enrollees (34.4%) reported smoking or using tobacco in the last 30 days (Appendix A Table 4.8). Enrollees who discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP were less likely than those who did not to report smoking or using tobacco in the last 30 days (aOR=0.78) (Appendix B Table 4.6.2).

Among those who reported smoking or using tobacco in the last 30 days, 78.6% reported wanting to quit (Appendix A Table 4.8.1). Enrollees age 50-64 compared to those age 19-35 were more likely to report wanting to quit (aOR= 1.87) (Appendix B Table 4.7.2). Of those who said they would like to quit smoking or using tobacco, 89.0% reported working on quitting or cutting back (Appendix A Table 4.8.1.1). Among those who reported smoking or using tobacco in the last 30 days and wanting to quit, about half (47.3%) reported receiving advice or assistance from a health professional or their health plan on how to quit or cut back in the last 12 months (Appendix A Table 4.8.2). Enrollees who discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP (aOR=1.95) and those who reported seeing their PCP in the past 12 months (aOR=4.64) were more likely than those who did not to report getting help quitting or reducing tobacco use in the last 12 months (Appendix B Table 4.9.2).

### *Drug use*

Few enrollees (6.2%) reported using drugs or medications to affect mood or aid in relaxation in the last 30 days (Appendix A Table 4.9). Men were more likely than women to report using drugs or medications to affect mood or aid in relaxation (Appendix A Table 4.9). Among those who reported using drugs or medications to affect mood or aid in relaxation, 53.5% used these drugs or medications almost every day (Appendix A Table 4.9.1). Among those who used drugs sometimes or almost every day, 36.3% reported speaking with a health professional about the use of these drugs or medications in the last 12 months (Appendix A Table 4.9.1.1).

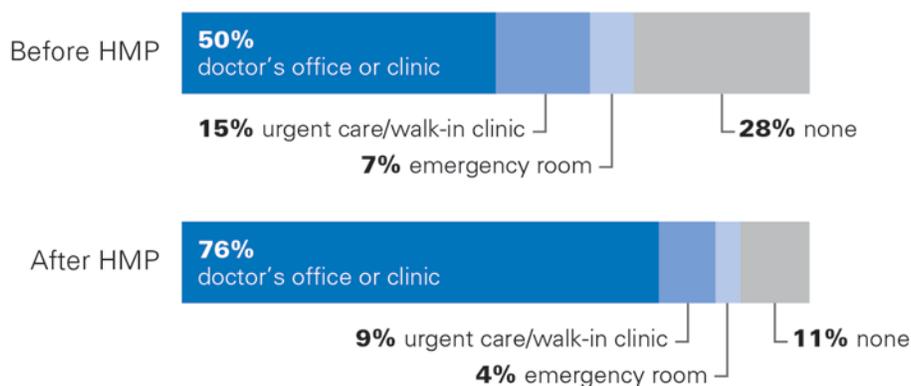

**Aim 5: To understand HMP enrollees' decisions about when, where and how to seek care, including decisions about emergency department utilization.**

## Regular source of care

In the 12 months prior to HMP enrollment, three in four enrollees (74.7%) reported having a place they would usually go when they need a checkup, feel sick, or want advice about their health (Appendix A Table 5.1). Among those who reported having a place that they would go for health care in the 12 months prior to HMP enrollment, 51.7% reported a doctor's office, 20.5% an urgent care/walk-in clinic, 16.2% a clinic, and 9.5% reported the ER as their regular source of care (Appendix A Table 5.2.1).

Nearly all enrollees (91.7%) reported having a place they would usually go when they need a checkup, feel sick, or want advice about their health in the last 12 months while they were enrolled in HMP (Appendix A Table 5.3). Enrollees who were Hispanic compared to non-Hispanic White, who were age 19-35 compared to those age 50-64, and those who did not have a chronic condition were less likely to report a regular source of care (Appendix A Table 5.3). Among enrollees who reported having a place they would go for health care in the last 12 months, 64.5% reported a doctor's office, 19.9% a clinic, 10.3% an urgent care/walk-in clinic, and 4.2% reported the ER as their regular source of care (Appendix A Table 5.4.1).

More enrollees reported having a **regular source of care** after HMP.

Those age 50-64 compared to those age 19-35 (aOR=2.57), women compared to men (aOR=1.91), those with a chronic condition compared to those without (aOR=1.68), and those with a mental health condition compared to those without a mental health condition or substance use disorder (aOR=1.52) were more likely to report that a doctor's office or clinic was their regular source of care in the last 12 months while enrolled in HMP (Appendix B Table 5.1.3). Those who experienced homelessness in the last 12 months were less likely than those who did not experience homelessness in the last 12 months to report that a doctor's office or clinic was their regular source of care (aOR=0.47) (Appendix B Table 5.1.3).

Among those who reported a doctor's office or clinic as their regular source of care in the last 12 months while enrolled in HMP, 93.9% said this was their PCP through their HMP coverage while 50.6% reported that this is the same place they went prior to HMP enrollment (Appendix A Tables 5.4.3, 5.4.4). Among those who did not name a doctor's office or clinic as their regular source of care in the last 12 months while enrolled in HMP, 33.8% said they did not have a PCP

through HMP and 6.8% were not sure (Appendix A Table 5.4.5). Among enrollees who had a PCP through HMP that was not their regular source of care, 55.4% chose their provider and 42.5% said their plan assigned one (Appendix A Table 5.4.5.1).

Among all enrollees, 83.8% reported having a PCP (Appendix A Table 5.4.6). Enrollees who were non-Hispanic White compared to those who were non-Hispanic Black, age 50-64 compared to younger enrollees, women compared to men, and those with a chronic condition compared to those without were more likely to report having a PCP (Appendix A Table 5.4.6).

### **Primary care utilization**

The majority of enrollees (83.4%) who had a PCP reported seeing their PCP in the past 12 months while enrolled in HMP (Appendix A Table 5.4.6.1) and a similar proportion of all enrollees (81.9%) had a claim for at least one primary care visit in a two-year period (Appendix B Table 5.3.1). Enrollees age 50-64 compared to those age 19-35 (aOR=2.95), women compared to men (aOR=2.22), those with a chronic condition compared to those without (aOR=1.96), those with a mental health condition compared to those without a mental health condition or substance use disorder (aOR=2.68), and those who reported forgone health care in the 12 months prior to enrollment compared to those who did not (aOR=1.60) were more likely to report seeing their PCP in the past 12 months (Appendix B Table 5.2.2). Enrollees who reported full-time employment compared to those not employed (aOR=0.62) and those who experienced homelessness in the past 12 months compared to those who did not (aOR=0.32) were less likely to report seeing their PCP in the past 12 months (Appendix B Table 5.2.2).

Among those who reported not seeing their PCP in the past 12 months, the most common reason\* given was that they were healthy and did not need to see a provider (51.6%) (Appendix A Table 5.4.6.1.1).

Most enrollees (75.7%) said it was very easy or easy to get an appointment to see their PCP in the past 12 months (Appendix A Table 5.5). Among those who said it was difficult or very difficult to get an appointment, the most common reason\* was difficulty getting an appointment soon enough (73.8%) (Appendix A Table 5.6.1).

### **Preventive services utilization**

Three in four enrollees (75.8%) had a claim for at least one preventive service besides a primary care visit in a two-year period. The most common preventive service was an influenza vaccination (41.9%) (Appendix B Table 5.4.1). More than half of women over age 50 (58.4%) received breast cancer screening, 37.1% of women received cervical cancer screening, and 29.5% of enrollees over age 50 had colon cancer screening (Appendix B Table 5.4.1). About one in five enrollees (18.1%) who reported smoking or using tobacco received a prescription for varenicline and/or nicotine replacement therapy, and 37.0% of those with diabetes and/or heart disease had a prescription for a statin (Appendix B Tables 5.4.1, 5.4.2)

---

\*Respondents were able to provide multiple responses to the survey question.

The likelihood of having at least one preventive service was greater for women, enrollees with one or more chronic conditions and for those who:

- Reported that they discussed the HRA with their doctor or someone at their primary care provider's office since they enrolled in HMP compared to those who did not (aOR=1.58)
- Had any record of HRA completion in the Data Warehouse compared to those who did not (aOR=1.38)
- Reported having a PCP visit in the past 12 months compared to those who did not (aOR=2.41)
- Had a claim for a primary care visit in a two-year period compared to those who did not (aOR=5.59)  
(Appendix B Table 5.5.3)

Similar relationships were typically found for specific preventive services, with some other predictors also identified (e.g., age and STI testing, pneumonia vaccination, or statin claim) (Appendix B Tables 5.7.1-5.16.3).

### **Dental care utilization**

Over half of enrollees (54.0%) reported getting dental care in the last 12 months while they were enrolled in HMP (Appendix A Table 5.7). Women were more likely than men (58.5% vs. 49.6%) and those with an income 36-99% FPL were more likely than those with other incomes to report getting dental care (Appendix A Table 5.7). Among those who reported not getting dental care in the last 12 months, the most common reason\* given was that they just did not want to go or did not get around to it (37.1%) (Appendix A Table 5.7.1).

Enrollees were more likely to have a claim for a dental visit in a two-year period if they knew that routine dental care was covered by HMP compared to those who did not (aOR=4.07), if they reported forgone dental care in the 12 months prior to HMP enrollment compared to those who did not (aOR=1.37), if they reported sometimes, often, or always needing help reading written materials compared to those who never or rarely need help reading written materials (aOR=1.44), if they were non-Hispanic Other ethnicity compared to non-Hispanic White (aOR=1.61), or if they had an income 36-99% FPL compared to those with an income 0-35% FPL (aOR=1.29) (Appendix B Table 5.18.3). Enrollees who were employed full-time were less likely than those who were not employed to have a dental visit (Appendix B Table 5.18.3).

### **Self-reported emergency room use**

More than one in three enrollees (38.0%) reported going to the ER for care in the past 12 months (Appendix A Table 5.8). Enrollees with a chronic condition compared to those without, enrollees with a mental health condition, a substance use disorder, or both a mental health condition and a substance use disorder compared to those without these conditions, enrollees from the S Central/SW/SE region compared to those from the UP/NW/NE region, and enrollees who were non-Hispanic Black compared to those who were non-Hispanic White were more likely to report going to the ER in the past 12 months (Appendix A Table 5.8).

---

\*Respondents were able to provide multiple responses to the survey question.

Among enrollees who reported going to the ER in the past 12 months, 75.8% reported that they went to the ER because it is the closest place to receive care, 58.9% reported that the problem was too serious for a doctor's office or clinic, 53.6% reported that their doctor's office or clinic was not open, 44.1% reported that they needed to get care at a time when they would not miss work or school, 34.6% reported that they went to the ER because they get most of their care at the ER, and 17.7% reported arriving to the ER by ambulance (Appendix A Tables 5.8.2.1-5.8.2.6). Enrollees who reported an ER visit were able to report other reasons they decided to go to the ER and those most common reason\* given was that their symptoms didn't improve or got worse (17.9%) (Appendix A Table 5.8.2.7).

Among those who reported an ER visit, 21.3% tried to contact their usual provider's office before going to the ER (Appendix A Table 5.8.1). Of those enrollees who tried to contact their usual provider's office before going to the ER, 81.8% reported talking to someone (Appendix A Table 5.8.1.1). Among those who talked to someone from their provider's office before going to the ER, the most common reason\* for going to the ER was because they were told to go to the ER (61.6%) (Appendix A Table 5.8.1.1.1).

### **Emergency room utilization**

Half of enrollees (50.0%) had a claim for an ER visit in a two-year period (Appendix B Table 5.23.1). Those with housing instability (i.e., had lived four or more places in the past 3 years) compared to those without (aOR=1.81), those with a chronic condition compared to those without (aOR=1.90), those with a mental health condition and/or substance use disorder compared to those without these conditions (aOR=3.86 for both, 1.93 for mental health condition, 1.99 for substance use disorder), and women compared to men (aOR=1.40) were more likely to have a claim for an ER visit (Appendix B Table 5.23.3). Enrollees with excellent, very good, or good health status compared to those with fair or poor health status (aOR=0.70), those with a regular source of care that is a doctor's office or clinic compared to those without (aOR=0.67), those age 50-64 compared to those age 19-35 (aOR=0.59), and those with a bachelor's or post-graduate degree compared to those whose highest level of education was high school or less (aOR=0.56) were less likely to have a claim for an ER visit (Appendix B Table 5.23.3)

### **Other healthcare utilization**

One in five enrollees (20.5%) had a claim for at least one mental health or substance use visit in a two-year period (Appendix B Table 5.21.1). Having a mental health or substance use visit was more likely if enrollees knew that mental health counseling was covered by HMP (aOR=4.15) (Appendix B Table 5.21.3).

One in three enrollees (35.3%) had a claim for at least one eye visit in a two-year period (Appendix B Table 5.20.1). Among enrollees with diabetes, more than half (57.7%) had an eye visit, though those who were employed full-time compared to those not employed were less likely to have had an eye visit (aOR=0.34) (Appendix B Tables 5.20.4-5.20.6)

---

\*Respondents were able to provide multiple responses to the survey question.

About one in seven enrollees (14.6%) had an inpatient claim in a two-year period (Appendix B Table 5.24.1). Having an inpatient claim was more common among enrollees age 36-49 (aOR=1.50) and age 50-64 (aOR=1.69) compared to those age 19-35, among those with a chronic condition compared to those without (aOR=1.91), among those with a substance use disorder (aOR=4.09) or both a mental health condition and a substance use disorder (aOR=4.45) compared to enrollees without these conditions, and among enrollees who sometimes, often, or always need help reading written materials compared to those who never or rarely need help reading written materials (aOR=1.52) (Appendix B Table 5.24.3).

### **Care needs after hours**

Among those who did not report an ER visit in the past 12 months, 16.4% reported that there was a time when they needed help or advice when their usual clinic or doctor's office was closed (Appendix A Table 5.8.3). Women, enrollees age 50-64 compared to those age 19-35, and enrollees with a chronic condition were more likely to report this (Appendix A Table 5.8.3). Enrollees who reported needing help or advice when their usual clinic or doctor's office was closed were asked how they handled the situation and the most common responses\* were that they went to urgent care or a walk-in clinic (57.4%) and that they got advice elsewhere (20.7%) (Appendix A Table 5.8.3.1).

### **Checking cost-sharing before seeking care**

One in four enrollees (24.5%) reported checking how much they would have to pay for a doctor's visit, medication, or other health service before they received care in the past 12 months (Appendix A Table 5.10). Enrollees with a bachelor's or post-graduate degree (aOR=2.02) or an associate's degree or some college (aOR=1.58) were more likely than those whose highest level of education was high school or less to report checking how much they would have to pay for a doctor's visit, medication, or other health service before they received care (Appendix B Table 5.25.2). Among those who said they had checked how much they would have to pay, the most commonly reported types of health services\* were primary care (43.8%) and prescription medications (25.2%) (Appendix A Table 5.10.1).

### **Seeking out and using quality information in health care decisions**

One in six enrollees (17.1%) reported comparing quality ratings for health care services at different places in the past 12 months (Appendix A Table 5.11). Enrollees with a bachelor's or post-graduate degree (aOR=2.17) or an associate's degree or some college (aOR=1.99) were more likely than those whose highest level of education was high school or less and enrollees from the Detroit Metro region were more likely than those from the UP/NW/NE region (aOR=2.02) to report comparing quality ratings for health care services at different places (Appendix B Table 5.26.2). Enrollees most commonly reported comparing quality ratings for\* primary care (44.9%) (Appendix A Table 5.11.1).

---

\*Respondents were able to provide multiple responses to the survey question.

## Talking with doctor about treatment options and costs

About one in five enrollees (19.1%) reported talking with a health care provider about how much health care services would cost them out-of-pocket (Appendix A Table 5.12). Enrollees with a bachelor's or post-graduate degree (aOR=1.85) or an associate's degree or some college (aOR=1.64) were more likely than those whose highest level of education was high school or less and women were more likely than men (aOR=2.32) to report talking with a health care provider about how much health care services would cost them out-of-pocket (Appendix B Table 5.27.2). Enrollees most commonly reported discussing out-of-pocket costs for\* primary care (23.6%) (Appendix A Table 5.12.1).

One in five enrollees (21.3%) reported asking a provider to recommend a less costly prescription drug in the past 12 months (Appendix A Table 5.13). Women were more likely than men (aOR=1.87) and those with a chronic condition more likely than those without (aOR=1.44) to report asking a provider to recommend a less costly prescription drug in the past 12 months (Appendix B Table 5.28.2).

**Aim 6: To understand why enrollees lose or drop HMP coverage and what, if any, source of health insurance coverage they subsequently obtain.**

### Expected duration of HMP enrollment

Enrollees were asked how much longer they expected they would have insurance through HMP and most reported that they did not know (43.0%) (Appendix A Table 6.1). Among enrollees age 19-62, this was most often reported by those who reported being unable to work compared to those who reported being employed full-time or part-time (52.8% vs. 41.3% and 41.7%, respectively), and less often reported by those in school compared to those who were not (33.1% vs. 46.1%), and by those with a bachelor's or post-graduate degree compared to those whose highest level of education was high school or less (33.4% vs. 49.0%) (Appendix B Tables 6.1.1, 6.1.3). One in four enrollees (25.6%) expected they would have insurance through HMP for more than 2 years, 12.5% said 1-2 years, 12.7% said 6 months to 1 year, and 6.3% said less than 6 months (Appendix A Table 6.1).

Among those who expected they would continue having insurance through HMP for less than 2 years, the most common reasons why they expected their HMP insurance would end\* were expecting to get employer-sponsored insurance (37.8%) and expecting an income increase (22.8%) (Appendix A Table 6.1.1).

---

\*Respondents were able to provide multiple responses to the survey question.

## Limitations

---

The 2018 HMV Cohort II Survey included individuals who enrolled in HMP for the first time between January 2016 and January 2018. Compared to the enrollees included in Cohort I, the more recent enrollees included in Cohort II were younger, more likely to be employed, and more likely to have health insurance for some or all of the 12 months prior to HMP enrollment.

The response rate of 42.9% for the Cohort II survey was lower than the response rate of 53.7% for the Cohort I survey. As with the Cohort I survey, this survey was administered via phone to a randomly selected sample of HMP enrollees, and there may be some differences between those who completed the survey and those who could not be reached. While the survey was available in three languages, it was not available in all languages spoken by HMP enrollees.

As with any survey, HMV survey responses may reflect social desirability or recall bias. While many measures were based on those used in large national surveys, some questions were newly developed specifically to assess experiences with the HMP program.

Survey responses were supplemented with claims-derived variables from Medicaid administrative data. These data are limited to services paid by Medicaid during periods of enrollment in HMP and other Medicaid programs. We did not distinguish between services received during enrollment in HMP and during enrollment in other Medicaid programs. Data extraction for the claims-derived variables occurred in April 2019, which was 4-16 months from the month of sample selection. Claims-derived variables for respondents selected in October-December 2018 may reflect some incompleteness as some claims may not have been fully adjudicated and loaded into the Data Warehouse.

Identification of chronic medical and mental health conditions was performed using a combination of survey self-report and claims evidence. Survey self-report reflected being “ever told” by a health care provider that the respondent had a particular condition; this self-reported variable is subject to recall bias, as well as misunderstanding of whether a diagnosis was definitive. It cannot be determined whether respondents may have under- or over-reported conditions. Claims evidence was based on having  $\geq 1$  claim on any service with a diagnosis code consistent with that condition; this claims variable is limited by the lack of data for the period prior to HMP enrollment (i.e., care not paid for by Medicaid would not yield a claim, which could under-count chronic conditions). Conversely, requiring only 1 claim might overidentify chronic conditions, in situations where a single claim reflects an inaccurate diagnosis. However, for each condition examined, over half of individuals flagged as having a particular chronic condition had more than one claim for that condition (ranging from 55.8% to 80.8%). The definition of chronic condition used in this report (either survey self-report or claims evidence) represents a broad method of identification, and thus may over-identify enrollees with chronic conditions but also addresses the limitations of using either approach individually.

Bivariate analyses should be interpreted with caution as they may identify relationships between variables that are due to confounding. Small sample sizes may limit the ability to detect statistical associations.

## Conclusions

---

### **Employment and facilitators and barriers to employment**

More than half of enrollees were employed or self-employed. Among employed enrollees, most reported that HMP helped them do a better job at work. Among those without employment, most said HMP made them better able to look for a job, especially if they reported that their physical health had improved since enrollment.

One in four enrollees were caregivers and many reported that this role affected their employment.

#### **Aim 1: To describe changes over time in health and functional status for HMP enrollees, particularly those with chronic conditions or other indicators of poorer health.**

Three in four enrollees reported excellent, very good, or good health. Since enrolling in HMP, most enrollees reported their physical health, mental health, and oral health had improved or stayed the same. Those who had forgone care prior to enrollment but not in the last 12 months while they were on HMP were more likely to report improved health.

Two in three enrollees had at least one chronic condition, and one in three enrollees reported they had a chronic condition that was newly diagnosed since enrolling in HMP.

#### **Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.**

Most enrollees knew that HMP covers prescription medications, dental care, counseling for mental or emotional problems, eyeglasses, and birth control or family planning. Most did not know that HMP covers treatment for substance use and smoking cessation. Enrollees who reported needing help reading written materials were less likely to be aware of many covered benefits.

Understanding of incentives for HRA completion remains low, as less than one in three knew they could get a reduction in the amount they have to pay if they complete a HRA. More than half of enrollees recalled receiving a MI Health Account statement in the last year; most of these enrollees said that receiving these statements made them more aware of the cost of health care, and one in three said this information led them to change some of their health care decisions. Most enrollees considered the amount they have to pay for HMP to be fair and affordable.

#### **Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.**

Nearly half of enrollees were uninsured for all 12 months prior to HMP, and many enrollees experienced forgone medical and dental care prior to HMP, usually due to lack of insurance

coverage. In the 12 months before enrolling in HMP, one in four enrollees reported spending more than \$500 on medical and dental care and nearly one in ten reported spending more than \$2,000. One in three reported problems paying medical bills, and two-thirds of those had been contacted by a collections agency. Filing for bankruptcy was more likely for those with chronic conditions. In the last 12 months while enrolled in HMP, fewer than one in ten had more than \$500 in out-of-pocket costs.

**Aim 4: To describe HMP enrollees' health behaviors, how they change over time with enrollment and disenrollment in HMP, and barriers and facilitators to improvement in health behaviors.**

Over two in five enrollees said they discussed the HRA with their doctor or someone at their doctor's office since they enrolled in HMP. Most felt this discussion motivated them to be more responsible for their own health, and also that it helped their PCP understand their health needs. Enrollees who reported that they discussed the HRA were more likely to report engaging in healthy behaviors, and more likely to receive preventive services.

**Aim 5: To understand HMP enrollees' decisions about when, where and how to seek care, including decisions about emergency department utilization.**

Cohort II enrollees appear to have embraced the emphasis in HMP on primary care and health promotion. Most enrollees reported visiting their PCP, although this was less likely for those who had full-time employment and those who had experienced homelessness. Over half of enrollees reported getting dental care in the past year.

Enrollees were more likely to report having a regular source of care (of any kind) in the last 12 months compared to before HMP enrollment, and they were less likely to report the ER as their regular source of care. Still, about one in three reported an ER visit in the last 12 months, of which one in five tried to contact their usual provider first. Besides the seriousness of their symptoms, other reasons for ER visits included proximity, a history of ER care-seeking, and the need for after-hours care so as not to miss work or school. ER use was associated with having a chronic medical or mental health condition and/or substance use disorder.

**Aim 6: To understand why enrollees lose or drop HMP coverage and what, if any, source of health insurance coverage they subsequently obtain.**

This report did not follow individuals into post-HMP enrollment. However, the majority of enrollees were unsure about how long they would remain enrolled in HMP.

## Recommendations

---

As seen in the first survey cohort, the emphasis on primary and preventive care and providing information about costs appear to influence enrollee care-seeking and motivate attention to health behaviors. The emphasis on prevention and health risk modification in HMP could have even greater impact over the long-term and should continue to be monitored.

MDHHS should continue to educate HMP enrollees about covered benefits, particularly coverage for smoking cessation and treatment for substance use disorders, and about cost-sharing and financial incentives for healthy behaviors.

Because primary care visits appear to have a large impact on health promotion and use of preventive services, and have the potential to decrease the use of emergency rooms, maintaining and improving access to primary care could be more important than emphasizing the completion of the HRA. We recommend that MDHHS work with Medicaid health plans and the provider community to maintain or improve timely access to primary care appointments in addition to emphasizing the HRA.

While many enrollees were employed at the time of the survey, many face barriers to consistent employment such as health problems, functional limitations, caregiving, poor literacy, and low educational attainment. Housing instability may result from and contribute to difficulty seeking and maintaining employment. According to many enrollees, HMP has helped their employment and employability. Improved health and access to care, including vision and dental care, may contribute to these benefits in seeking or maintaining employment.

As the HMP community engagement requirement is implemented beginning in 2020, it will be important for MDHHS and the HMP evaluation team to monitor the employment status of HMP enrollees, including health-related barriers to gaining or consistently maintaining 80 hours per month of employment, and the health status of enrollees who lose HMP coverage if they are unable to satisfy the community engagement requirement.

Those with a mental health condition and/or substance use disorder face more obstacles to care. Improving awareness of covered services for these disorders should be a high priority, with special attention to providing education on these covered benefits to those who face challenges with literacy or housing stability. Improved mental health and recovery from substance misuse could enhance enrollees' ability to enter, or reenter, the workforce, reduce emergency department utilization and, importantly, benefit enrollees, their families and their communities.

While some information on health and functional outcomes can be ascertained from claims, surveys such as the *Healthy Michigan Voices* Survey provide a unique opportunity to understand changes in health behaviors and health status that are not readily evident in claims data. Furthermore, the surveys have provided much insight into the complex array of life circumstances that are associated with health, health care, and employment for HMP enrollees.

0.8.1 Employed and/or student . . . . .	A25
0.9 Q: In the past 12 months, did you spend time caring for a person who could not care for themselves due to illness or disability? . . . . .	A26
0.9.1 Q: In the past 12 months, did you go from working full-time to part-time, or cut back your hours because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A27
0.9.2 Q: In the past 12 months, did you receive a warning about your performance or attendance at work because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A28
0.9.3 Q: In the past 12 months, did you lose any of your job benefits because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A29
0.9.4 Q: In the past 12 months, did you take a leave of absence from work because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A30
0.9.5 Q: In the past 12 months, did you give up working entirely because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A31
0.9.6 Q: In the past 12 months, about how many days did you miss work because you were caring for a person who could not care for themselves due to illness or disability? . . . . .	A32
0.10 Q: The Healthy Michigan Plan gave me insurance when I couldn't get insurance at my job. . . . .	A33
0.11 Summary: The Healthy Michigan Plan gave me insurance when I couldn't get insurance at my job. . . . .	A34
0.12 Q: Having the Healthy Michigan Plan helped me stay insured between jobs or between school and a job. . . . .	A35
0.13 Summary: Having the Healthy Michigan Plan helped me stay insured between jobs or between school and a job. . . . .	A36
0.14 Q: Getting health insurance through the Healthy Michigan Plan helped me do a better job at work. . . . .	A37
0.15 Summary: Getting health insurance through the Healthy Michigan Plan helped me do a better job at work. . . . .	A38
0.16 Q: Having health insurance through the Healthy Michigan Plan helped me get a better job. . . . .	A39
0.17 Summary: Having health insurance through the Healthy Michigan Plan helped me get a better job. . . . .	A40
0.18 Q: Having health insurance through the Healthy Michigan Plan has made me better able to look for a job. . . . .	A41
0.19 Summary: Having health insurance through the Healthy Michigan Plan has made me better able to look for a job. . . . .	A42
0.20 Q: During the 12 months before you enrolled in the Healthy Michigan Plan, did you have any type of health insurance at any time? . . . . .	A43
0.20.1 Q: What type of health insurance did you have? . . . . .	A44
0.20.1.1 Q: Whose job is it? . . . . .	A44
0.20.1.2 Q: Who purchased it? . . . . .	A44
0.20.1.2.1 Q: Was it purchased through the marketplace known as healthcare.gov? . . . . .	A45
0.20.1.2.2 Q: Did [you/they] receive a subsidy? . . . . .	A45

<b>1 Aim 1: To describe changes over time in health and functional status for HMP enrollees, particularly those with chronic conditions or other indicators of poorer health.</b>	<b>A46</b>
1.1 Q: In general, would you say your health is?	A47
1.2 Q: Now thinking about your physical health, which includes physical illness and injury: for how many days during the past 30 days was your physical health not good?	A48
1.3 Q: Overall, since you enrolled in the Healthy Michigan Plan, would you say your physical health has gotten better, stayed the same, or gotten worse?	A49
1.4 Q: Now thinking about your mental health, which includes stress, depression, and problems with emotions: for how many days during the past 30 days was your mental health not good?	A50
1.5 Q: Overall, since you enrolled in the Healthy Michigan Plan, would you say your mental and emotional health has gotten better, stayed the same, or gotten worse?	A51
1.6 Q: During the past 30 days, for how many days did poor physical or mental health keep you from doing your usual activities, such as self-care, work, or recreation?	A52
1.7 Q: In the past 12 months, about how many days did you miss work because of illness or injury (do not include maternity leave)?	A53
1.8 Q: Thinking about your dental health, since you enrolled in the Healthy Michigan Plan, has the health of your teeth and gums gotten better, stayed the same, or gotten worse?	A54
1.9 Q: How tall are you?	A55
1.10 Q: How much do you weigh?	A56
1.11 Q: Compared to 12 months ago, how would you describe your weight?	A57
1.12 Q: Has a doctor or other health professional ever told you that you had any of the following?	A58
1.12.1 Self-reported chronic conditions	A58
1.12.2 Any self-reported chronic condition	A59
1.12.3 New diagnosis since HMP enrollment	A60
1.12.4 Q: Has a doctor or other health professional ever told you that you had a mood disorder (for example, depression, anxiety, bipolar disorder)?	A61
1.12.4.1 Q: Did you find out you had a mood disorder before or after you enrolled in the Healthy Michigan Plan?	A62
1.12.5 Q: Has a doctor or other health professional ever told you that you had hypertension, also called high blood pressure?	A63
1.12.5.1 Q: Did you find out you had hypertension before or after you enrolled in the Healthy Michigan Plan?	A64
1.12.6 Q: Has a doctor or other health professional ever told you that you had arthritis or a related condition (for example, rheumatoid arthritis, gout, lupus, or fibromyalgia)?	A65
1.12.6.1 Q: Did you find out you had arthritis or a related condition before or after you enrolled in the Healthy Michigan Plan?	A66
1.12.7 Q: Has a doctor or other health professional ever told you that you had asthma?	A67
1.12.7.1 Q: Did you find out you had asthma before or after you enrolled in the Healthy Michigan Plan?	A68
1.12.8 Q: Has a doctor or other health professional ever told you that you had chronic bronchitis, COPD or emphysema?	A69
1.12.8.1 Q: Did you find out you had chronic bronchitis, COPD or emphysema before or after you enrolled in the Healthy Michigan Plan?	A70
1.12.9 Q: Has a doctor or other health professional ever told you that you had diabetes or sugar diabetes (other than during pregnancy)?	A71
1.12.9.1 Q: Did you find out you had diabetes or sugar diabetes before or after you enrolled in the Healthy Michigan Plan?	A72
1.12.10 Q: Has a doctor or other health professional ever told you that you had a heart condition or heart disease?	A73
1.12.10.1 Q: Did you find out you had a heart condition or heart disease before or after you enrolled in the Healthy Michigan Plan?	A74
1.12.11 Q: Has a doctor or other health professional ever told you that you had a substance use disorder?	A75
1.12.11.1 Q: Did you find out you had a substance use disorder before or after you enrolled in the Healthy Michigan Plan?	A76
1.12.12 Q: Has a doctor or other health professional ever told you that you had cancer, other than skin cancer?	A77
1.12.12.1 Q: Did you find out you had cancer, other than skin cancer, before or after you enrolled in the Healthy Michigan Plan?	A78
1.12.13 Q: Has a doctor or other health professional ever told you that you had a stroke?	A79
1.12.13.1 Q: Did you find out you had a stroke before or after you enrolled in the Healthy Michigan Plan?	A80

1.12.14 Q: Has a doctor or other health professional ever told you that you had any other ongoing health condition? . . . . .	A81
1.12.14.1 Q: What is the condition? . . . . .	A82
1.12.14.2 Q: Did you find out you had the condition before or after you enrolled in the Healthy Michigan Plan? . . . . .	A83
1.12.15 Chronic condition (2018 survey or DW) . . . . .	A84
1.12.16 Count of chronic conditions (2018 survey or DW) . . . . .	A85
1.12.17 Mental health condition and/or substance use disorder (2018 survey or DW) . . . . .	A86
<b>2 Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.</b>	<b>A87</b>
2.1 Q: Do you think eyeglasses are covered, not covered, or don't know? . . . . .	A88
2.2 Q: Do you think prescription medications are covered, not covered, or don't know? . . . . .	A89
2.3 Q: Do you think routine dental care is covered, not covered, or don't know? . . . . .	A90
2.4 Q: Do you think treatment to stop smoking is covered, not covered, or don't know? . . . . .	A91
2.5 Q: Do you think birth control or family planning is covered, not covered, or don't know? . . . . .	A92
2.6 Q: Do you think counseling for mental or emotional problems is covered, not covered, or don't know? . . . . .	A93
2.7 Q: Do you think substance use treatment is covered, not covered, or don't know? . . . . .	A94
2.8 Q: I could be dropped from the Healthy Michigan Plan for not paying my bill. . . . .	A95
2.9 Q: I may get a reduction in the amount I might have to pay if I complete a Health Risk Assessment. . . . .	A96
2.10 Q: Some kinds of visits, tests and medicines have no copays. . . . .	A97
2.11 Overall knowledge of HMP covered benefits and costs . . . . .	A98
2.12 Q: In the past year, have you received a statement from the state that showed the services you received through the Healthy Michigan Plan and how much you owe, if anything? . . . . .	A99
2.12.1 Q: I carefully review each MI Health Account statement to see how much I owe. . . . .	A100
2.12.2 Q: The MI Health Account statements help me be more aware of the cost of health care. . . . .	A101
2.12.3 Q: Information I saw in a MI Health Account statement led me to change some of my decisions about health care. . . . .	A102
2.13 Q: The amount I have to pay overall for the Healthy Michigan Plan seems fair. . . . .	A103
2.14 Q: The amount I pay for the Healthy Michigan Plan is affordable. . . . .	A104
2.15 Q: There is a limit on the total amount I have to pay each year for Healthy Michigan Plan insurance. . . . .	A105
2.16 Q: Having the Healthy Michigan Plan has taken a lot of stress off me. . . . .	A106
2.17 Q: Without the Healthy Michigan Plan, I wouldn't be able to go to the doctor. . . . .	A107
2.18 Q: Without the Healthy Michigan Plan, I wouldn't be able to go to the dentist. . . . .	A108
2.19 Q: I worry about not being able to get the health care I need if my Healthy Michigan Plan insurance ends. . . . .	A109
2.20 Q: Since you've been enrolled in the Healthy Michigan Plan, have you had any questions or problems using your Healthy Michigan Plan insurance? . . . . .	A110
2.21 Summary: Since you've been enrolled in the Healthy Michigan Plan, have you had any questions or problems using your Healthy Michigan Plan insurance? . . . . .	A111
2.21.1 Q: What kind of questions or difficulties did you have? . . . . .	A111
2.22 Q: Doctors treat people on Medicaid the same as people with private insurance. . . . .	A112
2.23 Q: Medicaid helps people get a "leg-up" when they really need it. . . . .	A113
2.24 Q: Many people on Medicaid do not want other people to know. . . . .	A114
2.25 Q: A lot of people in this country don't respect those on Medicaid. . . . .	A115
2.26 Q: There should be a limit on how long someone can be covered by Medicaid. . . . .	A116
2.27 Q: It is very important to me personally to have health insurance. . . . .	A117
2.28 Q: Getting discounts on copays and premiums as a reward for healthy behavior is a good idea. . . . .	A118
2.29 Q: Everyone should have to pay something for their health care. . . . .	A119
<b>3 Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.</b>	<b>A120</b>
3.1 Q: In the 12 months before enrolling in the Healthy Michigan Plan, was there any time when you didn't get the health care you needed? . . . . .	A121
3.1.1 Q: What type of care? . . . . .	A122
3.1.2 Q: Why didn't you get the care you needed? . . . . .	A122
3.2 Q: In the last 12 months, was there any time when you didn't get the health care you needed? . . . . .	A123
3.2.1 Q: What type of care? . . . . .	A124
3.2.2 Q: Why didn't you get the care you needed? . . . . .	A124
3.2.3 Reduction in forgone health care . . . . .	A125

3.3	Q: In the 12 months before enrolling in the Healthy Michigan Plan, was there any time when you didn't get the dental care you needed? . . . . .	A126
3.3.1	Q: Why didn't you get the care you needed? . . . . .	A127
3.4	Q: In the last 12 months, was there any time when you didn't get the dental care you needed? . . . . .	A128
3.4.1	Q: Why didn't you get the care you needed? . . . . .	A129
3.4.2	Reduction in forgone dental care . . . . .	A130
3.5	Q: Would you say that your ability to get primary care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A131
3.6	Summary: Would you say that your ability to get primary care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A132
3.7	Q: Would you say that your ability to get specialist care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A133
3.8	Summary: Would you say that your ability to get specialist care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A134
3.9	Q: Would you say that your ability to get dental care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A135
3.10	Summary: Would you say that your ability to get dental care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A136
3.11	Q: Would you say that your ability to get mental health care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A137
3.12	Summary: Would you say that your ability to get mental health care through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A138
3.13	Q: Would you say that your ability to get substance use treatment services through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A139
3.14	Summary: Would you say that your ability to get substance use treatment services through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A140
3.15	Q: Would you say that your ability to get prescription medications through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A141
3.16	Summary: Would you say that your ability to get prescription medications through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A142
3.17	Q: Would you say that your ability to get cancer screening through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A143
3.18	Summary: Would you say that your ability to get cancer screening through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A144
3.19	Q: Would you say that your ability to get help with staying healthy or preventing health problems through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A145
3.20	Summary: Would you say that your ability to get help with staying healthy or preventing health problems through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A146
3.21	Q: Would you say that your ability to get birth control/family planning services through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A147
3.22	Summary: Would you say that your ability to get birth control/family planning services through the Healthy Michigan Plan is better, worse or about the same, compared to before? . . . . .	A148
3.23	Improved ability to get any type of care . . . . .	A149
3.24	Q: During the 12 months before you were enrolled in the Healthy Michigan Plan, about how much did you spend out-of-pocket for your own medical and dental care? . . . . .	A150
3.25	Q: In the last 12 months, about how much did you spend out-of-pocket for your own medical and dental care? . . . . .	A151
3.26	Q: In the 12 months before enrolling in the Healthy Michigan Plan, did you have problems paying medical bills? . . . . .	A152
3.26.1	Q: Because of these problems paying medical bills, have you or your family been contacted by a collections agency? . . . . .	A153
3.26.2	Q: Because of these problems paying medical bills, have you or your family thought about filing for bankruptcy? . . . . .	A154
3.26.2.1	Q: Did you file for bankruptcy? . . . . .	A155
3.26.3	Q: Since enrolling in Healthy Michigan, have your problems paying medical bills gotten worse, stayed the same, or gotten better? . . . . .	A156

<b>4</b>	<b>Aim 4: To describe HMP enrollees' health behaviors, how they change over time with enrollment and disenrollment in HMP, and barriers and facilitators to improvement in health behaviors.</b>	<b>A157</b>
4.1	Q: In the last 7 days, how many days did you exercise for at least 20 minutes? . . . . .	A158

4.2	Q: In the last 7 days, how many days did you drink soda or pop that contains sugar, sweetened fruit drinks, sports drinks, or energy drinks? . . . . .	A159
4.3	Q: In the last 7 days, how many days did you eat 3 or more servings of fruits or vegetables in a day? . . . . .	A160
4.4	Q: In the last 12 months, has a doctor, nurse, or other health professional talked with you about exercise? . . . . .	A161
4.5	Q: In the last 12 months, has a doctor, nurse, or other health professional talked with you about diet and nutrition? . . . . .	A162
4.6	Q: In the last 7 days, how many days did you have [5 if male, 4 if female] alcoholic drinks on the same day? . . . . .	A163
4.7	Q: In the last 12 months, has a doctor, nurse, or other health professional talked with you about safe alcohol use? . . . . .	A164
4.8	Q: In the last 30 days have you smoked or used tobacco? . . . . .	A165
4.8.1	Q: Do you want to quit or cut back on smoking or using tobacco? . . . . .	A166
4.8.1.1	Q: Are you working on cutting back or quitting right now? . . . . .	A167
4.8.2	Q: In the last 12 months, did you receive any advice or assistance from a health professional or your health plan on how to quit smoking? . . . . .	A168
4.9	Q: In the last 30 days, have you used drugs or medications to affect your mood or help you relax? . . . . .	A169
4.9.1	Q: How often? . . . . .	A170
4.9.1.1	Q: In the last 12 months, has a doctor, nurse, or other health professional talked with you about your use of these drugs or medications? . . . . .	A171
4.10	Q: During the time you have been enrolled in the Healthy Michigan Plan, did you discuss the Health Risk Assessment with your doctor or someone at your primary care provider's office? . . . . .	A172
4.10.1	Q: What healthy behavior did you choose to work on? . . . . .	A173
4.10.1.1	Q: Why did you choose this healthy behavior? . . . . .	A173
4.10.2	Q: Did completing the Health Risk Assessment teach you something you didn't know about your health? . . . . .	A174
4.10.3	Q: Did completing the Health Risk Assessment help your primary care provider better understand your health needs? . . . . .	A175
4.10.4	Q: Did completing the Health Risk Assessment motivate you to be more responsible for your health? . . . . .	A176
<b>5</b>	<b>Aim 5: To understand HMP enrollees' decisions about when, where and how to seek care, including decisions about emergency department utilization.</b>	<b>A177</b>
5.1	Q: In the 12 months before enrolling in the Healthy Michigan Plan, was there a place that you usually would go for a checkup, when you felt sick, or when you wanted advice about your health? . . . . .	A178
5.2	Summary: In the 12 months before enrolling in the Healthy Michigan Plan, was there a place that you usually would go for a checkup, when you felt sick, or when you wanted advice about your health? . . . . .	A179
5.2.1	Q: What kind of a place was it? . . . . .	A180
5.2.2	Regular source of care in 12 months prior to HMP, detailed . . . . .	A181
5.3	Q: In the last 12 months, is there a place you usually go when you need a checkup, feel sick, or want advice about your health? . . . . .	A182
5.4	Summary: In the last 12 months, is there a place you usually go when you need a checkup, feel sick, or want advice about your health? . . . . .	A183
5.4.1	Q: What kind of a place was it? . . . . .	A184
5.4.2	Regular source of care in last 12 months, detailed . . . . .	A185
5.4.3	Q: Is this the same place you went before you enrolled in the Healthy Michigan Plan? . . . . .	A186
5.4.4	Q: Is this your primary care provider for your Healthy Michigan Plan coverage? . . . . .	A187
5.4.5	Q: Do you have a primary care provider through your Healthy Michigan Plan coverage? . . . . .	A188
5.4.5.1	Q: Did you choose your primary care provider or did your health plan assign you to one? . . . . .	A189
5.4.6	Reported having a primary care provider . . . . .	A190
5.4.6.1	Q: Have you seen your primary care provider in the past 12 months? . . . . .	A191
5.4.6.1.1	Q: Why not? . . . . .	A192
5.5	Q: In the past 12 months, when you felt sick or wanted advice about your health, how easy or difficult was it to get an appointment to see your primary care provider? . . . . .	A193
5.6	Summary: In the past 12 months, when you felt sick or wanted advice about your health, how easy or difficult was it to get an appointment to see your primary care provider? . . . . .	A194
5.6.1	Q: What made it difficult? . . . . .	A194
5.7	Q: In the last 12 months, did you visit a dentist? . . . . .	A195
5.7.1	Q: Why not? . . . . .	A196
5.8	Q: During the past 12 months, did you go to a hospital emergency room about your own health (whether or not you were admitted overnight)? . . . . .	A197
5.8.1	Q: Thinking about the most recent time you were at the emergency room, did you try to contact your usual provider's office before going to the emergency room? . . . . .	A198

5.8.1.1	Q: Did you talk to someone? . . . . .	A199
5.8.1.1.1	Q: Why did you end up going to the ER? . . . . .	A200
5.8.2	Q: Which of these were true about that most recent ER visit? . . . . .	A201
5.8.2.1	Q: You arrived by ambulance or other emergency vehicle. . . . .	A201
5.8.2.2	Q: The problem was too serious for a doctor’s office or clinic. . . . .	A202
5.8.2.3	Q: Your doctor’s office or clinic was not open. . . . .	A203
5.8.2.4	Q: You needed to get care at a time that would not make you miss work or school. . . . .	A204
5.8.2.5	Q: You went to the ER because it’s your closest place to receive care. . . . .	A205
5.8.2.6	Q: You went to the ER because you get most of your care at the emergency room. . . . .	A206
5.8.2.7	Q: Any other reason you decided to go to the ER? . . . . .	A207
5.8.3	Q: In the last 12 months was there a time when you needed help or advice when your usual clinic or doctor’s office was closed? . . . . .	A208
5.8.3.1	Q: Thinking about the most recent time you needed health care help or advice when your usual doctor’s office was closed, how did you handle this situation? . . . . .	A209
5.9	Q: If I have a medical problem, my preference is to go straight to a doctor and ask his or her opinion. . . . .	A210
5.10	Q: In the past 12 months, did you check how much you would pay for a doctor’s visit, medication, or other health care service before you received care? . . . . .	A211
5.10.1	Q: What type of health care was this for? . . . . .	A212
5.11	Q: In the past 12 months, did you compare quality ratings for any health care services at different places? . . .	A213
5.11.1	Q: What type of health care was this for? . . . . .	A214
5.12	Q: In the past 12 months, did you talk with a health care provider about how much any health care services would cost you personally? . . . . .	A215
5.12.1	Q: What type of health care was this for? . . . . .	A216
5.13	Q: In the past 12 months, did you ask a health care provider to recommend a less costly prescription drug? . .	A217
<b>6</b>	<b>Aim 6: To understand why enrollees lose or drop HMP coverage and what, if any, source of health insurance coverage they subsequently obtain.</b>	<b>A218</b>
6.1	Q: How much longer do you expect you will have insurance through the Healthy Michigan Plan? . . . . .	A219
6.1.1	Q: What is the reason you think your HMP insurance will end? . . . . .	A220

## Appendix A Interpretation Notes

Appendix A presents descriptive statistics for responses to all survey questions, with raw N for number of respondents, weighted percentages or means, and 95% confidence intervals (CIs). We examined bivariate associations of variables with respondent characteristics including age, gender, race/ethnicity, FPL group, region, presence of a chronic condition, and presence of a mental health condition and/or substance use disorder.

When a question was answered by all respondents N=2,602. An N of less than 2,602 reflects either pre-determined skip patterns based on prior survey questions, or item non-response. "Don't know" responses were treated as non-response if they accounted for less than 2% of the total responses to that question. Respondents who answered "not applicable" to survey questions were excluded from bivariate and multivariate analyses.

# 0 Demographics

## 0.1 Main demographics table

Universe: All respondents (N=2,602)

	Weighted Proportion	95% CI
<b>FPL category</b>		
0-35% (n=960)	54.6	[53.6, 55.6]
36-99% (n=947)	26.6	[25.8, 27.4]
100%+ (n=695)	18.8	[18.1, 19.5]

## 1.12 Q: Has a doctor or other health professional ever told you that you had any of the following?

### 1.12.1 Self-reported chronic conditions

Universe: All respondents (N=2,602)

	Weighted Proportion	95% CI
<b>Any self-reported chronic condition<sup>a</sup></b>		
Yes (n=1,842)	67.5	[65.1, 69.8]
No (n=760)	32.5	[30.2, 34.9]
<b>Mood disorder</b>		
Yes (n=840)	32.0	[29.8, 34.3]
No (n=1,749)	68.0	[65.7, 70.2]
<b>Other chronic condition</b>		
Yes (n=773)	27.5	[25.4, 29.6]
No (n=1,820)	72.5	[70.4, 74.6]
<b>Hypertension</b>		
Yes (n=738)	25.5	[23.5, 27.6]
No (n=1,855)	74.5	[72.4, 76.5]
<b>Arthritis or a related condition</b>		
Yes (n=614)	20.1	[18.4, 22.0]
No (n=1,973)	79.9	[78.0, 81.6]
<b>Asthma</b>		
Yes (n=388)	16.0	[14.2, 18.0]
No (n=2,208)	84.0	[82.0, 85.8]
<b>Chronic bronchitis, COPD, or emphysema</b>		
Yes (n=259)	9.2	[7.9, 10.6]
No (n=2,335)	90.8	[89.4, 92.1]
<b>Diabetes</b>		
Yes (n=270)	8.8	[7.7, 10.2]
No (n=2,319)	91.2	[89.8, 92.3]
<b>Heart condition or heart disease</b>		
Yes (n=227)	8.5	[7.3, 9.9]
No (n=2,364)	91.5	[90.1, 92.7]
<b>Substance use disorder</b>		
Yes (n=112)	4.3	[3.5, 5.4]
No (n=2,484)	95.7	[94.6, 96.5]
<b>Cancer</b>		
Yes (n=89)	2.7	[2.1, 3.4]
No (n=2,501)	97.3	[96.6, 97.9]
<b>Stroke</b>		
Yes (n=64)	2.3	[1.7, 3.0]
No (n=2,534)	97.7	[97.0, 98.3]

**Note:** Total n is less than universe N due to item non-response.

<sup>a</sup> Any self-reported chronic condition was defined as a Yes response to the question of ever having been told by a health care provider that the individual had asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, or stroke.

## 2.21 Summary: Since you've been enrolled in the Healthy Michigan Plan, have you had any questions or problems using your Healthy Michigan Plan insurance?

*Universe:* All respondents (N=2,602)

Questions/problems using HMP	Weighted Proportion	95% CI
Yes (n=456)	17.0	[15.3, 18.8]
No (n=2,135)	82.7	[80.8, 84.4]
Not applicable (n=7)	0.3	[0.1, 0.8]

**Note:** Total n is less than universe N due to item non-response.

### 2.21.1 Q: What kind of questions or difficulties did you have?

*Universe:* Respondents who had questions or problems using their Healthy Michigan Plan insurance (N=456)

Kind of questions or difficulties with HMP	Weighted Proportion	95% CI
Difficulty/inability finding a provider (n=198)	43.3	[37.8, 48.9]
Cost/insurance plan wouldn't cover services needed (n=165)	35.0	[29.6, 40.7]
Difficulty finding out information (n=59)	15.0	[11.2, 19.8]
Charged incorrectly/too much (n=29)	5.8	[3.7, 8.8]
Problem with Medicaid/HMP ID card (n=12)	3.2	[1.6, 6.2]
Trouble making payments (n=12)	2.4	[1.2, 5.0]
Disenrolled/declared ineligible but don't know why (n=13)	2.3	[1.2, 4.1]
Eligibility/administrative error by DHHS (n=11)	2.3	[1.1, 4.4]
Difficulty completing re-enrollment materials (n=7)	1.9	[0.8, 4.2]
Transportation/logistics (n=7)	1.8	[0.7, 4.5]
Difficulty getting appointment (n=5)	1.6	[0.6, 4.2]
Case worker difficulties/difficult to reach (n=7)	1.3	[0.6, 2.9]
Inaccurate information from/problem with Medicaid Health Plan (n=8)	1.0	[0.5, 2.0]
Other (n=4)	0.5	[0.2, 1.6]
Problem with information being requested (n=1)	0.2	[0.0, 1.3]

**Note:** Respondents were able to provide multiple responses.

## 2.22 Q: Doctors treat people on Medicaid the same as people with private insurance.

### 3.22 Summary: Would you say that your ability to get birth control/family planning services through the Healthy Michigan Plan is better, worse or about the same, compared to before?

Universe: All respondents (N=2,602)

Ability to get birth control/family planning services	Weighted Proportion	95% CI
Better (n=472)	18.5	[16.7, 20.5]
About the same (n=570)	24.3	[22.2, 26.5]
Worse (n=21)	0.9	[0.5, 1.4]
Not applicable (n=1,426)	52.3	[49.8, 54.7]
Don't know (n=103)	4.1	[3.3, 5.2]

**Note:** Total n is less than universe N due to item non-response.

#### 4.10.1 Q: What healthy behavior did you choose to work on?

*Universe:* Respondents who discussed the Health Risk Assessment with their doctor or someone at their primary care provider's office (N=1,208)

HRA healthy behavior	Weighted Proportion	95% CI
At least one healthy behavior (n= 1,070)	88.3	[85.8, 90.5]
Nutrition/diet (n=426)	36.9	[33.5, 40.4]
Exercise/activity (n=363)	28.7	[25.7, 32.0]
Reduce/quit tobacco use (n=201)	15.7	[13.4, 18.4]
Lose weight (n=191)	13.7	[11.5, 16.2]
Don't know (n=97)	7.9	[6.3, 9.9]
Stress/mental health care (n=70)	7.3	[5.4, 9.8]
Other (n=47)	4.6	[3.2, 6.5]
None (n=37)	3.0	[2.0, 4.5]
Monitor my blood pressure/blood sugar (n=34)	2.3	[1.5, 3.4]
Reduce/quit alcohol use (n=16)	1.4	[0.8, 2.5]
Take medicine regularly (n=3)	0.3	[0.1, 1.1]
Return to doctor (n=2)	0.3	[0.1, 1.2]
Flu shot (n=2)	0.2	[0.0, 0.8]
Go to the dentist (n=2)	0.1	[0.0, 0.5]

**Note:** Respondents were able to provide multiple responses.

##### 4.10.1.1 Q: Why did you choose this healthy behavior?

*Universe:* Respondents who discussed the Health Risk Assessment with their doctor or someone at their primary care provider's office (N=1,208)

Reasons for choosing healthy behavior	Weighted Proportion	95% CI
Something I wanted to do anyway (n=602)	48.8	[45.3, 52.4]
It would help improve my illness/health condition (n=308)	25.6	[22.6, 28.8]
Doctor suggested healthy behavior (n=161)	16.0	[13.5, 18.9]
Healthy behavior easy to do (n=12)	0.7	[0.4, 1.4]
HMP would cover the cost (n=1)	0.1	[0.0, 0.7]

**Note:** Respondents were able to provide multiple responses.

#### 4.10.2 Q: Did completing the Health Risk Assessment teach you something you didn't know about your health?

## 5.6 Summary: In the past 12 months, when you felt sick or wanted advice about your health, how easy or difficult was it to get an appointment to see your primary care provider?

Universe: All respondents (N=2,602)

PCP appointment ease in past 12 months	Weighted Proportion	95% CI
Very easy (n=864)	30.8	[28.6, 33.0]
Easy (n=980)	37.6	[35.2, 40.0]
Neutral (n=327)	13.4	[11.8, 15.3]
Difficult (n=144)	6.5	[5.3, 7.9]
Very difficult (n=44)	2.0	[1.4, 2.9]
Not applicable (n=226)	9.7	[8.3, 11.3]

Note: Total n is less than universe N due to item non-response.

### 5.6.1 Q: What made it difficult?

Universe: Respondents who had a difficult or very difficult time making an appointment to see their PCP in the past 12 months (N=188)

Reasons PCP visit difficult	Weighted Proportion	95% CI
Difficulty getting appointment (n=147)	73.8	[64.8, 81.2]
My PCP not available/had to see another provider (n=21)	10.6	[6.6, 16.6]
Transportation/logistics (n=13)	10.0	[5.3, 18.1]
Other (n=14)	8.6	[4.5, 15.9]
Inconvenient hours (n=11)	5.9	[3.0, 11.0]
No response from provider's office/provider's office not open (n=9)	5.2	[2.4, 10.7]
Don't like PCP, office staff/wanted a new doctor (n=1)	1.2	[0.2, 8.2]

Note: Respondents were able to provide multiple responses.

## 5.7 Q: In the last 12 months, did you visit a dentist?

Universe: All respondents (N=2,602)

<b>Total (n=2,599)</b>	6.3	[5.2, 7.6]	12.7	[11.0, 14.6]	12.5	[10.9, 14.2]	25.6	[23.5, 27.8]	43.0	[40.6, 45.4]	100.0

Note: Total n is less than universe N due to item non-response.

**6.1.1 Q: What is the reason you think your HMP insurance will end?**

*Universe:* Respondents who expected they would continue to have insurance through HMP for 2 years or less (N=746)

<b>Expected reason for ending HMP enrollment</b>	<b>Weighted Proportion</b>	<b>95% CI</b>
Expect to get employer-sponsored insurance (n=263)	37.8	[33.4, 42.3]
Expect an income increase (n=190)	22.8	[19.3, 26.8]
Eligibility change- non-specific (n=71)	9.8	[7.4, 12.9]
Expect a household change (n=48)	7.7	[5.4, 10.9]
Will turn 65/Medicare eligible (n=63)	6.1	[4.5, 8.2]
HMP program will not continue (n=44)	5.4	[3.7, 7.9]
Other (n=28)	5.2	[3.2, 8.5]
Dissatisfied with HMP (n=2)	0.2	[0.0, 0.9]
Don't know (n=89)	10.6	[8.2, 13.6]

**Note:** Respondents were able to provide multiple responses.

**2018 Healthy Michigan Voices Cohort II Survey  
Appendix B: Additional Analyses**

# Contents

<b>Appendix B Interpretation Notes</b>	<b>B8</b>
<b>0 Demographics</b>	<b>B9</b>
0.1 Demographic comparison of Cohort I (2016) and Cohort II (2018)	B10
0.2 Age comparison of Cohort I (2016) and Cohort II (2018)	B10
0.3 Student status	B11
0.3.1 Student status by selected characteristics	B11
0.3.2 Student status by employment status	B12
0.3.3 Student status amount by employment status	B12
0.3.4 Student status by employment status, detailed	B13
0.3.5 Student status amount by employment status, detailed	B13
0.3.6 Predictors of student status	B14
0.4 Employed/Self-employed	B15
0.4.1 Employed/Self-employed by selected characteristics	B15
0.4.2 Employment status by selected characteristics	B16
0.4.3 Employment status by student status amount	B16
0.4.4 Employment status, detailed by selected characteristics	B17
0.4.5 Employment status, detailed by student status amount	B17
0.4.6 Predictors of employed/self-employed	B18
0.5 HMP helped me do a better job at work	B19
0.5.1 HMP helped me do a better job at work by selected characteristics	B19
0.5.2 HMP helped me do a better job at work by selected characteristics (continued)	B20
0.5.3 Predictors of HMP helped me do a better job at work	B21
0.6 HMP helped me get a better job	B22
0.6.1 HMP helped me get a better job by selected characteristics	B22
0.6.2 HMP helped me get a better job by selected characteristics (continued)	B23
0.6.3 Predictors of HMP helped me get a better job	B24
0.7 HMP made me better able to look for a job	B25
0.7.1 HMP made me better able to look for a job by selected characteristics	B25
0.7.2 HMP made me better able to look for a job by selected characteristics (continued)	B26
0.7.3 Predictors of HMP made me better able to look for a job	B27
<b>1 Aim 1: To describe changes over time in health and functional status for HMP enrollees, particularly those with chronic conditions or other indicators of poorer health.</b>	<b>B28</b>
1.1 Health status	B29
1.1.1 Health status by selected characteristics	B29
1.1.2 Predictors of excellent/very good/good health status	B30
1.2 Number of days physical health not good	B31
1.2.1 Number of days physical health not good by selected characteristics	B31
1.2.2 Number of days physical health not good by employment status, detailed	B32
1.2.3 Number of days physical health not good by expected duration of HMP enrollment, among enrollees who are 19-62 years old	B32
1.2.4 Predictors of number of days physical health not good	B33
1.2.5 Predictors of number of days physical health not good (additional models)	B34
1.3 Change in physical health status since HMP enrollment	B35
1.3.1 Change in physical health status since HMP enrollment by selected characteristics	B35
1.3.2 Change in physical health status since HMP enrollment by selected characteristics (continued)	B36
1.3.3 Predictors of physical health status got better since HMP enrollment	B37
1.4 Number of days mental health not good	B38
1.4.1 Number of days mental health not good by selected characteristics	B38
1.4.2 Number of days mental health not good by employment status, detailed	B39
1.4.3 Number of days mental health not good by expected duration of HMP enrollment, among enrollees who are 19-62 years old	B39
1.4.4 Predictors of number of days mental health not good	B40
1.4.5 Predictors of number of days mental health not good (additional models)	B41
1.5 Change in mental health status since HMP enrollment	B42
1.5.1 Change in mental health status since HMP enrollment by selected characteristics	B42

1.5.2	Change in mental health status since HMP enrollment by selected characteristics (continued)	B43
1.5.3	Predictors of mental health status got better since HMP enrollment	B44
1.6	Change in dental health status since HMP enrollment	B45
1.6.1	Change in dental health status since HMP enrollment by selected characteristics	B45
1.6.2	Change in dental health status since HMP enrollment by selected characteristics (continued)	B46
1.6.3	Predictors of dental health status got better since HMP enrollment	B47
1.7	Number of days missed work due to illness or injury	B48
1.7.1	Number of days missed work due to illness or injury by selected characteristics	B48
1.7.2	Predictors of number of days missed work due to illness or injury	B49
1.8	New diagnosis since HMP enrollment	B50
1.8.1	New diagnosis since HMP enrollment by selected characteristics	B50
1.8.2	New diagnosis since HMP enrollment by selected characteristics (continued)	B51
1.8.3	Predictors of new diagnosis since HMP enrollment	B52

<b>2</b>	<b>Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.</b>	<b>B53</b>
2.1	Knowledge that eyeglasses are covered	B54
2.1.1	Knowledge that eyeglasses are covered by selected characteristics	B54
2.1.2	Predictors of knowledge that eyeglasses are covered	B55
2.2	Knowledge that prescription medications are covered	B56
2.2.1	Knowledge that prescription medications are covered by selected characteristics	B56
2.2.2	Predictors of knowledge that prescription medications are covered	B57
2.3	Knowledge that routine dental care is covered	B58
2.3.1	Knowledge that routine dental care is covered by selected characteristics	B58
2.3.2	Predictors of knowledge that routine dental care is covered	B59
2.4	Knowledge that treatment to stop smoking is covered	B60
2.4.1	Knowledge that treatment to stop smoking is covered by selected characteristics	B60
2.4.2	Predictors of knowledge that treatment to stop smoking is covered	B61
2.5	Knowledge that birth control/family planning is covered	B62
2.5.1	Knowledge that birth control/family planning is covered by selected characteristics	B62
2.5.2	Predictors of knowledge that birth control/family planning is covered	B63
2.6	Knowledge that mental health counseling is covered	B64
2.6.1	Knowledge that mental health counseling is covered by selected characteristics	B64
2.6.2	Predictors of knowledge that mental health counseling is covered	B65
2.7	Knowledge that substance use treatment is covered	B66
2.7.1	Knowledge that substance use treatment is covered by selected characteristics	B66
2.7.2	Predictors of knowledge that substance use treatment is covered	B67
2.8	Knowledge you can't be dropped for not paying	B68
2.8.1	Knowledge you can't be dropped for not paying by selected characteristics	B68
2.8.2	Predictors of knowledge you can't be dropped for not paying	B69
2.9	Knowledge you may get reduction by completing HRA	B70
2.9.1	Knowledge you may get reduction by completing HRA by selected characteristics	B70
2.9.2	Predictors of knowledge you may get reduction by completing HRA	B71
2.10	Knowledge some visits, tests, and medicines have no copays	B72
2.10.1	Knowledge some visits, tests, and medicines have no copays by selected characteristics	B72
2.10.2	Predictors of knowledge some visits, tests, and medicines have no copays	B73
2.11	Received MIHA statement in the past year	B74
2.11.1	Received MIHA statement in the past year by selected characteristics	B74
2.11.2	Predictors of received MIHA statement in the past year	B75
2.12	Carefully review MIHA statement	B76
2.12.1	Carefully review MIHA statement by selected characteristics	B76
2.12.2	Predictors of carefully review MIHA statement	B77
2.13	MIHA statements help me be aware of health care costs	B78
2.13.1	MIHA statements help me be aware of health care costs by selected characteristics	B78
2.13.2	MIHA statements help me be aware of health care costs by selected characteristics (continued)	B79
2.13.3	Predictors of MIHA statements help me be aware of health care costs	B80
2.14	MIHA statements led me to change health care decisions	B81
2.14.1	MIHA statements led me to change health care decisions by selected characteristics	B81
2.14.2	MIHA statements led me to change health care decisions by selected characteristics (continued)	B82
2.14.3	Predictors of MIHA statements led me to change health care decisions	B83

2.15	Amount I have to pay for HMP seems fair . . . . .	B84
2.15.1	Amount I have to pay for HMP seems fair by selected characteristics . . . . .	B84
2.15.2	Amount I have to pay for HMP seems fair by selected characteristics (continued) . . . . .	B85
2.15.3	Predictors of amount I have to pay for HMP seems fair . . . . .	B86
2.16	Amount I pay for HMP is affordable . . . . .	B87
2.16.1	Amount I pay for HMP is affordable by selected characteristics . . . . .	B87
2.16.2	Amount I pay for HMP is affordable by selected characteristics (continued) . . . . .	B88
2.16.3	Predictors of amount I pay for HMP is affordable . . . . .	B89
2.17	Overall knowledge of HMP covered benefits and costs by forgone health care in last 12 months . . . . .	B90
<b>3</b>	<b>Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.</b>	<b>B91</b>
3.1	Forgone health care in last 12 months . . . . .	B92
3.1.1	Forgone health care in last 12 months by selected characteristics . . . . .	B92
3.1.2	Forgone health care in last 12 months by selected characteristics (continued) . . . . .	B93
3.1.3	Predictors of forgone health care in last 12 months . . . . .	B94
3.2	Forgone dental care in last 12 months . . . . .	B95
3.2.1	Forgone dental care in last 12 months by selected characteristics . . . . .	B95
3.2.2	Forgone dental care in last 12 months by selected characteristics (continued) . . . . .	B96
3.2.3	Predictors of forgone dental care in last 12 months . . . . .	B97
3.3	Ability to get primary care . . . . .	B98
3.3.1	Ability to get primary care by selected characteristics . . . . .	B98
3.3.2	Predictors of ability to get primary care got better got better . . . . .	B99
3.4	Ability to get specialist care . . . . .	B100
3.4.1	Ability to get specialist care by selected characteristics . . . . .	B100
3.4.2	Predictors of ability to get specialist care got better . . . . .	B101
3.5	Ability to get dental care . . . . .	B102
3.5.1	Ability to get dental care by selected characteristics . . . . .	B102
3.5.2	Predictors of ability to get dental care got better . . . . .	B103
3.6	Ability to get mental health care . . . . .	B104
3.6.1	Ability to get mental health care by selected characteristics . . . . .	B104
3.6.2	Predictors of ability to get mental health care got better . . . . .	B105
3.7	Ability to get substance use treatment services . . . . .	B106
3.7.1	Ability to get substance use treatment services by selected characteristics . . . . .	B106
3.7.2	Predictors of ability to get substance use treatment services got better . . . . .	B107
3.8	Ability to get prescription medications . . . . .	B108
3.8.1	Ability to get prescription medications by selected characteristics . . . . .	B108
3.8.2	Predictors of ability to get prescription medications got better . . . . .	B109
3.9	Ability to get cancer screening . . . . .	B110
3.9.1	Ability to get cancer screening by selected characteristics . . . . .	B110
3.9.2	Predictors of ability to get cancer screening got better . . . . .	B111
3.10	Ability to get help staying healthy/preventing health problems . . . . .	B112
3.10.1	Ability to get help staying healthy/preventing health problems by selected characteristics . . . . .	B112
3.10.2	Predictors of ability to get help staying healthy/preventing health problems got better . . . . .	B113
3.11	Ability to get birth control/family planning services . . . . .	B114
3.11.1	Ability to get birth control/family planning services by selected characteristics . . . . .	B114
3.11.2	Predictors of ability to get birth control/family planning services got better . . . . .	B115
3.12	Change in problems paying medical bills . . . . .	B116
3.12.1	Change in problems paying medical bills by selected characteristics . . . . .	B116
3.12.2	Predictors of problems paying medical bills got better . . . . .	B117
<b>4</b>	<b>Aim 4: To describe HMP enrollees' health behaviors, how they change over time with enrollment and disenrollment in HMP, and barriers and facilitators to improvement in health behaviors.</b>	<b>B118</b>
4.1	Exercise frequency in last 7 days . . . . .	B119
4.1.1	Exercise frequency in last 7 days by selected characteristics . . . . .	B119
4.1.2	Predictors of exercised at least 3 days in last 7 days . . . . .	B120
4.2	Sugary drink consumption in last 7 days . . . . .	B121
4.2.1	Sugary drink consumption in last 7 days by selected characteristics . . . . .	B121
4.2.2	Predictors of drinking 0 sugary drinks in last 7 days . . . . .	B122
4.3	Days eating 3+ fruits or vegetables in last 7 days . . . . .	B123

4.3.1	Days eating 3+ fruits or vegetables in last 7 days by selected characteristics	B123
4.3.2	Predictors of eating 3+ fruits or vegetables at least 3 days in last 7 days	B124
4.4	Binge drinking frequency in last 7 days	B125
4.4.1	Binge drinking frequency in last 7 days by selected characteristics	B125
4.4.2	Predictors of no days of binge drinking in last 7 days	B126
4.5	Health professional discussed safe alcohol use in last 12 months	B127
4.5.1	Health professional discussed safe alcohol use in last 12 months by selected characteristics	B127
4.5.2	Predictors of health professional discussed safe alcohol use in last 12 months	B128
4.6	Smoked or used tobacco in last 30 days	B129
4.6.1	Smoked or used tobacco in last 30 days by selected characteristics	B129
4.6.2	Predictors of smoked or used tobacco in last 30 days	B130
4.7	Want to reduce or quit smoking or using tobacco	B131
4.7.1	Want to reduce or quit smoking or using tobacco by selected characteristics	B131
4.7.2	Predictors of wanting to reduce or quit smoking or using tobacco	B132
4.8	Attempting to quit smoking or using tobacco	B133
4.8.1	Attempting to quit smoking or using tobacco by selected characteristics	B133
4.8.2	Predictors of attempting to quit smoking or using tobacco	B134
4.9	Got help with reducing/quitting tobacco in last 12 months	B135
4.9.1	Got help with reducing/quitting tobacco in last 12 months by selected characteristics	B135
4.9.2	Predictors of getting help with reducing/quitting tobacco in last 12 months	B136
4.10	Drug use in last 30 days	B137
4.10.1	Drug use in last 30 days by selected characteristics	B137
4.10.2	Predictors of drug use in last 30 days	B138
4.11	Discussed HRA with provider	B139
4.11.1	Discussed HRA with provider by selected characteristics	B139
4.11.2	Predictors of discussed HRA with provider	B140
4.12	Any HRA record (DW)	B141
4.12.1	Any HRA record (DW) by selected characteristics	B141
4.12.2	Any HRA record (DW) by selected characteristics (continued)	B142
4.12.3	Predictors of any HRA record (DW)	B143
4.13	Any HRA completion with physician attestation (DW)	B144
4.13.1	Any HRA completion with physician attestation (DW)	B144
4.13.2	Any HRA completion with physician attestation (DW) by selected characteristics (continued)	B145
4.13.3	Predictors of any HRA completion with physician attestation (DW)	B146
4.14	HRA taught me something new about my health	B147
4.14.1	HRA taught me something new about my health by highest level of education	B147
4.15	HRA helped PCP better understand my health needs	B147
4.15.1	HRA helped PCP better understand my health needs by highest level of education	B147
4.16	HRA motivated me to be more responsible for my health	B147
4.16.1	HRA motivated me to be more responsible for my health by highest level of education	B147
<b>5</b>	<b>Aim 5: To understand HMP enrollees' decisions about when, where and how to seek care, including decisions about emergency department utilization.</b>	<b>B148</b>
5.1	Regular source of care in last 12 months	B149
5.1.1	Regular source of care in last 12 months by selected characteristics	B149
5.1.2	Regular source of care in last 12 months by selected characteristics (continued)	B150
5.1.3	Predictors of regular source of care in last 12 months is doctor's office or clinic	B151
5.2	PCP visit in past 12 months	B152
5.2.1	PCP visit in past 12 months by selected characteristics	B152
5.2.2	Predictors of PCP visit in past 12 months	B153
5.3	Any primary care visit (DW)	B154
5.3.1	Any primary care visit (DW) by selected characteristics	B154
5.3.2	Any primary care visit (DW) by selected characteristics (continued)	B155
5.3.3	Predictors of any primary care visit (DW)	B156
5.4	Preventive services used (DW)	B157
5.4.1	Summary of preventive services used (DW)	B157
5.4.2	Any statin (DW) prescription, among enrollees with diabetes and/or heart disease (2018 survey or DW)	B157
5.5	Any preventive service (DW)	B158
5.5.1	Any preventive service (DW) by selected characteristics	B158
5.5.2	Any preventive service (DW) by selected characteristics (continued)	B159

5.5.3	Predictors of any preventive service (DW)	B160
5.6	Any preventive dental visit (DW)	B161
5.6.1	Any preventive dental visit (DW) by selected characteristics	B161
5.6.2	Any preventive dental visit (DW) by selected characteristics (continued)	B162
5.6.3	Any preventive dental visit (DW) by selected characteristics (continued)	B163
5.6.4	Predictors of any preventive dental visit (DW)	B164
5.6.5	Predictors of any preventive dental visit (DW) (additional models)	B165
5.7	Any cervical cancer screening (DW)	B166
5.7.1	Any cervical cancer screening (DW) by selected characteristics, among female enrollees	B166
5.7.2	Any cervical cancer screening (DW) by selected characteristics, among female enrollees (continued)	B167
5.7.3	Predictors of any cervical cancer screening (DW), among female enrollees	B168
5.8	Any breast cancer screening (DW)	B169
5.8.1	Any breast cancer screening (DW) by selected characteristics, among female enrollees over the age of 50	B169
5.8.2	Any breast cancer screening (DW) by selected characteristics, among female enrollees over the age of 50 (continued)	B170
5.8.3	Predictors of any breast cancer screening (DW), among female enrollees over the age of 50	B171
5.9	Any colorectal cancer screening (DW)	B172
5.9.1	Any colorectal cancer screening (DW) by selected characteristics, among enrollees over the age of 50	B172
5.9.2	Any colorectal cancer screening (DW) by selected characteristics, among enrollees over the age of 50 (continued)	B173
5.9.3	Predictors of any colorectal cancer screening (DW), among enrollees over the age of 50	B174
5.10	Any STI test (excluding HPV) (DW)	B175
5.10.1	Any STI test (excluding HPV) (DW) by selected characteristics	B175
5.10.2	Any STI test (excluding HPV) (DW) by selected characteristics (continued)	B176
5.10.3	Predictors of any STI test (excluding HPV) (DW)	B177
5.11	Any HPV test (DW)	B178
5.11.1	Any HPV test (DW) by selected characteristics, among female enrollees	B178
5.11.2	Any HPV test (DW) by selected characteristics, among female enrollees (continued)	B179
5.11.3	Predictors of any HPV test (DW), among female enrollees	B180
5.12	Any vaccine (non-flu) (DW)	B181
5.12.1	Any vaccine (non-flu) (DW) by selected characteristics	B181
5.12.2	Any vaccine (non-flu) (DW) by selected characteristics (continued)	B182
5.12.3	Predictors of any vaccine (non-flu) (DW)	B183
5.13	Any flu vaccine (DW)	B184
5.13.1	Any flu vaccine (DW) by selected characteristics	B184
5.13.2	Any flu vaccine (DW) by selected characteristics (continued)	B185
5.13.3	Predictors of any flu vaccine (DW)	B186
5.14	Any pneumonia vaccine (DW)	B187
5.14.1	Any pneumonia vaccine (DW) by selected characteristics	B187
5.14.2	Any pneumonia vaccine (DW) by selected characteristics (continued)	B188
5.14.3	Predictors of any pneumonia vaccine (DW)	B189
5.15	Any statin (DW)	B190
5.15.1	Any statin (DW) by selected characteristics	B190
5.15.2	Any statin (DW) by selected characteristics (continued)	B191
5.15.3	Any statin (DW) by selected characteristics (continued)	B192
5.15.4	Predictors of any statin (DW)	B193
5.16	Any NRT/Varenicline (DW)	B194
5.16.1	Any NRT/Varenicline (DW) by selected characteristics, among enrollees who reported smoking or using tobacco in the last 30 days	B194
5.16.2	Any NRT/Varenicline (DW) by selected characteristics, among enrollees who reported smoking or using tobacco in the last 30 days (continued)	B195
5.16.3	Predictors of any NRT/Varenicline (DW), among enrollees who reported smoking or using tobacco in the last 30 days	B196
5.17	Any other dental visit (DW)	B197
5.17.1	Any other dental visit (DW) by selected characteristics	B197
5.17.2	Any other dental visit (DW) by selected characteristics (continued)	B198
5.17.3	Predictors of any other dental visit (DW)	B199
5.18	Any dental visit (DW)	B200
5.18.1	Any dental visit (DW) by selected characteristics	B200
5.18.2	Any dental visit (DW) by selected characteristics (continued)	B201

5.18.3	Predictors of any dental visit (DW)	B202
5.18.4	Any dental visit (DW) by selected characteristics, among enrollees with diabetes (2018 survey or DW)	B203
5.18.5	Any dental visit (DW) by selected characteristics, among enrollees with diabetes (2018 survey or DW) (continued)	B204
5.18.6	Predictors of any dental visit (DW), among enrollees with diabetes (2018 survey or DW)	B205
5.19	Dental visit in last 12 months	B206
5.19.1	Dental visit in last 12 months by selected characteristics	B206
5.19.2	Predictors of dental visit in last 12 months	B207
5.20	Any eye visit (DW)	B208
5.20.1	Any eye visit (DW) by selected characteristics	B208
5.20.2	Any eye visit (DW) by selected characteristics (continued)	B209
5.20.3	Predictors of any eye visit (DW)	B210
5.20.4	Any eye visit (DW) by selected characteristics, among enrollees with diabetes (2018 survey or DW)	B211

## Appendix B Interpretation Notes

Appendix B presents multivariate analyses which were conducted to test for relationships or differences between selected variables and groups of interest, including analyses using claims data. The types of analysis, models, and specific tests are described in the table footnotes.

Variables derived from health-related characteristics, claims-based utilization, and Health Risk Assessment (HRA) completion drawn from the state Data Warehouse are labeled "(DW)".

When a question was answered by all respondents N=2,602. An N of less than 2,602 reflects either pre-determined skip patterns based on prior survey questions, or item non-response. "Don't know" responses were treated as non-response if they accounted for less than 2% of the total responses to that question. Respondents who answered "not applicable" to survey questions were excluded from bivariate and multivariate analyses.

## 0 Demographics

## 0.1 Demographic comparison of Cohort I (2016) and Cohort II (2018)

	2016 Cohort I		2018 Cohort II	
	Weighted Proportion	95% CI	Weighted Proportion	95% CI

<b>Hispanic/Latino<sup>a</sup></b>				
Yes	5.2	[4.4, 6.2]	7.1	[6.0, 8.5]
No	94.3	[93.3, 95.2]	92.9	[91.5, 94.0]
Don't know	0.5	[0.2, 0.9]		
<b>Arab/Chaldean/Middle Eastern<sup>a</sup></b>				
Yes	6.2	[5.3, 7.2]	7.8	[6.4, 9.4]
No	93.6	[92.5, 94.5]	92.2	[90.6, 93.6]
Don't know	0.3	[0.1, 0.6]		
<b>Employed and/or student</b>				
Yes	53.7	[51.82, 55.6]	62.9	[60.6, 65.1]
No	46.3	[44.4, 48.2]	37.1	[34.9, 37.1]
<b>Any self-reported chronic condition<sup>b</sup></b>				
Yes	69.2	[67.3, 71.0]	67.5	[65.1, 69.8]
No	30.8	[29.0, 32.7]	32.5	[30.2, 34.9]
<b>Insurance status in 12 months prior to HMP</b>				
Insured some or all 12 months	40.7	[38.8, 42.6]	54.2	[51.8, 56.6]
Uninsured all 12 months	57.9	[55.9, 59.8]	43.4	[41.0, 45.8]
Don't know	1.4	[1.0, 2.1]	2.4	[1.6, 3.5]

<sup>a</sup> "Don't know" responses were dropped in Cohort II due to a response selection of < 2.0 %

<sup>b</sup> For 2016 Cohort I, any self-reported chronic condition was defined as having one or more chronic conditions (including asthma, cancer, COPD, diabetes, hypertension, heart disease, stroke, mood disorder, substance use disorder, or other condition) identified by survey self-report; For 2018 Cohort II, any self-reported chronic condition was defined as having one or more chronic conditions (including asthma, arthritis, cancer, COPD, diabetes, hypertension, heart disease, stroke, mood disorder, substance use disorder, or other condition) identified by survey self-report. In the 2018 Cohort II survey, respondents were asked explicitly whether they had received a diagnosis of arthritis whereas in the 2016 Cohort I survey respondents were not, though they could have identified arthritis when asked about any other ongoing health conditions.

## 0.2 Age comparison of Cohort I (2016) and Cohort II (2018)

Cohort	Age				
	10 <sup>th</sup> percentile	Median	90 <sup>th</sup> percentile	Mean	95% CI
2016 Cohort I	22.6	40.3	58.3	40.4	[39.9, 40.9]
2018 Cohort II	20	34	58	36.7	[36.1, 37.4]

**Notes:** Multiple logistic regression. New diagnosis since HMP enrollment was defined as reporting that one or more chronic conditions (asthma, arthritis, cancer, COPD, diabetes, hypertension, heart disease, stroke, mood disorder, substance use disorder, or other condition) had been diagnosed after HMP enrollment.

**2 Aim 2: To describe perceptions and understanding of Medicaid coverage, HMP policies, and cost-sharing and how these change over time with enrollment.**

## 2.17 Overall knowledge of HMP covered benefits and costs by forgone health care in last 12 months

	Overall knowledge of HMP covered benefits and costs			n
	Mean	SE	95% CI	
<b>Forgone health care in last 12 months</b>				
Yes	4.9	0.17	[4.6, 5.3]	203
No	4.9	0.05	[4.8, 5.0]	2,390

**Note:** Two sample t-test results, difference= -0.00, 95% CI (-0.31, 0.35),  $t(2,581) = -0.02$ ,  $p = 0.982$ . Overall knowledge of HMP covered benefits and costs was defined as the count of correct answers to a series of 10 questions about HMP: (1) I could be dropped from the Healthy Michigan Plan for not paying my bill (correct answer = no); (2) I may get a reduction in the amount I might have to pay if I complete a health risk assessment (correct answer = yes); (3) Some kinds of visits, tests and medicines have no copays (correct answer = yes); Do you think the following are covered under Healthy Michigan Plan: (4) eyeglasses (correct answer = yes); (5) prescription medications (correct answer = yes); (6) routine dental care (correct answer = yes); (7) treatment to stop smoking (correct answer = yes); (8) birth control/family planning (correct answer = yes); (9) counseling for mental or emotional problems (correct answer = yes); (10) substance use treatment (correct answer = yes)

- 3 Aim 3: To understand financial and non-financial barriers and facilitators to care and how those change over time of enrollment and disenrollment.**

## 5.4 Preventive services used (DW)

### 5.4.1 Summary of preventive services used (DW)

	Weighted Proportion	95% CI
<b>Any preventive service (DW)<sup>a</sup></b>		
Yes (n=2,094)	75.8	[73.5, 78.0]
No (n=508)	24.2	[22.0, 26.5]
<b>Any preventive dental visit (DW)</b>		
Yes (n=834)	30.0	[27.8, 32.3]
No (n=1,768)	70.0	[67.7, 72.2]
<b>Any cervical cancer screening (DW)<sup>b</sup></b>		
Yes (n=624)	37.1	[34.3, 40.1]
No (n=923)	62.9	[59.9, 65.7]
<b>Any breast cancer screening (DW)<sup>c</sup></b>		
Yes (n=293)	58.4	[52.9, 63.7]
No (n=190)	41.6	[36.3, 47.1]
<b>Any colorectal cancer screening (DW)<sup>d</sup></b>		
Yes (n=252)	29.5	[25.8, 33.4]
No (n=561)	70.5	[66.6, 74.2]
<b>Any STI test (excluding HPV) (DW)</b>		
Yes (n=753)	30.8	[28.6, 33.1]
No (n=1,849)	69.2	[66.9, 71.4]
<b>Any HPV test (DW)</b>		
Yes (n=351)	10.2	[9.0, 11.5]
No (n=2,251)	89.8	[88.5, 91.0]
<b>Any vaccine (non-flu) (DW)</b>		
Yes (n=658)	23.4	[21.4, 25.5]
No (n=1,944)	76.6	[74.5, 78.6]
<b>Any flu vaccine (DW)</b>		
Yes (n=1,191)	41.9	[39.6, 44.3]
No (n=1,411)	58.1	[55.7, 60.4]
<b>Any pneumonia vaccine (DW)</b>		
Yes (n=162)	5.0	[4.1, 6.1]
No (n=2,440)	95.0	[93.9, 95.9]
<b>Any statin (DW)</b>		
Yes (n=414)	12.1	[10.8, 13.6]
No (n=2,188)	87.9	[86.4, 89.2]
<b>Any NRT/Varenicline (DW)<sup>e</sup></b>		
Yes (n=187)	18.1	[15.2, 21.4]
No (n=668)	81.9	[78.6, 84.8]

<sup>a</sup> Any preventive service includes the following preventive services: any preventive dental visit (DW), any cervical cancer screening (DW), any breast cancer screening (DW), any colorectal cancer screening (DW), any STI test (excluding HPV) (DW), any HPV test (DW), any vaccine (non-flu) (DW), any flu vaccine (DW), any pneumonia vaccine (DW), any statin (DW), or any NRT/varenicline (DW); does not include any primary care visit (DW)

<sup>b</sup> Restricted to female enrollees

<sup>c</sup> Restricted to female enrollees over the age of 50

<sup>d</sup> Restricted to enrollees over the age of 50

<sup>e</sup> Restricted to enrollees who reported smoking or using tobacco in the last 30 days

### 5.4.2 Any statin (DW) prescription, among enrollees with diabetes and/or heart disease (2018 survey or DW)

Any statin (DW)	Weighted Proportion	95% CI
Yes (n=253)	37.0	[32.4, 41.8]
No (n=340)	63.0	[58.2, 67.6]

## 5.5 Any preventive service (DW)

**2018 Healthy Michigan Voices Cohort II Survey**  
**Appendix C: Variable Definitions**

## Survey composite variables

The following variables were created by combining responses from more than one survey question. The composite variables are outlined below:

**New diagnosis since HMP enrollment** was defined as reporting that one or more chronic conditions (asthma, arthritis, cancer, COPD, diabetes, hypertension, heart disease, stroke, mood disorder, substance use disorder, or other condition) had been diagnosed after HMP enrollment.

**Overall knowledge of HMP covered benefits and costs** was defined as the count of correct answers to a series of 10 questions about HMP:

- (1) I could be dropped from the Healthy Michigan Plan for not paying my bill (correct answer = no)
- (2) I may get a reduction in the amount I might have to pay if I complete a health risk assessment (correct answer = yes)
- (3) Some kinds of visits, tests and medicines have no copays (correct answer = yes);  
Do you think the following are covered under Healthy Michigan Plan:
- (4) eyeglasses (correct answer = yes)
- (5) prescription medications (correct answer = yes)
- (6) routine dental care (correct answer = yes)
- (7) treatment to stop smoking (correct answer = yes)
- (8) birth control/family planning (correct answer = yes)
- (9) counseling for mental or emotional problems (correct answer = yes)
- (10) substance use treatment (correct answer = yes)

**Reduction in forgone health care** was defined as those who reported forgoing health care in the 12 months prior to HMP but not in the last 12 months while they were on HMP.

**Reduction in forgone dental care** was defined as those who reported forgoing dental care in the 12 months prior to HMP but not in the last 12 months while they were on HMP.

**Improved ability to get any type of care** was defined as those who reported their ability to get one or more of the following types of care through HMP was better compared to before: primary care, specialist care, dental care, mental health care, substance use treatment services, prescription medications, cancer screening, help with staying healthy or preventing health problems, or birth control/family planning services.

## Claims-derived variables

Medicaid administrative claims for survey respondents were extracted from the state's data warehouse; claims were processed to derive aggregate flags for utilization of health services. Claims-derived variables represent two 12-month periods: Period 1 corresponds to 0-12 months prior to the month of sample selection, while Period 2 corresponds to the 13-24 months prior to sample selection.

### Variables describing visits

#### **Emergency Department (ED) visits**

Identification of ED visits was based on specifications in the HEDIS Emergency Department Utilization (EDU) measure. Consistent with HEDIS, ED visits that resulted in an inpatient admission were not counted, and non-institutional/non-surgical ED visits that occurred a day prior to or after an institutional ED/Observation/Inpatient visit were removed. Two modifications of the HEDIS criteria were made, to allow results to represent the full range of ED utilization for the HMP population: (1) mental health/substance abuse ED visits were included, where HEDIS excludes them; and (2) three observation visit codes (G0378, G0379, revenue code 0762) were added to the HEDIS observation value set, along with codes G0380-G0384 for Hospital Type B emergency visits.

#### **Inpatient visits**

Identification of inpatient visits was based on the HEDIS Inpatient Utilization (IPU) measure, with a few modifications: removal of nursing home stays, removal of hospital transfers, collapsing consecutive discharge dates, and including MH/SA hospital stays (excluded in the HEDIS measure).

#### **Primary care visits**

Identification of primary care visits was based on two elements:

1. A procedure code on the MDHHS Physician Primary Care Rate Increase Initiative list; and
2. A billing or rendering provider who was a Primary Care Provider of record for  $\geq 1$  Medicaid enrollee in the MDHHS Data Warehouse PCP table; or who had participated in Michigan's Primary Care Transformation (MiPCT) project and thus had been verified as a primary care provider; or who had a primary care specialty classification in both the Michigan Medicaid provider specialty table and the NPPES taxonomy table. NPIs known to be inaccurate from prior analyses were excluded.

#### **Other outpatient visits**

Other outpatient visits require a procedure code or revenue code in the HEDIS Outpatient value set (the same one used for the primary care visit spec). None of the outpatient visit categories include ED visits.

#### **Dental visits**

Identification of dental visits was based on any procedure code beginning with D in procedure code field. **Preventive dental visits** were defined as the subset of dental visits with at least one procedure code between D1000 and D1999. **Other dental visits** were defined as the subset of dental visits with at least one procedure code starting with 'D' and outside the preventive dental

range. If a visit had a preventive and non-preventive dental procedure code, the visit was considered preventive.

### **Eye visit**

Identification of eye visits was based on procedure code=S0620 or S0621, or between 92002 and 92499.

## **Variables describing receipt of preventive services**

### **Cervical cancer screening**

Identification of cervical cancer screening was based on having one of the following:

1. Cervical cytology procedure codes: 88141-88143, 88147, 88148, 88150, 88152-88154, 88164-88167, 88174, 88175, G0123, G0124, G0141, G0143-G0145, G0147, G0148, P3000-P3001, Q0091
2. Revenue code for pap smear: 0923

### **Breast cancer screening**

Identification of breast cancer screening was based on the presence of one of the following:

1. Mammography procedure codes: 77055, 77056, 77057, G0202, G0204, G0206.
2. Revenue codes for mammography: 0401, 0403
3. ICD procedure codes: 8736, 8737

### **Colorectal cancer screening**

Identification of colorectal cancer screening was based on having at least one of the following:

1. Flexible sigmoidoscopy procedure codes: 45330-45336, 45337-45342, 45345-45347, 45349, 45350
2. FOBT procedure codes: 82270, 82274, G0328
3. Colonoscopy procedure codes: 44388-44394, 44397, 44401-44408, 45355, 45378, 45380,-45393, 45398, G0105, G0121
4. ICD procedure codes: 4522-4525, 4542, 4543

### **STI test (excluding HPV)**

Identification of STI testing was based on the following procedure codes:

1. Chlamydia: 86631, 87110, 87270, 87486, 87490, 87491, 87810, 3511F
2. Herpes: 86694-86696, 87274
3. HIV: 86689, 86701-86703, 87389, 87390, 87535, 87536, 87806, 87901, 87906, G0432, G0433, G0475
4. Additional testing procedure codes: 80081, 87207, 87209, 87529, 87660, 87661, 87808, 87901

### **HPV test**

Identification of HPV testing was based on the following procedures codes: 87620-87625, G0476.

### **Flu vaccine**

Identification of flu vaccine receipt was based on flu vaccine administration dates in the Michigan Care Improvement Registry (MCIR), flu vaccine CPT codes in Medicaid claims data, and flu vaccine NDC codes in the Medicaid pharmacy data during 2017 or 2018.

**Pneumonia vaccine (DW)**

Identification of pneumonia vaccine receipt was based on having at least one vaccine administration date in the Michigan Care Improvement Registry (MCIR), at least one CPT code in Medicaid claims data, or at least one NDC code in the Medicaid pharmacy data for a PCV13 or PPSV23 vaccine.

**Other vaccine (non-flu)**

Identification of other vaccine receipt was based on having at least one administration date in the Michigan Care Improvement Registry (MCIR), or at least one CPT code in Medicaid claims data, or at least one NDC code in the Medicaid pharmacy data for the following vaccines: Td/Tdap, Zoster, Hepatitis A and B, HIB, HPV, Meningitis or Meningitis B, Varicella, and MMR.

**Statins**

Identification of statin therapy was based on pharmacy records for drug class M4D (Antihyperlipidemic - HMG COA reductase inhibitors), as applied to individuals with cardiovascular disease.

**Smoking cessation medications**

Identification of nicotine replacement therapy (NRT) or varenicline was based on pharmacy records for drug classes: H7N, J3A, or J3C.

**Any preventive service**

Identification of any preventive service was defined as the confirmed presence of at least one service listed in this section.

## Combined claims- and survey-derived variables

### Chronic condition

Chronic condition was initially identified separately through survey response and through Medicaid administrative claims.

Chronic condition *based on survey response* was defined as a Yes response to the question of ever having been told by a health care provider that the individual had asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, or stroke.

Chronic condition *based on Medicaid administrative claims* was defined as defined as  $\geq 1$  Medicaid claim in the 24 months prior to survey sampling with a diagnosis code for asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, or stroke.

The combined variable was identified as having EITHER survey report or claims evidence of having asthma, arthritis or related conditions, cancer other than skin cancer, COPD/chronic bronchitis, diabetes, hypertension, heart disease, or stroke. This information was used to generate two variables for analysis:

**Any chronic condition** was defined as at least one condition identified through the combined survey-claims variable.

**Count of chronic conditions** was defined as having none, one, or two or more chronic conditions identified through the combined survey-claims variable.

### Mental health condition and/or substance use disorder

Mental health condition and/or substance use disorder was initially identified separately through survey response and through Medicaid administrative claims

Mental health condition *based on survey response* was defined as a Yes response to the question of ever having been told by a health care provider that the individual had a mood disorder.

Substance use disorder *based on survey response* was defined as a Yes response to the question of ever having been told by a health care provider that the individual had a substance use disorder.

Mental health condition *based on Medicaid administrative claims* was defined as defined as  $\geq 1$  Medicaid claim in the 24 months prior to survey sampling with a diagnosis code for any of the following:

1. Anxiety disorders
2. ADHD, Conduct Disorders, and Hyperkinetic Syndrome
3. Bipolar Disorder
4. Depressive Disorders
5. Personality Disorders
6. Post-Traumatic Stress Disorder (PTSD)
7. Schizophrenia and Other Psychotic Disorders
8. Other Mental Health Disorders

Substance use disorders *based on Medicaid administrative claims* was defined as defined as  $\geq 1$  Medicaid claim in the 24 months prior to survey sampling with a diagnosis code for any of the following:

1. Alcohol Use Disorders
2. Drug Use Disorders - Cannabis
3. Drug Use Disorders - Caffeine
4. Drug Use Disorders - Hallucinogens
5. Drug Use Disorders - Inhalants
6. Drug Use Disorders - Opioids
7. Drug Use Disorders - Sedatives, Hypnotics, Anxiolytics
8. Drug Use Disorders - Stimulants
9. Drug Use Disorders - Other or Unknown
10. Drug Use Disorders - Polysubstance

The combined **Mental health condition and/or substance use disorder** variable was identified as having EITHER survey report or claims evidence of having at least one mental health condition OR substance use disorder, as defined above.

# 2018 Healthy Michigan Voices Cohort II Survey

## Appendix D: Details of Weighting Adjustment

### Base Selection Weight

An independent survey sample was drawn each month from January to December 2018 from the HMP enrollee population; once the eligible population was identified for that month, sampling was done using stratification which combines FPL and prosperity region.

Reflecting the sample design, the first step used an inverse of sampling probability and calculated selection weights for sample unit  $i$  in sampling stratum  $h$  as follows:

$$w_{1,hi} = \frac{N_h}{n_h}$$

where  $N_h$  is the population size and  $n_h$  is the sample size for stratum  $h$ .

We made adjustment for nonworking numbers, ineligible cases, unknown eligibility cases and nonresponse (noncontacts and refusal combined) separately as follows.

### Nonworking Number Adjustment

Nonworking numbers were considered out of our target population and removed from the sample. We used the following adjustment factor,  $f_{2,hi}$ , for this.

$$f_{2,hi} = \begin{cases} 0, & \text{if } i \text{ was not a working number} \\ \frac{\sum_i w_{1,hi}}{\sum_i I\_WR_i \times w_{1,hi}}, & \text{if } i \text{ was a working number} \end{cases}$$

where  $I\_WR_i$  was a 1/0 indicator for working number status (1: working number, 0: nonworking number). Essentially,  $f_{2,hi}$  removed the nonworking numbers from the scope and weighted up working numbers proportionally within each sampling stratum. The resulting weight was:

$$w_{2,hi} = f_{2,hi} \times w_{1,hi}$$

### Unknown Eligibility Adjustment

Besides the nonworking numbers, there were working numbers with whom contact was not established. With these cases, HMPV eligibility could not be ascertained. Moreover, the eligibility rate may have differed systematically across strata. Thus, a new adjustment factor was applied to the weight from the previous stage:

$$f_{3,hi} = \begin{cases} 0, & \text{if eligibility is unknown for } i \\ \frac{\sum_i w_{2,hi}}{\sum_i I\_UE_i \times w_{2,hi}}, & \text{if eligibility is known for } i \end{cases}$$

where  $I\_UE_i$  was a 1/0 indicator for unknown eligibility status (1: known eligibility; 0: unknown eligibility). The resulting weight was:

$$w_{3,hi} = f_{3,hi} \times w_{2,hi}$$

### Known Eligibility Adjustment

Among those who were contacted, some may not have been eligible for the 2018 HMP Cohort II survey for various reasons related to the eligibility criteria described previously. These cases fell outside of the target population and, hence, were removed through the following:

$$f_{4,hi} = \begin{cases} 0, & \text{if } i \text{ is ineligible} \\ \frac{\sum_i w_{3,hi}}{\sum_i I_{EL_i} \times w_{3,hi}}, & \text{if } i \text{ is eligible} \end{cases}$$

where  $I_{EL_i}$  was a 1/0 indicator for eligibility status (1: eligible; 0: ineligible). The resulting weight was:

$$w_{4,hi} = f_{4,hi} \times w_{3,hi}$$

### Nonresponse Adjustment

Those who were contacted and eligible were retained after the previous step. These included contacts with the sampled enrollee and/or others at the phone number who took messages or gave information. Some enrollees initially agreed to participate, then abandoned the survey within the first few questions. Reasons for non-participation were not recorded. These were all considered as nonresponse. Overall, there were 4,492 eligible cases; among them, 2,602 responded.

Respondents and nonrespondents were different, with nonrespondents being younger, more likely to be male, non-Hispanic other race and with a shorter amount of time after first enrolled in HMP, and more likely to be from the Detroit Metro area than respondents.

In order to compensate for potential nonresponse bias associated with these differences, we adjusted for the following characteristics available in the HMP sample frame data, which were available for both respondents and nonrespondents:

- Sex
- Age (19-34; 35-49; 50-64 years old)
- Race/ethnicity (Hispanic; Non-Hispanic White; Non-Hispanic Black; Non-Hispanic other)
- First HMP month (2016 January-June; 2016 July-December; 2017 January or later)

Additionally, we had the following sampling information available for both respondents and nonrespondents:

- Stratum (FPL x Region)
- FPL
- Region

The nonresponse adjustment followed Lee and Valliant (2008)<sup>1</sup>, where a logistic regression model was used to predict response while controlling for differences in characteristics between respondents and nonrespondents. The predictors included age, sex, race/ethnicity, first month on HMP and sampling strata. The adjustment factor,  $f_{5,i}$ , was the inverse of response propensity predicted from the logistic regression. The resulting weight was:

$$w_{5,i} = w_{4,hi} \times f_{5,i}$$

---

<sup>1</sup> Lee S, Valliant R. 2008. Weighting telephone samples using propensity scores. *Advances in Telephone Survey Methodology*. 170-183.

### Post-stratification

The target population of the 2018 HMV Cohort II survey was HMP enrollees eligible for this survey between January and December 2018. There were 159,112 such persons. From the sample frame data, we had information about the characteristics of this population. Table 3 compares the population and the sample weighted by nonresponse adjustment weight ( $w_5$ ) particularly with respect to age, sex, race/ethnicity, first month on HMP, sampling stratum, FPL and region. Our weighted sample matched the population reasonably well across most characteristics, except for age and duration on HMP. Compared to the population, our sample underrepresented enrollees who were younger or who were newer to HMP (enrolled January 2017 or later) than their counterparts. Hence, this known discrepancy was handled through post-stratification. All the characteristics in Table 3 were controlled for in the post-stratification using an iterative proportional fitting method (Deville et al., 1993)<sup>2</sup>. This process produced an adjustment factor,  $f_{6,i}$ , by forcing the sample to match the population with respect to the controlled characteristics. The resulting weight was:

$$w_{6,i} = w_{5,i} \times f_{6,i}$$

Post-stratification may force the weights to be extreme. These extreme weights increase the variability of estimates and, in turn, lower statistical power. In order to minimize the effect of extreme weights, these weights are trimmed. To address this issue we used the Individual and Global Cap Value (IGCV) method introduced by Izrael et al. (2009)<sup>3</sup>. This method sets thresholds for minimum and maximum adjustment factors in relation to the individual weights and to all weights globally. Specifically, our procedure set the global high cap at 5, the global low cap at 0.2, the individual high cap at 7 and the individual low cap at 0.12. The trimmed weights were normalized to the population total of 159,112. The resulting weight is  $w_{6,imh}$ . Table 3 includes the sample characteristics weighted by  $w_6$ . When using the post-stratified weight, the sample matched the eligible target population perfectly. However, compared to when using the nonresponse adjustment weight, there was a slight increase in standard error due to variability in weights introduced by post-stratification.

**Table 3. Comparison of HMV Cohort II eligible population and HMV sample using frame data**

Characteristics	Population		Sample				
			n	Weighted by $w_5$		Weighted by $w_6$	
	N	%		%	SE	%	SE
<b>Total</b>	159,112		2,602				
<b>Age</b>							
19-34 years old	81,312	51.1	1,036	44.3	1.1	51.1	1.2
35-49 years old	40,815	25.7	696	25.6	1.0	25.7	1.1

# 2018 Healthy Michigan Voices Cohort II Survey

## Appendix E: Survey Instrument

### Operationalized Version

[MAKING CONTACT/AGREEMENT TO PARTICIPATE]

Hi, can I speak with [RESP firstname]? This is [interviewer firstname] with the Healthy Michigan Voices project at the University of Michigan.

[If answered by another person] We want to give \_\_\_\_\_ an opportunity to participate in the Healthy Michigan Voices project. When would be a good time to call back? \_\_\_\_\_ Also, I'd like to leave a toll-free number where [RESP] can call us back. The number is 844-263-8402.

[If Voicemail] Hi, this is a message for [firstname]. I'm [interviewer firstname] with the Healthy Michigan Voices project at the University of Michigan. We're hoping to talk with you about the project and your opportunity to earn a \$25 gift card. You can give us a call back at our toll-free number, 844-263-8402. We'll also call you back at a later time. Thanks.

#### **INT00: When you have the enrollee on the phone:**

Healthy Michigan Voices is a project at the University of Michigan – you might remember getting a letter and brochure about the project a few weeks ago. [REFER TO PARTICIPATION POSTCARD, IF APPLICABLE.]

- We're speaking with people around the state who have been enrolled in the Healthy Michigan Plan, to get their views about what's working well and what may need to be improved. In appreciation for completing the interview, we will send you a gift card worth \$25.00.

Do you have any questions? Is this a good time to do the survey?

**INT10:** Okay, just a couple of quick things for you to know before we start:

- The survey is confidential. We will not tell the state, your health plan, or your doctor any of the specific answers you give on the survey.
- Participating in the survey is voluntary -- if there are any questions you don't want to answer, you can skip them.
- For completing the survey, you get a \$25 gift card that can be used anywhere that accepts MasterCard. And I'll tell you more about that at the end.

Do you have any questions before we begin?

**RECORD\_CALL:** For quality assurance and training purposes, can we record this call? Yes/No [If respondent says no, verify that recorder is turned off]

[once recorder is on] Ok, we have your ID listed as <\$Q>.

**CH\_DOB:** And just to confirm that I'm talking with the right person, we show that you were born in <MONTH> <YEAROFB>. Is that correct? Yes/No [TEXT BOX if no]

I have you listed as enrolled in [plan auto-filled] Is that correct? Yes/No

[If not the same] Do you know the name of your health plan now? [TEXT BOX]

And you first enrolled in the Healthy Michigan Plan in about [HMP enrollment month/year autofilled]. Does that sound about right? [TEXT BOX]

For these first few questions, I am going to ask you to think back to the 12 months before you enrolled in the Healthy Michigan Plan. So you enrolled in [HMP enrollment month/year autofilled], so we're talking about the year before that...

**Q1.** During the 12 months BEFORE you enrolled in the Healthy Michigan Plan, did you have any type of health insurance at any time? Yes (answer Q2) / No

If Q1=YES: **Q2a** What type of health insurance did you have? Was it insurance through a job or union, insurance purchased by you or someone else, or another type of insurance? [can have >1 type]

- Insurance provided through a job or union**  
If YES: **Q2a1** Whose job is it? (respondent/family member)
- Insurance purchased by you or someone else  
If YES: **Q2a2** Who purchased it? (respondent/family member)  
**Q2a3** Was it purchased through the marketplace known as healthcare.gov?  
Y/N/DK  
If YES: **Q2a4** Did you receive a subsidy? Y/N/DK
- Veterans Administration or VA care
- CHAMPUS, TRICARE
- Medicare/social security
- County health plan
- Medicaid / MiChild / other state program
- Student health plan
- Other: [TEXT BOX]

**Q3.** During the 12 months BEFORE you were enrolled in the Healthy Michigan Plan, about how much did you spend out-of-pocket for your own medical and dental care? Record \$ \_\_\_\_ or select Don't Know\_

[If Q3=DON'T KNOW]: **Q3a** I'll read some categories, and you stop me when I get to the amount you think is about right: less than \$50, from \$51-100, \$101-500, \$501 to \$2,000, \$2,001 to \$3,000, \$3,001 to \$5,000, or more than \$5,000?

**Q4.** In the 12 months BEFORE enrolling in the Healthy Michigan Plan, did you have problems paying medical bills? Yes/No

If Q4=YES: Because of these problems paying medical bills, have you or your family...

**Q4a** Been contacted by a collections agency? Yes/No

**Q4b** Thought about filing for bankruptcy? Yes/No

If YES: **Q4c** Did you file for bankruptcy? Yes/ No

**Q4d** Since enrolling in Healthy Michigan, have your problems paying medical bills gotten worse, stayed the same, or gotten better?

**Q5.** In the 12 months BEFORE enrolling in the Healthy Michigan Plan, was there a place that you usually would go for a checkup, when you felt sick, or when you wanted advice about your health?

Yes / No / Don't know / NA-didn't need care

If Q5=YES: **Q5a** What kind of a place was it? a clinic, doctor's office, urgent care or walk-in clinic, emergency room, or other place

**Q6.** In the 12 months BEFORE enrolling in the Healthy Michigan Plan, was there any time when you didn't get the health care you needed? Yes/No

If Q6=YES: **Q6a** What type of care?

- Primary care visits
- Specialist visits
- Mental health
- Prescription medication
- Other [TEXT BOX]

If Q6=YES: **Q6b** Why didn't you get the care you needed? [open-ended; mark all mentioned]

- Cost – no insurance
- Cost – insurance plan wouldn't cover services needed
- Couldn't find provider that took your insurance
- Problems getting appointment
- Transportation/logistics
- Other [TEXT BOX]

**Q7.** In the 12 months BEFORE enrolling in the Healthy Michigan Plan, was there any time when you didn't get the dental care you needed? Yes/No

If Q7=YES: **Q7a** Why didn't you get the care you needed? [open-ended; mark all mentioned]

- Cost – no insurance
- Cost – insurance plan wouldn't cover services needed
- Couldn't find provider that took your dental insurance
- Problems getting appointment
- Transportation/logistics
- Afraid of going to dentist
- Other [TEXT BOX]

*I'm now going to ask about the time since you enrolled in the Healthy Michigan Plan.*

**Q8.** In general, would you say your health is: Excellent; Very Good; Good; Fair; OR Poor

**Q9.** Now thinking about your physical health, which includes physical illness and injury: for how many days during the past 30 days was your physical health not good?

**Q10.** Overall, since you enrolled in the Healthy Michigan Plan, would you say your physical health has gotten better, stayed the same, OR gotten worse?

**Q11.** Now thinking about your mental health, which includes stress, depression, and problems with emotions: for how many days during the past 30 days was your mental health not good? \_\_\_\_

**Q12.** Overall, since you enrolled in the Healthy Michigan Plan, would you say your mental and emotional health has gotten better, stayed the same, OR gotten worse?

**Q13.** During the past 30 days, for how many days did poor physical or mental health keep you from doing your usual activities, such as self-care, work, or recreation?

**Q14.** Thinking about your dental health, since you enrolled in the Healthy Michigan Plan, has the health of your teeth and gums gotten better, stayed the same, OR gotten worse?

**Q15a.** How tall are you? \_\_\_\_\_

**Q15b.** How much do you weigh? \_\_\_\_\_

**Q16.** Compared to 12 months ago, how would you describe your weight? Have you lost weight; gained weight; or stayed about the same

**Q17.** Has a doctor or other health professional ever told you that you had any of the following?

- a) Hypertension, also called high blood pressure? Yes/No
- b) A heart condition or heart disease? Yes/No
- c) Diabetes or sugar diabetes (other than during pregnancy)? Yes/No
- d) Cancer, other than skin cancer? Yes/No
- e) A mood disorder, (For example, depression, anxiety, bipolar disorder)? Yes/No
- f) A stroke? Yes/No
- g) Asthma? Yes/No
- h) Chronic bronchitis, COPD or emphysema? Yes/No
- i) A substance use disorder? Yes/No
- j) Arthritis or a related condition (for example, rheumatoid arthritis, gout, lupus, or fibromyalgia)? Yes/No
- k) Any other ongoing health condition? Yes/No If YES: What is the condition? [TEXT BOX]

For each condition, if YES:

17a. Did you find out you had [autofill condition from Q22] before or after you enrolled in the Healthy Michigan Plan?

*Now I'm going to ask about your recent experiences getting health care.*

**Q18.** In the last 12 months, is there a place you usually go when you need a checkup, feel sick, or want advice about your health? Yes/ No/ Don't know/NA – haven't gotten care

If Q18=YES: **Q18a** What kind of a place was it? a clinic, doctor's office, urgent care/walk-in clinic, emergency room, other

If Q18a=Clinic or doctor's office:

**Q18n** Is this the same place you went **before you enrolled** in the Healthy Michigan Plan? Yes/No

**Q18c** And is this your **primary care provider** for your Healthy Michigan Plan Coverage? Yes/No

If Q18a=urgent care/walk-in/ER OR if Q18=NO/Don't know/NA:

**Q18d** Do you have a **primary care provider** through your Healthy Michigan Plan coverage? Y/N

If yes: **Q18e** Did you choose your primary care provider or did your health plan assign you to one?

Chose /Plan assigned

If Q18c or Q18d=YES:

**Q19.** Have you seen your primary care provider in the past 12 months? (Yes/ No/Don't know)

If Q19=No: **Q19a** Why not? [open-ended, check whatever mentioned]

- Healthy/didn't need to
- Couldn't get appointment
- Transportation/office too far away
- Don't like my PCP/office staff
- See a specialist instead
- Inconvenient hours
- Don't like doctors in general
- Other [TEXT BOX]

**Q20.** In the last 12 months, did you visit a dentist? Yes/No

If Q20=No: **Q20a** Why not? [open-ended, check whatever mentioned]

- No dental problems
- Couldn't find a dentist that would take my insurance
- Transportation/office too far away
- Inconvenient hours/location
- Afraid of dentists/dislike dentists
- Cost/Service not covered
- Just didn't want to go
- Other [TEXT BOX]

**Q21.** During the past 12 months, did you go to a hospital emergency room about your own health (whether or not you were admitted overnight)? Yes – complete Q22-23 /No – complete Q24

If Q21=YES: **Q22.** Thinking about the most recent time you were at the emergency room, did you try to contact your usual provider's office before going to the emergency room? Yes/No

If Q22=YES: **Q22a** Did you talk to someone? Yes/No

If Q22A=YES: **Q22b** Why did you end up going to the ER? [open-ended, check whatever mentioned]

- No response from the provider
- Told to go to the ER
- Advice wasn't helpful
- Symptoms didn't improve or got worse
- You couldn't get an appointment soon enough
- N/A don't have a usual provider right now
- Other [TEXT BOX]

**Q23.** Which of these were true about that most recent ER visit?

- a. You arrived by ambulance or other emergency vehicle Y/N/DK
- b. The problem was too serious for a doctor's office or clinic Y/N/DK
- c. Your doctor's office or clinic was not open Y/N/DK
- d. You needed to get care at a time that would not make you miss work or school Y/N/DK
- e. You went to the ER because it's your closest place to receive care Y/N/DK
- f. You went to the ER because you get most of your care at the emergency room Y/N/DK
- g. Any other reason you decided to go to the ER? [TEXT BOX]

If 21=NO: **Q24.** Sometimes people need health care help or advice when their usual clinic or doctor's office is closed. In the last 12 months was there a time when you needed help or advice when your usual clinic or doctor's office was closed? Yes/N

If Q24=YES: **Q24a** Think about the most recent time you needed health care help or advice when your usual doctor's office was closed, how did you handle this situation? [open-ended, check whatever mentioned]

- Phone/email with primary care office
- Got primary care appointment next day/soon
- Went to urgent care/walk-in clinic
- Got advice elsewhere (friends, internet, etc)
- Problem got better without seeking care
- Other [TEXT BOX]

**Q25.** In the past 12 months, when you felt sick or wanted advice about your health, how easy or difficult was it to get an appointment to see your primary care provider? Would you say: Very easy/Easy/Neutral/ Difficult/Very Difficult

If Q25= Difficult/Very Difficult: **Q25a.** What made it difficult? [open-ended, check whatever mentioned]

- Couldn't get through on the telephone
- Hard to get appointment
- Inconvenient hours
- Transportation
- My PCP not available / had to see another provider
- Don't like my PCP/office staff
- Other [TEXT BOX]

**Q26.** Next I'm going to ask about different categories of health care. Tell me if your ability to get that type of care through the Healthy Michigan Plan is better, worse, or about the same, compared to before you had Healthy Michigan Plan. The first one is primary care. Would you say that your ability to get primary care through the Healthy Michigan Plan is better, worse or about the same, compared to before?

- a) Primary care: better/worse/same; not applicable, don't know
- b) Specialist care: better/worse/same; not applicable, don't know
- c) Dental care: better/worse/same; not applicable, don't know
- d) Mental health care: better/worse/same; not applicable, don't know
- e) Substance use treatment services: better/worse/same; not applicable, don't know
- f) Prescription medications: better/worse/same; not applicable, don't know
- g) Cancer screening: better/worse/same; not applicable, don't know
- h) Help with staying healthy or preventing health problems better/worse/same; not applicable, don't know
- i) Birth control/ Family planning services better/worse/same, not applicable, don't know

**Q27.** In the last 12 months, was there any time when you didn't get the health care you needed?  
Yes/No

If Q27=YES: **Q27a** What type of care?

- Primary care visits
- Specialist visits
- Mental health
- Prescription medication
- Other [TEXT BOX]

If Q27a=YES: **Q27b** Why didn't you get the care you needed? [open-ended; mark all mentioned]

- Cost - no insurance
- Plan wouldn't cover services needed (out of pocket cost)
- Couldn't find provider that took your insurance
- Problems getting appointment
- Transportation/logistics
- Other [TEXT BOX]

**Q28.** In the last 12 months, was there any time when you didn't get the dental care you needed?

Yes/No

If Q28=YES: **Q28a** Why didn't you get the care you needed? [open-ended; mark all mentioned]

- Dental plan wouldn't cover treatment/service (out of pocket cost)
- Couldn't find provider that took your dental insurance
- Problems getting appointment
- Transportation/logistics
- Afraid of going to dentist
- Doesn't realize HMP covers dental at all
- Other [TEXT BOX]

People who enroll in the Healthy Michigan Plan are encouraged to complete a Health Risk Assessment each year. *The Health Risk Assessment form includes questions about your eating, exercise and other health habits; a section about choosing a healthy behavior to work on; and a section your provider's office should complete. The next questions are from the first section of the Health Risk Assessment*

**Q29.** In the last 7 days, how many days did you exercise for at least 20 minutes? [Read categories if needed]: Every day; 3-6 days; 1-2 days; 0 days

**Q30.** In the last 7 days, how many days did you drink soda or pop that contains sugar, sweetened fruit drinks, sports drinks, or energy drinks? (Do not include diet soda)  
Every day; 3-6 days; 1-2 days; 0 days

**Q31.** In the last 7 days, how many days did you eat 3 or more servings of fruits or vegetables in a day?  
Every day; 3-6 days; 1-2 days; 0 days

If questioned: Each time you ate a fruit or vegetable counts as one serving. It can be fresh, frozen, canned, cooked or mixed with other foods.

**Q32.** In the last 12 months, has a doctor, nurse, or other health professional talked with you about exercise? Y/N

**Q33.** In the last 12 months, has a doctor, nurse, or other health professional talked with you about diet and nutrition? Y/N

**Q34.** In the last 7 days, how many days did you have [AUTOFILLE 5 or 4] alcoholic drinks *on the same day*?

Every day; 3-6 days; 1-2 days; 0 days

If Q34=1 or more days: **Q34a** In the last 12 months, has a doctor, nurse, or other health professional talked with you about safe alcohol use? Y/N

**Q35.** In the last 30 days have you smoked or used tobacco? Y/N

If Q35=YES: **Q35a** Do you want to quit or cut back on smoking or using tobacco? Y/N

If Q35a=YES:**Q35b** Are you working on cutting back or quitting right now? Y/N

**Q35c** In the last 12 months, did you receive any advice or assistance from a health professional or your health plan on HOW to quit smoking? Y/N

**Q36.** In the last 30 days, have you used drugs or medications *to affect your mood or help you relax*? This includes prescription drugs taken differently than how you were told to take them, as well as street drugs. Y/N

If Q36=YES: **Q36a** How often? Almost every day/Sometimes/Rarely/Never

IF Q36a = ALMOST EVERY DAY OR SOMETIMES: **Q36b** In the last 12 months, has a doctor, nurse, or other health professional talked with you about your use of these drugs or medications? Y/N

So again, the Health Risk Assessment has *three parts: questions about your eating, exercise and smoking habits; a section about choosing a healthy behavior to work on; and a section your provider’s office should complete.*

**Q37.** During the time you have been enrolled in the Healthy Michigan Plan, did you discuss the Health Risk Assessment with your doctor or someone at your primary care provider’s office? Yes/No/Don’t remember

If YES: **37a** What healthy behavior did you choose to work on? [open-ended, code all mentioned]

Exercise/activity	Take medicine regularly
Nutrition/diet	Monitor my blood pressure/blood sugar
Lose weight	Go to the dentist
Reduce/quit tobacco use	Return to doctor
Flu shot	Other _____
Reduce/quit alcohol use	None
Treatment for substance use	Don’t remember
Stress/mental health care	

**37b** WHY did you choose this healthy behavior? [open-ended, code all mentioned]

- Doctor suggested it
- Something I wanted to do anyway
- Easy to do
- HMP would cover the cost
- It would help improve my illness/health condition
- Other [TEXT BOX]: \_\_\_\_\_

If Q37=YES, ask Q38A-C

**Q38a** Did completing the Health Risk Assessment teach you something you didn’t know about your health? Would you say: Definitely yes; somewhat yes; no

**Q38b** Did completing the Health Risk Assessment help your primary care provider better understand your health needs? Would you say: Definitely yes; somewhat yes; no

**Q38c** Did completing the Health Risk Assessment motivate you to be more responsible for your health? Would you say: Definitely yes; somewhat yes; no

*Now I’m going to ask you some questions about your Healthy Michigan coverage.*

**Q39.** I'm going to read some different types of health care, and you tell me if you think it is covered under Healthy Michigan Plan, not covered, or if you don't know. Don't worry if you don't know the answer – the state is just trying to find out what people know about the Healthy Michigan Plan. The first one is eyeglasses; do you think those are covered or not covered?

- a. Eyeglasses covered/not covered/don't know
- b. Prescription medications
- c. Routine dental care
- d. Treatment to stop smoking
- e. Birth control or family planning
- f. Counseling for mental or emotional problems
- g. Substance use treatment

**Q40.** Since you've been enrolled in the Healthy Michigan Plan, have you had any questions or problems using your Healthy Michigan Plan insurance? Yes/No

If Q30=YES: **Q40a:** What kind of questions or difficulties did you have? (open ended; check all that apply)

- Difficulty/inability finding a provider
- Needed a service that wasn't covered
- Difficulty finding out information
- Payment issues (making payments, charged incorrectly, did not know how/how much to pay)
- Administrative issue [TEXT BOX]: \_\_\_\_\_
- Other [TEXT BOX]: \_\_\_\_\_

**Q41.** In the past year, have you received a statement from the state that showed the services you received through the Healthy Michigan Plan and how much you owe, if anything? It's called your MI Health Account Statement. Yes/No/Not sure

NOTE: Health Account statements are sent through the mail. You should get one of these statements every few months, even if you don't owe anything. Do you remember anything like that?

If Q41=Yes: For the following statements, tell me if you strongly agree, agree, are neutral, disagree, or strongly disagree.

**Q42a** I carefully review each MI Health Account statement to see how much I owe;

**Q42b** The MI Health Account statements help me be more aware of the cost of health care;

**Q42c** Information I saw in a MI Health Account statement led me to change some of my decisions about health care

**Q43.** For the next statements, tell me if you: *strongly agree, agree, are neutral, disagree, or strongly disagree.*

- a) The amount I have to pay overall for the Healthy Michigan Plan seems fair.
- b) The amount I pay for the Healthy Michigan Plan is affordable.
- c) There is a limit on the total amount I have to pay each year for Healthy Michigan Plan insurance.
- d) Having the Healthy Michigan Plan has taken a lot of stress off me.
- e) Without the Healthy Michigan Plan, I wouldn't be able to go to the doctor.
- f) Without the Healthy Michigan Plan, I wouldn't be able to go to the dentist.
- g) I worry about not being able to get the health care I need if my Healthy Michigan Plan insurance ends.

**Q44.** For the following statements, if you think the statement is correct, say “yes.” If you think it is incorrect, say “no.” If you don’t know, say “don’t know”.

I could be dropped from the Healthy Michigan Plan for not paying my bill. Y/N/DK

I may get a reduction in the amount I might have to pay if I complete a health risk assessment. Y/N/DK

Some kinds of visits, tests and medicines have no copays. Y/N/DK

**Q45.** For the next statements, tell me if you: *strongly agree, agree, are neutral, disagree, or strongly disagree*

- a) Doctors treat people on Medicaid the same as people with private insurance.
- b) Medicaid helps people get a “leg-up” when they really need it.
- c) Many people on Medicaid do not want other people to know.
- d) A lot of people in this country don’t respect those on Medicaid.
- e) There should be a limit on how long someone can be covered by Medicaid.
- f) It is very important to me personally to have health insurance.
- g) Getting discounts on copays and premiums as a reward for healthy behavior is a good idea.
- h) Everyone should have to pay something for their health care.
- i) If I have a medical problem, my preference is to go straight to a doctor and ask his or her opinion.

**Q46.** In the last 12 months, about how much did you spend out-of-pocket for your own medical and dental care?

Record \$ \_\_\_\_\_ OR Don’t Know

If DON’T KNOW: **Q46a** I’ll read some categories, and you stop me when I get to the amount you think is about right. less than \$50, from \$51-100, \$101-500, \$501 to \$2,000, \$2,001 to \$3,000, \$3,001 to \$5,000, or more than \$5,000?

INTERVIEWER NOTE: (1) Your best estimate is fine. (2) Include anything paid for prescription drugs, co-payments, insurance premiums and deductibles. Do not include anything paid by your health insurance.

*For these next questions, you can just answer yes or no.*

**Q47.** In the past 12 months, did you check how much you would pay for a doctor’s visit, medication, or other health care service before you received care?

If Q47=YES: **Q47a:** What type of health care was this for? (open ended; check all that apply)

- Doctor’s visit
- Medication
- Lab test / imaging test
- Surgery or procedure
- Other [TEXT BOX]

**Q48.** In the past 12 months, did you compare quality ratings for any health care services at different places?

If Q48=YES: **Q48a:** What type of health care was this for? (open ended; check all that apply)

- Doctor’s visit
- Medication
- Lab test / imaging test
- Surgery or procedure
- Other [TEXT BOX]

**Q49.** In the past 12 months, did you talk with a health care provider about how much any health care services would cost you personally?

If Q49=YES: **Q49a:** What type of health care was this for? (open ended; check all that apply)

- Doctor's visit
- Medication
- Lab test / imaging test
- Surgery or procedure
- Other [TEXT BOX]

**Q50.** In the past 12 months, did you ask a health care provider to recommend a less costly prescription drug?

*Next we have just a few questions about you.*

**Q51.** Are you currently in school? Yes/No

If Q51=YES: **Q51a** Are you a full-time or part-time student? Full-time/Part-time

**Q52.** Are you currently employed or self-employed? Yes/No

If Q52=YES: **Q52a** are you working full time or part time? Full-time/Part-time

**Q52b** In the past 12 months...about how many days did you miss work because of illness or injury (do not include maternity leave)?

**Q52c** Have you changed jobs in the last 12 months? Y/N

If Q51=NO: **Q53a** Are you out of work, unable to work, retired, or not looking for work at this time?

- 1 Out of work
- 2 Unable to work
- 3 Retired
- 4 Not looking for work at this time

**Q53b** How long have you been [out of work/unable to work/retired]?  
Less than one year / One year or more

[if unable] **Q53c** Why are you unable to work?  
Disabled / Poor health / Old age / Caregiving responsibilities / Other [TEXT BOX]

**Q70.** In the past 12 months, did you spend time caring for a person who could not care for themselves due to illness or disability? Yes/No/DK

[If Q70=YES respondents receive Q71 and Q72]

LOGIC CHANGED 3/30/18 to add additional SKIP for Q71 AND Q72: [SKIP IF Q53B1=2 OR Q53B2=2 OR Q53B3=2]

**Q71.** In the past 12 months, did you experience any of the following because you were caring for a person who could not care for themselves due to illness or disability?

- a. Went from working full-time to part-time, or cut back your hours Yes/No
- b. Received a warning about your performance or attendance at work Yes/No
- c. Lost any of your job benefits Yes/No
- d. Took a leave of absence from work Yes/No

- e. Gave up working entirely Yes/No

Q72. In the past 12 months, about how many days did you miss work because you were caring for a person who could not care for themselves due to illness or disability? \_\_\_\_\_ (write in)

**Q54.** For the next questions, please answer Yes, No or Not applicable.

- a: The Healthy Michigan Plan gave me insurance when I couldn't get insurance at my job.  
b: Having the Healthy Michigan Plan helped me stay insured between jobs or between school and a job.  
c: Getting health insurance through the Healthy Michigan Plan helped me do a better job at work.  
d: Having health insurance through the Healthy Michigan Plan helped me get a better job.  
e: Having health insurance through the Healthy Michigan Plan has made me better able to look for a job.

**Q73:** How much longer do you expect you will have insurance through the Health Michigan Plan?

- < 6 months  
6 months to a year  
1-2 years  
more than 2 years  
don't know

[If Q73=< 6 months, 6 months to a year, or 1-2 yrs:] Q74. What is the reason you think your HMP insurance will end? (open ended; check all mentioned)

- Expect to get employer-sponsored insurance (own or family member)  
 Expect an income increase  
 Expect a household change  
 Will turn 65/Medicare eligible  
 Dissatisfied with HMP  
 Other [TEXT BOX]: \_\_\_\_\_

**Q55.** What is the highest grade of school you have completed, or the highest degree you have received? [open-ended / mark correct category]

- Less than high school  
 High school graduate (or equivalent)  
 Some college (1-4 years, no degree)  
 Associate's degree (including occupational or academic degrees)  
 Bachelor's degree (BA, BS, AB, etc.)  
 A post graduate degree (MS, MSW, MPH, MD, JD, etc.)

**Q56.** How often do you need to have someone help you read instructions, pamphlets, or other written material from a doctor, pharmacy or health plan? Never/Rarely/Sometimes/Often/Always

**Q57.** What race or races do you consider yourself to be? [open question, check all that they mention]

- White  
 Black or African American  
 American Indian or Alaska Native  
 Asian: Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, Other Asian  
 Pacific Islander: Native Hawaiian, Guamanian or Chamorro, Samoan, Other Pacific Islander

**Q58a** Are you Hispanic or Latino? Yes/No

**Q58b** Are you of Arab or Chaldean or Middle Eastern descent? Yes/No

**Q59.** Are you: Married Divorced Widowed Separated Partnered Never Married

**Q60a.** In the past 3 years, how many places have you lived for one week or longer —including where you live now? Would you say: 1 / 2 / 3 / 4 or more

**Q60b.** Have you been homeless at any time in the last 12 months?

**Q61.** Is anyone else in your household enrolled in the Healthy Michigan Plan? Yes/No

**Q62.** Are you a veteran of the US Military Armed Forces? Yes/ No

**Q63** Would you like to add anything else about your experiences with the Healthy Michigan Plan? [TEXT BOX]

**End of Survey/Contact Information:**

**ADDRESS2** That's the end of the survey. Can you please confirm your address so we can send your gift card?

[AUTOFILL address] You should receive the gift card in 1-3 weeks at that address.

**FOLLOWUPSURV** We may be conducting a follow-up survey. Would you be willing to have us recontact you for that? We're just asking for contact information – you can decide at that time if you'd like to participate. Y/N

**FOLLOWUPPHONE** If YES: What is the best phone number to reach you? [Record new #]

**FOLLOWUPTEXT** Can this number get text messages? Yes/No

**FOLLOWUPEMAIL** Is there an email address we can use to contact you? Y/N [record If given]

**INT99** Thanks so much for talking with me today! Look for your gift card in 1-3 weeks.
